DUALIS

The artwork is a vertical composition. On the left, a dark, almost black figure with large, feathered wings is depicted. The wings are detailed with blue and white highlights, suggesting a celestial or night creature. The figure's body is dark and textured. On the right, a more ethereal, glowing figure is shown. This figure has long, flowing hair and is rendered in shades of light blue and cyan. The figure's form is more fluid and less defined, appearing to be made of light or energy. The background is a mix of deep blue and purple, with numerous small white and blue specks resembling stars or distant galaxies. There are also larger, abstract brushstrokes and patterns in blue and white, creating a sense of movement and depth. The overall mood is mysterious and otherworldly.
