

TABLE OF CONTENTS

1	PREAMBLE	11
2	OBJECTIVES	5
3	GENERAL CONSIDERATIONS	9
3.1	Amorphous and mesoporous silica-based materials, a background ..	11
3.2	Mesoporous silica particles (MSPs)	13
	Synthesis of the MSPs.....	14
	Modification of MSPs surface.....	16
4	SECTION I: <i>BIOACTIVE PROPERTIES FROM ESSENTIAL OILS</i> <i>COMPONENTS ENCAPSULATED IN MESOPOROUS SILICA SUPPORTS</i> ..	31
4.1	Bioactive components derived from essential oils	33
	Antimicrobial and antifungal activity.....	34
	Antioxidant and Anti-inflammation activity.....	35
	Anticancer evidences	36
4.2	Gastrointestinal studies with EOCs	37
	Allyl isothiocyanate (AI)	38
	Cinnamaldehyde (CN)	38
	Eugenol (EU).....	38
	Diallyl disulphide (DA).....	39

Carvacrol (CV)	39
Thymol (TY).....	40
Legal aspects	40
Safety data.....	41
Organoleptic aspects.....	42
4.3 Evaluation of essential oil components encapsulated into mesoporous silica particles as natural-derived agents against colon cancer cells	46
4.4 Study of capped mesoporous silica supports as masking garlic odour systems	81
4.5 Polymer composites containing gated mesoporous materials for on-command controlled release.....	119
5 SECTION II: NANOTOXICOLOGICAL EVALUATION OF MESOPOROUS SILICA SUPPORTS	152
5.1 Some concerns about gastrointestinal tract (GIT) and oral intake pathways.....	154
Potential interaction between GIT and MSPs	157
5.2 Introduction to MSPs toxicity	158
MSPs toxicity: <i>In vitro</i> studies	159
MSPs toxicity: <i>In vivo</i> studies	166

5.3	Effect of capped mesoporous silica particles on colon cells viability	177
5.4	<i>A. C. elegans</i> <i>in vivo</i> nanotoxicology evaluation of bare and functionalised micro and nano mesoporous silica particles	205
6	GENERAL DISCUSSION	241
7	CONCLUSIONS AND PERSPECTIVES	249
8	APPENDICES.....	253
