<b>Aims, structure and contributions of this thesis</b>	<b>2</b>
---	----------

---

<b>I Introduction</b>	<b>11</b>
-----------------------	-----------

---

<b>1 Uses of metabolic modelling and aims of its simulations</b>	<b>13</b>
1.1 Chapter abstract . . . . .	13
1.2 Metabolic modelling in systems biology . . . . .	14
1.2.1 Constraint-based metabolic modelling . . . . .	16
1.2.2 Simulating constraint-based metabolic models . . . . .	26
1.2.3 Software tools for constraint-based metabolic modelling	35
1.3 Metabolic modelling of cyanobacteria . . . . .	37
<b>2 Fundamentals on multi-objective optimisation procedures</b>	<b>43</b>
2.1 Chapter abstract . . . . .	43
2.2 Background on multi-objective optimisation . . . . .	44
2.3 Stages of multi-objective optimisation procedures . . . . .	48
2.3.1 Multi-objective problem definition . . . . .	50
2.3.2 Multi-objective optimisation process . . . . .	51
2.3.3 Multi-Criteria Decision-Making . . . . .	54
2.4 Tools for multi-objective optimisation procedures . . . . .	55
2.4.1 sp-MODE algorithm . . . . .	56

---

2.4.2	Level Diagrams tool . . . . .	63
-------	-------------------------------	----

---

<b>II</b>	<b>Works on metabolic modelling of cyanobacteria</b>	<b>67</b>
-----------	--	-----------

---

<b>3</b>	<b>Metabolic networks of model cyanobacteria</b>	<b>69</b>
3.1	Chapter abstract . . . . .	69
3.2	Introduction . . . . .	70
3.3	<i>iSyn842</i> : updated metabolic network of <i>Synechocystis</i> sp. PCC 6803 . . . . .	73
3.3.1	Previous version: <i>iSyn811</i> . . . . .	73
3.3.2	Update process . . . . .	73
3.3.3	Resulting <i>iSyn842</i> network . . . . .	78
3.4	<i>iSyf715</i> : first metabolic network assembled for <i>Synechococcus elongatus</i> PCC 7942 . . . . .	80
3.4.1	Assembly process . . . . .	80
3.4.2	Resulting <i>iSyf715</i> network . . . . .	81
3.5	<i>Synechocystis</i> ' vs. <i>Synechococcus</i> ' metabolic networks comparison	83
<b>4</b>	<b>Flux Balance Analysis on cyanobacteria metabolic models</b>	<b>89</b>
4.1	Chapter abstract . . . . .	89
4.2	Introduction . . . . .	90
4.3	Materials and Methods . . . . .	93
4.3.1	Flux Balance Analysis . . . . .	93
4.3.2	Metabolic models and simulation conditions . . . . .	94
4.3.3	Essential reactions . . . . .	96
4.3.4	Comparison of flux landscapes . . . . .	97
4.4	Flux Balance Analysis applied to <i>Synechocystis</i> ' and <i>Synechococcus</i> ' metabolic models . . . . .	97
4.4.1	Essential reactions in <i>Synechocystis</i> ' and <i>Synechococcus</i> ' metabolic models . . . . .	97
4.4.2	Comparison of flux landscapes of <i>Synechocystis</i> and <i>Synechococcus</i> . . . . .	100
4.4.3	Testing physiological perturbed conditions in <i>Synechocystis</i> sp. PCC 6803 . . . . .	103
4.5	Development of software tools for FBA simulations . . . . .	109
4.6	Conclusions of this chapter . . . . .	114

<b>III Metabolic modelling by means of multi-objective optimisation techniques</b>	<b>117</b>
<hr/>	
<b>5 Meta-MODE: a multi-objective evolutionary algorithm for constraint-based flux simulations</b>	<b>119</b>
5.1 Chapter abstract . . . . .	119
5.2 Introduction . . . . .	120
5.3 Multi-objective metabolic flux analysis . . . . .	124
5.3.1 Addressing special features of flux simulations . . . . .	125
5.4 Multi-Objective Problem (MOP) definition for metabolic flux simulation . . . . .	130
5.4.1 Definition of metabolic constraints . . . . .	132
5.4.2 Definition of metabolic objectives . . . . .	137
5.5 Multi-objective optimisation process: the Meta-MODE algorithm	142
5.5.1 Mechanisms to improve metabolic pertinency . . . . .	144
5.5.2 Handling constraints . . . . .	146
5.5.3 Initial population . . . . .	151
5.5.4 Evaluation of the population . . . . .	160
5.5.5 Algorithm proposed for multi-objective metabolism optimization: Meta-MODE . . . . .	160
5.6 Conclusions of this chapter . . . . .	164
<b>6 Multi-objective optimisation procedure applied to metabolic simulations of <i>Synechocystis</i> sp. PCC 6803</b>	<b>165</b>
6.1 Chapter abstract . . . . .	165
6.2 Introduction . . . . .	166
6.3 Materials and Methods . . . . .	168
6.3.1 Metabolic model and simulation conditions . . . . .	168
6.3.2 Optimisation statements . . . . .	171
6.3.3 Solution visualisation and selection (MCDM stage) . . . . .	182
6.3.4 Convergence and stochastic behaviour . . . . .	185
6.4 Results and discussion . . . . .	187
6.4.1 Pareto front approximations obtained with Multi-Objective (MO) optimisation algorithm . . . . .	187
6.4.2 Trade-off between objectives . . . . .	193
6.4.3 Comparison between mono and multi-objective optimisation approaches . . . . .	203
6.4.4 Different trophic conditions exhibit different behaviour in simulation results . . . . .	212
6.5 Conclusions . . . . .	214
