

Index

1. Introduction	1
1.1. Socio-economic importance of tomato	3
1.2. Tomato fruit quality	4
1.2.1. Visual quality	4
1.2.2. Organoleptic quality	6
1.2.3. Nutritional and functional quality	9
1.3. Challenges for tomato cultivation in arid and semi-arid areas	12
1.3.1. Abiotic constraints in tomato cultivation	12
1.3.2. Biotic constraints in tomato cultivation	14
1.3.3. Fertilization challenges in tomato cultivation	16
1.4. Strategies for enhancing the sustainability of tomato cultivation	17
1.4.1. Irrigation and fertilisation strategies	18
1.4.2. Pest and disease control	19
1.5. The role of traditional tomato varieties in sustainable agriculture	20
1.5.1. Origin, genetic erosion and revalorization	21
1.5.2. Potential of traditional tomato varieties	24
1.5.2.1. Organoleptic and functional quality	25
1.5.2.2. Adaptation to limiting cultivation conditions	25
1.5.2.3. Sociocultural value	26
1.5.3. Limitations of traditional varieties	26
2. Thesis objectives	29
3. Chapter I	33
Characterization and phenotypic evaluation of fruit quality traits related to functional and organoleptic quality of Spanish tomato landraces	33
Abstract	34
3.1. Introduction	35
3.2. Materials and methods	36
3.2.1. Materials	36
3.2.2. Methods	37
3.3. Results	38
3.4. Discussion	44
3.5. Conclusions	46
3.6. References	47

4. Chapter II.....	51
Fruit agronomic and quality traits of tomato F ₁ hybrids derived from traditional varieties	51
Abstract	52
4.1. Introduction	53
4.2. Materials and methods.....	55
4.2.1. Cultivation conditions and plant material	55
4.2.2. Agronomic and phenotypic evaluation.....	55
4.2.3. Analysis of fruit quality and nutritional value traits.....	56
4.2.4. Determination of soluble sugars.....	56
4.2.5. Determination of carotenoids and chlorophylls	56
4.2.6. Determination of vitamin C.....	56
4.2.7. Determination of phenolic compounds	57
4.2.8. Statistical analysis	57
4.3. Results	57
4.3.1. Description of agronomic, physical, organoleptic, and bioactive traits in parental lines and hybrids.....	59
4.3.1.1. Agronomic and Physical Traits.....	61
4.3.1.2. Organoleptic and bioactive traits	63
4.3.2. Correlation between agronomic, physical, organoleptic, and bioactive traits and similarities between hybrids.....	65
4.4. Discussion	69
4.5. Conclusions	73
4.6. References	74
4.7. Supplementary material.....	79
5. Chapter III	85
Effect of <i>Tm-2a</i> , <i>Sw-5</i> and <i>Ty-1</i> gene introduction on the agronomic performance and metabolic profile of traditional Muchamiel-type tomato varieties.....	85
Abstract	86
5.1. Introduction	87
5.2. Materials and methods.....	89
5.2.1. Plant materials	89
5.2.2. Experimental design and crop conditions	90
5.2.3. Agronomic and fruit morphology evaluation.....	91
5.2.4. Metabolite analysis.....	91
5.2.5. Statistical analysis	93
5.3. Results	93

5.3.1. Yield and fruit characterization.....	93
5.3.2. Primary metabolites.....	96
5.3.2.1. Soluble sugars	96
5.3.2.2. Organic acids.....	97
5.3.3. Secondary metabolites.....	99
5.3.3.1. Vitamin C.....	99
5.3.3.2. Carotenoids	100
5.3.3.3. Phenolic Compounds	103
5.4. Discussion	106
5.5. Conclusions	110
5.6. References	111
5.7. Supplementary material.....	116
6. Chapter IV	121
Agronomic performance and characteristics of traditional tomato varieties grown with low input conditions	121
Abstract	122
6.1. Introduction	123
6.2. Materials and methods.....	125
6.2.1. Plant material.....	125
6.2.2. Experimental design and growth conditions	126
6.2.3. Sensory analysis	127
6.2.4. Agronomic and fruit morphology evaluation.....	128
6.2.5. Metabolite analysis.....	129
6.2.6. Statistical analysis	130
6.3. Results and discussion.....	130
6.3.1. General description of the cultivars.....	130
6.3.2. Effect of the treatments	133
6.3.2.1. Agronomic response.....	133
6.3.2.2. Fruit morphology and composition.....	137
6.3.2.3. Fruit metabolites	140
6.4. References	147
6.5. Supplementary material.....	152
7. General discussion.....	155
8. Thesis conclusions.....	165
9. General references	169
