Industrialized Construction in Conventional Firms: Technical and Organizational Reconfigurations in Decentralized Networks

Alejandro Vásquez-Hernández

Thesis submitted to the Office of Graduate Studies in partial fulfillment of the requirements for the degree of Doctor in Engineering Sciences and Doctor in Transportation Infrastructures and Territory.

Advisors:

Professor Luis Fernando Alarcón, PhD.
Professor Eugenio Pellicer, PhD.

Santiago, Chile. September, 2025
@2025, Alejandro Vásquez-Hernández

Abstract	9
Resumen	10
Resum	11
Introduction	12
1.1 Background	15
1.2 Research context.....	20
1.3 Thesis Contributions.....	25
1.4 Dissertation outline.....	26
1.5 List of Papers.....	27
1.6 Other Publications	27
Chapter 2. Construction Industrialization: A Mosaic of Definitions	29
2.1 Introduction	29
2.2 Construction industrialization background.....	32
2.3 Research method	34
2.4 Findings and analysis	39
2.5 Discussion	53
2.6 Conclusions	58
Chapter 3. Typologies of Industrialized Construction Adoption	61
3.1 Introduction	61
3.2 Theoretical framework	62
3.3 Research method	65
3.4 Findings	68
3.5 Conclusions	80
Chapter 4. Breaking the Mirror: How Conventional Construction Companies Embrace IC	82
4.1 Introduction	82
4.2 Theoretical framework	83
4.3 Research method	85
4.4 Findings	88
4.5 Conclusions	104

Chapter 5. Overall discussion of results	105
5.1 Conceptual domain: clarification and structuring of the IC field	105
5.2 Technical domain: typologies of IC adoption in CCFs	107
5.3 Organizational domain: emerging configurations	108
5.4 Technical–Organizational correspondence domain	110
Chapter 6. Conclusions	112
6.1 Overall conclusion.....	112
6.2 Answers to the research questions.....	113
6.3 Contributions of the dissertation	114
6.4 Study limitations.....	116
6.5 Future research	117
Chapter 7. Conclusiones.....	119
7.1 Conclusión general	119
7.2 Respuestas a las preguntas de investigación (PI)	120
7.3 Contribuciones de la tesis.....	121
7.4 Limitaciones del estudio.....	123
7.5 Líneas futuras de investigación	125
References	127
Appendices	149
Appendix A. Supplementary Material for Chapter 3	149
A.1 Variable scaling and empirical firm characterization.....	149
A.2. R-Studio analytical procedures.....	150
Appendix B. Supplementary Material for Chapter 4	165
B.1 Variable scaling and empirical firm characterization.....	165
Appendix C. Semi-Structured Interview Protocol	167
Semi-Structured Interview Guide.....	167
Appendix D. Ethical Approval Letters	170

List of tables

Table 1. Research gaps, questions, objectives, and analytical domains	22
Table 2. CI terms and their definitions.	42
Table 3. CI categories.....	43
Table 4. Prefabrication	44
Table 5. Techniques and technologies	45
Table 6. Product characteristics.....	46
Table 7. Process characteristics.....	47
Table 8. CI management.....	48
Table 9. Prevalence of CI conceptual approaches between 2017 and 2023	58
Table 10. Selected cases and data collection activities – Phase 1	66
Table 11. Selected cases and data collection activities – Phase 2	67
Table 12. System/Component perspective categories	69
Table 13. Categories of impact on the main production line.....	70
Table 14. Design coordination categories	71
Table 15. Empirical firm characterization.....	75
Table 16. Selected cases and data collection activities – Phase 1	86
Table 17. Selected cases and data collection activities – Phase 2	87
Table 18. Observed configurations.....	90
Table 19. Observed configurations.....	93
Table 20. List of the empirical CCF characterization.....	95
Table A-1. Original variables scaling.....	149
Table A-2. Empirical firm characterization.....	149
Table B-1. Original variables scaling.....	165
Table B-2. Empirical firm characterization.....	165

List of figures

Figure 1. Schematic illustration of the research design.....	24
Figure 2. Research approach and structure of the paper.....	35
Figure 3. Information collection record. PRISMA flowchart.....	37
Figure 4. CI terms and their use over time.	40
Figure 5. Geographical context of the CI terms.	41
Figure 6. Dendrogram	49
Figure 7. Terms distribution by cluster.....	53
Figure 8. Distribution of terms by cluster	57
Figure 9. Theoretical frame of reference.....	63
Figure 10. Research design	65
Figure 11. Analytical framework for characterizing the construction production system.....	68
Figure 12. Production process characterization	69
Figure 13. Engineering dimension of CODP.....	73
Figure 14. Loadings of the most significant PCs.	76
Figure 15. Biplot of the first two principal components (PC1 and PC2).	77
Figure 16. Theoretical frame of reference.....	83
Figure 17. Illustration of the research design workflow.....	85
Figure 18. Analytical framework used in this study.	89
Figure 19. Integration dimension.	91
Figure 20. Analytical attributes of the integration dimensions.....	91
Figure 21. Resulting technical typology of IC adoption for the CCFs.....	96
Figure 22. Radar chart of the organizational dimensions (Os1–Os8) by technical type.	97
Figure 23. Technical-organizational correspondence in CCFs.....	102
