Nomenclature	XIII
Contents	XXIII
List of figures	XXXI
List of tables	XXXIV
1 Introduction 1	
1.1 Motivation	2
1.1.1 Hyperloop concept	4
1.2 Background	5
1.2.1 Pod design considerations	6
1.2.2 Studies of pod-driven flow and waves inside the duct . .	7
1.2.3 Compressor in Hyperloop	8
1.2.4 In-house previous experience about hyperloop-related flow phenomena	10
1.3 Objectives	11
1.4 Approaches to Hyperloop research	12
1.4.1 3D-CFD simulations	12
1.4.2 2D-CFD simulations	13
1.4.3 Low order models CFD	13
1.4.4 Extrapolation and interpolation models	13
1.5 Document structure	14
Chapter 1 references	23
2 Simplifying the CFD model of a single pod inside a tube	25
2.1 Introduction	26
2.2 Methodology	27
2.2.1 Common setup features for all cases	27
2.2.2 Overset model	29
2.2.3 Reduced model	30
2.2.4 Spatial discretization	36
2.2.5 Sensitivity studies	37
2.3 Results and discussion	39

2.3.1 Closed piston verification	39
2.3.2 Transient mission: overset vs reduced domain	44
2.3.3 Developing an equivalent steady method	47
2.3.4 Error discussion	57
2.4 Modified Kantrowitz Limit model	59
2.4.1 Model development	59
2.4.2 Analysis of the results	63
2.5 Conclusions	66
Chapter 2 references	73

3 Wave dynamics 75

3.1 Introduction	75
3.2 Numerical approach	77
3.2.1 Overview	77
3.2.2 2D model	77
3.2.3 Duct model: Godunov method implementation	79
3.2.4 Pod model in VeMOD	80
3.2.5 Cases and identification	82
3.3 Results: Sensitivity studies	83
3.4 Discussion of results	86
3.4.1 Wave propagation analysis	86
3.4.2 1D model validation: comparison with CFD results	88
3.4.3 Discussion of the computational cost	92
3.5 Conclusions	93
Chapter 3 references	95

4 Compressor: Mixer optimization 97

4.1 Introduction	98
4.2 System description and optimization approach	99
4.3 Numerical configuration	102
4.3.1 Meshing strategy	102

4.3.2 Physical models	104
4.3.3 Boundary Conditions	106
4.3.4 Sensibility mesh study	107
4.4 Optimization process	108
4.4.1 Initial 2D geometry	109
4.4.2 2D optimization stage	110
4.4.3 3D optimization stage	115
4.5 Results and discussion	119
4.5.1 2D optimization	119
4.5.2 3D optimization	122
4.5.3 Coupling compressor and mixer	126
4.6 Conclusions	128
4.7 Appendix A	129
Chapter 4 references	136

5 Compressor performance at low pressure conditions 137

5.1 Introduction	137
5.2 Numerical configuration	140
5.2.1 Geometrical domain and boundary conditions	140
5.2.2 Physic models and turbulent treatment	141
5.2.3 Mesh configuration	142
5.3 Results and discussion	146
5.3.1 Characteristic lines	146
5.3.2 Flow patterns	150
5.4 Conclusions	160
Chapter 5 references	166

6 Characterizing a compressor map with few input points 167

6.1 Introduction	168
6.2 Study description and dataset	170
6.3 Pressure ratio: methodology and algorithm	171

6.3.1 CFD measuring points & Extrapolation	173
6.3.2 Interpolation of the measured iso-speed lines.	174
6.3.3 Interpolation of the rest of iso-speed lines	178
6.4 Efficiency: methodology and algorithm	178
6.4.1 First exploration of techniques	178
6.4.2 Multifidelity approach	179
6.5 Results and discussion	184
6.5.1 Results exhibition procedure	184
6.5.2 Pressure Ratio evaluation	185
6.5.3 Efficiency evaluation	191
6.5.4 Implementation in an axial compressor: hyperloop propulsive system	197
6.6 Conclusions	199
Chapter 6 references	206

7 Analysis of the propulsive discharge nozzle in a hyperloop system 207

7.1 Introduction	208
7.2 Available test rig	209
7.3 Cases and Numerical Configuration	210
7.3.1 Domain definition	210
7.3.2 Numerical campaign	212
7.3.3 Spatial discretization	214
7.3.4 Numerical configuration	216
7.4 Sensitivity to front pod conditions	216
7.4.1 Compressor model: temperature of the primary flow . .	216
7.4.2 Impact of the front geometry model on induced velocity	217
7.5 Development of adaption for an experimental campaign by means of CFD	221
7.5.1 Reynolds number identification	221
7.5.2 Impact of neglecting external wall relative velocity . .	224

7.5.3 Adaption of the external duct geometry	227
7.5.4 Postprocessing corrections: pressure drop	229
7.6 Robustness of the proposed solution	235
7.7 Conclusions	238
Chapter 7 references	243
 8 Conclusions and future works	245
8.1 Introduction	245
8.2 Novelty of the work	245
8.2.1 Main contributions	246
8.3 Main limitations	249
8.4 Future works	250
 Thesis Global Bibliography	282
