

Table of contents

List of Figures	xvii
List of Tables	xxiii
Acronyms	xxv
1 Introduction	1
1.1 Objectives and structure of the thesis	9
2 Quasi-TEM waveguides based on soft/hard surfaces: SHWWs	13
2.1 Introduction	13
2.2 Propagation properties	16
2.2.1 Physical theory	16
2.2.2 Numerical analysis	20
2.2.3 Waveguide characterization	23
2.3 Practical realization and experimental results	28
3 Analysis of corrugated surfaces	33
3.1 Introduction	33
3.2 MoM analysis based on the AIE	35
3.2.1 Computation of internal admittances y_{ij}^b in L- and T-shaped corrugations	38
3.2.2 Computation of internal admittances y_{ij}^b in U-shaped corrugations	39
3.3 Software validity demonstration	40
4 MoM analysis of SHWWs using the AIE	45
4.1 Introduction	45
4.2 MoM analysis based on the AIE	46
4.3 Numerical results	47
4.3.1 Wave propagation	48

TABLE OF CONTENTS

4.3.2	Slot resonance length	50
4.3.3	Linear slot array	51
4.4	Improvements for the AIE approach	53
4.5	Study of slot mutual coupling	54
5	Slot arrays on SHWWs	57
5.1	Introduction	57
5.2	Experimental demonstration of slot arrays on SHWWs	57
5.3	Circularly polarized 1-D array	61
5.3.1	First design	62
5.3.2	Optimization process	68
5.4	Circularly polarized 2-D array	75
6	Quasi-TEM waveguides based on AMC surfaces: RGWs	79
6.1	Introduction	79
6.2	Structure and operation	82
6.3	Analysis	84
6.3.1	Ideal gap waveguide	86
6.3.2	Ridge gap waveguide in bed of nails	87
6.4	Characteristic impedance	89
6.4.1	Approximate formulas	89
6.4.2	Numerical approaches	90
6.4.3	Results	92
6.5	Microwave circuits	94
6.5.1	Power divider	95
6.5.2	Couplers	96
7	Conclusions	99
A	Modal propagation in ideal SHWWs	101
A.1	Field expressions	101
A.2	Propagation in hard direction	103
A.3	Propagation in soft direction	105
A.4	Propagation in arbitrary direction	107
	References	111
