

# Table of contents

Chapter 1	Introduction.....	1
1.1.	Background.....	1
1.2.	Motivation .....	2
1.3.	Objectives .....	4
1.4.	Organization of the Dissertation.....	5
Chapter 2	Demand response strategies in power systems: potential application to the management of natural gas infrastructures .....	7
2.1.	Chapter overview.....	7
2.2.	Demand response applications in Europe and the United States to the power system .....	8
2.2.1.	Classification of demand response actions .....	8
2.2.2.	Classification of Demand Response Programs .....	10
2.2.2.1	<i>Operation Programs</i> .....	11
2.2.2.2	<i>Economic Based Programs</i> .....	12
2.2.3.	Demand Response in Europe .....	13
2.2.3.1	<i>Italy</i> .....	15
2.2.3.2	<i>Spain</i> .....	16
2.2.3.3	<i>France</i> .....	17
2.2.3.4	<i>United Kingdom</i> .....	17
2.2.3.5	<i>Germany</i> .....	18

---

2.2.3.6	<i>Belgium</i> .....	19
2.2.3.7	<i>Sweden</i> .....	19
2.2.3.8	<i>Finland</i> .....	19
2.2.3.9	<i>Netherlands</i> .....	20
2.2.3.10	<i>Denmark</i> .....	20
2.2.3.11	<i>Norway</i> .....	20
2.2.4.	Demand Response in the United States.....	21
2.2.4.1	<i>DR Programs Offered by System Operators</i> .....	24
2.2.4.2	<i>DR Programs Offered by Utilities</i> .....	25
2.3.	International experiences of demand response applications to natural gas systems.....	30
2.4.	Analogy between power and natural gas systems.....	32
2.5.	Barriers to the implementation of demand response strategies in the natural gas system.....	34
2.6.	Conclusions of the chapter.....	35
Chapter 3 Smart grid configuration for natural gas systems.....		37
3.1.	Chapter overview.....	37
3.2.	Traditional architecture of the natural gas system.....	38
3.2.1.	The natural gas supply chain.....	38
3.2.2.	The natural gas system in the United States of America.....	40
3.2.2.1	<i>Production sites</i> .....	40
3.2.2.2	<i>Processing plants</i> .....	45
3.2.2.3	<i>Storage sites</i> .....	46
3.2.2.4	<i>Transmission and distribution infrastructure</i> .....	48
3.2.2.5	<i>Analysis of the natural gas consumption</i> .....	53
3.2.3.	The natural gas system in Europe.....	56
3.2.3.1	<i>Natural gas production and proved reserves</i> .....	56
3.2.3.2	<i>Transmission and distribution infrastructure</i> .....	60
3.2.3.3	<i>Analysis of the natural gas consumption</i> .....	65
3.2.4.	The Italian natural gas system.....	68
3.2.4.1	<i>Domestic production</i> .....	69

3.2.4.2	Gas imports.....	71
3.2.4.3	Transmission and distribution infrastructures.....	72
3.2.4.4	Analysis of the natural gas consumption.....	74
3.2.4.5	Energy trading.....	76
3.3.	Constraints in the natural gas system.....	77
3.3.1.	Gas network constraints in the United States of America.....	80
3.3.2.	Gas network constraints in Europe.....	81
3.3.3.	Gas network constraints in Italy.....	84
3.4.	Smart metering and smart cities in the European Union.....	88
3.4.1.	Pilots and examples of applications.....	89
3.4.2.	Massive roll-out of smart gas meters in Europe.....	90
3.4.2.1	Italy.....	92
3.4.2.2	Luxembourg.....	94
3.4.2.3	Ireland.....	94
3.4.2.4	Netherlands.....	94
3.4.2.5	United Kingdom.....	94
3.5.	Architecture of a smart natural gas system.....	95
3.5.1.	Agents in a smart natural gas system.....	96
3.5.1.1	End user.....	98
3.5.1.2	Producer.....	99
3.5.1.3	Gas store operator.....	100
3.5.1.4	Aggregator.....	100
3.5.1.5	Transmitter.....	102
3.5.1.6	Distributor.....	103
3.5.1.7	Retailer.....	104
3.5.1.8	Wholesale traders.....	105
3.5.1.9	Transmission system operator.....	105
3.5.1.10	Distribution network operators.....	106
3.5.1.11	Wholesale market operator.....	107
3.6.	The district heating operator as Demand Response aggregator.....	109
3.6.1.	District heating system in the United States of America.....	110
3.6.2.	District heating systems in Europe.....	113

---

3.6.3.	District heating systems in Italy .....	114
3.6.4.	Cost-benefit assessment of district heating systems .....	116
3.7.	Conclusions of the chapter .....	117
Chapter 4	Metering and communication technology: smart gas meters .....	118
4.1.	Chapter overview.....	118
4.2.	Smart metering system and smart devices.....	119
4.3.	Gas metering: in the beginning.....	120
4.4.	Smart meters: the new challenge of the gas supply system.....	124
4.5.	Measurement technologies .....	125
4.5.1.	Diaphragm smart meters.....	125
4.5.2.	Ultrasonic meters.....	127
4.5.3.	Thermal mass technology.....	129
4.6.	New communication components and remote control device.....	130
4.6.1.	LCD Display and scrolling buttons .....	132
4.6.2.	Optical Port .....	135
4.6.3.	Electro shut-off valve .....	136
4.6.4.	Power supply system.....	137
4.6.5.	Electronic modules and communication devices.....	137
4.7.	Smart grid communication architecture: focus on Italy .....	141
4.7.1.	Data concentrator .....	144
4.7.2.	SAC (Central acquisition systems).....	144
4.8.	Communication and remote control devices for the DR integration .....	145
4.9.	The role of the customers .....	149
4.10.	Conclusions of the chapter .....	153
Chapter 5	Methodology for the application of demand response principles to the natural gas system .....	155

5.1.	Chapter overview.....	155
5.2.	General structure of the methodology .....	156
5.3.	Phase I: Initial specification of actions.....	160
5.3.1.	GSO activities.....	160
5.3.2.	Customer and aggregator activities.....	160
5.4.	Phase II: Technical evaluation.....	162
5.4.1.	Standardization of DR actions .....	162
5.4.2.	Assessment of the technical impact .....	164
5.5.	Phase III: Economic evaluation.....	166
5.5.1.	Costs evaluation on the GSO side.....	166
5.5.2.	Cost evaluation on the customer/aggregator side.....	168
5.5.3.	Cost-benefit balance.....	169
5.6.	Phase IV: Environmental evaluation .....	171
5.7.	Phase V: Validation .....	172
5.8.	Phase VI: Final specification of DR products .....	173
5.9.	Conclusions of the chapter .....	174
Chapter 6	Case of application: DR evaluation in the Italian natural gas system.....	175
6.1.	Chapter overview.....	175
6.2.	Considered scenarios: DR strategies and case description .....	175
6.2.1.	Period of analysis and characterization of the natural gas balancing service.....	176
6.2.2.	Description of consumers .....	178
6.2.2.1	Location and size .....	178
6.2.2.2	Classification of consumers .....	179
6.2.2.3	Monthly gas consumptions per category.....	180
6.3.	Technical evaluation.....	183
6.3.1.	Evaluation of the flexibility potential .....	183

6.3.2.	Evaluation of customer’s participation in gas balancing services .....	184
6.4.	Economic evaluation .....	188
6.4.1.	Costs for consumers .....	188
6.4.2.	Cost-benefit analysis .....	189
6.4.3.	Sensitivity analysis .....	192
6.5.	Extrapolation of results.....	195
6.6.	Conclusions of the chapter .....	198
Chapter 7	Conclusions.....	199
7.1.	Conclusions of the dissertation.....	199
7.1.1.	Identification of electricity and natural gas analogies for DR applications .....	199
7.1.2.	Identification of promising DR potential applicable to the natural gas system.....	200
7.1.3.	Enhancement of the smart grid architecture in the natural gas system for DR utilization .....	200
7.1.4.	Development of a methodology for the specification of DR products in the natural gas system.....	201
7.1.5.	Application of the methodology: Evaluation and assessment of DR applications in the Italian natural gas system .....	201
7.2.	Future developments .....	202
7.3.	Publications .....	203
