Abstract	5
Resumen	6
Resum	7
Résumé	8
INSTITUTIONAL ACKNOWLEDGMENTS	9
ACKNOWLEDGMENTS.....	9
Chapter-I. Introduction	17
I-1 Chemistry and Society	20
I-2 Green Chemistry	21
I-3 Catalysis and Catalytic Processes	22
<i>I-3-a) Definition.....</i>	22
<i>I-3-b) Catalyst nature</i>	23
<i>I-3-c) Activation process mode.....</i>	25
<i>I-3-d) Palladium-based catalyst</i>	27
I-4 Nanotechnology.....	31
<i>I-4-a) Definition.....</i>	31
<i>I-4-b) Metal Nanoparticles.....</i>	31
<i>I-4-c) Metal nanoparticle properties in catalysis.....</i>	34
<i>I-4-d) Toxicity⁹⁴.....</i>	38
I-5 Supported metal nanoparticle-based catalysts	39
<i>I-5-a) Context.....</i>	39
<i>I-5-b) immobilization process.....</i>	40
<i>I-5-c) Types of support for immobilization processes</i>	41
I-6 References	46
Chapter-II. Objectives	55
Chapter-III. Methodology	57
III-1 General information.....	60
III-2 Catalysts preparation	61
<i>III-2-a) Preparation of Palladium Complex / Pd-H₄L.....</i>	63

<i>III-2-b) Preparation of PdM-MOFs (M= In, Co or Mn)</i>	64
<i>III-2-c) Thermal treatment: Preparation of PdM-T (M= In, Co or Mn)</i>	64
<i>III-2-d) Chemical treatment: Preparation of PdM-Q (M= In, Co or Mn)</i>	64
<i>III-2-e) Chemical-thermal treatment: Preparation of PdM-QT (M= In, Co or Mn)</i>	65
<i>III-2-f) Chemical treatment: Preparation of PdIn-QT(property) (M= In)</i>	65
III-3 Catalyst characterization	66
<i>III-3-a) Elemental analysis (E.A.)</i>	66
<i>III-3-b) Inductively coupled plasma spectrometry (ICP)</i>	66
<i>III-3-c) Thermogravimetric analysis (TGA)</i>	66
<i>III-3-d) Powder X-ray Diffraction (XRD)</i>	66
<i>III-3-e) Gas Adsorption Measurements</i>	67
<i>III-3-f) TEM-STEM characterization</i>	67
<i>III-3-g) Field Emission Scanning Electron Microscopy (FESEM)</i>	69
<i>III-3-h) Raman Spectroscopy</i>	69
<i>III-3-i) X-ray photoelectron spectroscopy (XPS)</i>	69
<i>III-3-j) X-ray absorption spectroscopy</i>	70
<i>III-3-k) Diffuse Reflectance Infrared Fourier Transform spectroscopy (DRIFTS)</i>	71
<i>III-3-l) Liquid and Solid-state MAS-NMR spectroscopy</i>	71
III-4 Catalytic test and stability	72
<i>III-4-a) Water splitting electrocatalysis</i>	72
<i>III-4-b) Terminal alkyne semi-hydrogenation</i>	73
<i>III-4-c) From phenylacetylene towards cyclic carbonate</i>	75
III-5 References	76
 Chapter-IV. From Metal-Organic Frameworks to N-doped Carbon supported Nanoparticles	77
IV-1 Introduction	80
IV-2 Results and Discussion – PdIn	84
<i>IV-2-a) Characterization of the catalyst precursor: PdIn-MOF</i>	84
<i>IV-2-b) Characterization of the catalysts (PdIn-T vs PdIn-Q vs PdIn-QT)</i>	85
<i>IV-2-c) Step-by-step understanding of PdIn-MOF transformation</i>	101
<i>IV-2-d) Extending the chemical-thermal treatment (QT) of PdIn-MOF</i>	114
IV-3 Results and Discussion – PdCo, PdMn	131
<i>IV-3-a) Characterization of the catalyst precursors PdCo-MOF and PdMn-MOF</i>	131
<i>IV-3-b) Catalyst characterization</i>	134
<i>IV-3-c) Step by step understanding PdCo-MOF and PdMn-MOF transformation</i>	150
IV-4 Conclusions	155
IV-5 References	157
IV-6 Appendix	162
<i>IV-6-a) PdIn derived materials</i>	162
<i>IV-6-b) PdIn derived materials- synthetic insights characterizations</i>	166
<i>IV-6-c) PdCo-PdMn EXAFS fitting data</i>	167
<i>IV-6-d) PdCo-PdMn additional XPS data</i>	169

<i>IV-6-e) Pd-H₄L-QT monometallic reference</i>	170
Chapter-V. PdIn, PdCo and PdMn catalysts for selective hydrogenation process	173
V-1 Introduction	176
V-2 Results and Discussion (PdIn-T vs PdIn-QT)	177
<i>V-2-a) PdIn catalytic activity</i>	177
<i>V-2-b) PdIn catalytic stability</i>	185
<i>V-2-c) catalytic activity of PdIn-QT materials from the chemical treatment study (chapter IV)</i> 187	
V-3 Results and Discussion (PdCo vs PdMn)	189
<i>V-3-a) PdCo – PdMn catalytic activity</i>	189
<i>V-3-b) PdCo – PdMn catalytic stability</i>	192
<i>V-3-c) Process intensification of PdCo-QT and PdMn-QT materials</i>	205
<i>V-3-d) Multifunctional behavior of PdCo-QT</i>	207
V-4 Conclusions	209
V-5 References	211
V-6 Appendix	215
<i>V-6-a) Catalytic activity of PdIn-QT materials</i>	215
<i>V-6-b) Catalytic stability of PdIn-QT material</i>	217
<i>V-6-c) Catalytic stability of PdMn-Q and QT, PdCo-Q and QT materials</i>	221
 Chapter-VI. MOF-based PdM Bimetallic Nanoparticles as Bifunctional Electrocatalysts for Efficient overall water Splitting	223
VI-1 Introduction	226
VI-2 Results and Discussion	228
<i>VI-2-a) Preparation and Characterization of PdM-QT based electrodes</i>	228
<i>VI-2-b) Electrochemical characterization of PdM-QT based electrodes</i>	230
<i>VI-2-c) Structural Stability of the Activated PdM-QT-based Electrodes</i>	236
VI-3 Conclusions	248
VI-4 References	249
VI-5-Appendix	253
 Chapter-VII. General Conclusions Publications	257
Figures/Schemes Index	263
Tables Index	275
