
Contents

1	Background	43
1.1	The nitrogen cycle	44
1.1.1	The global nitrogen cycle	44
1.1.2	Nitrogen processes in marine waters	45
1.1.3	Nitrogen in coastal waters	50
1.2	Anthropogenic pressures on the N cycle in coastal waters	52
1.2.1	Food production	52
1.2.2	Energy	54
1.2.3	Urban development	54
1.2.4	Climate change	55
1.3	Impacts of the alteration of the N processes in coastal waters	57
1.3.1	Eutrophication and biodiversity loss	57
1.3.2	Climate change	59
1.3.3	Human health	60

CONTENTS

CONTENTS

1.4	The Mediterranean Sea	61
1.4.1	Overall description	61
1.4.2	Nitrogen pollution in the Mediterranean Sea	62
1.4.3	Legal framework and management	63
1.4.4	The Jucar River Basin District	66
1.5	The Gulf of Mexico	72
1.5.1	Overall description	72
1.5.2	Nitrogen pollution in the Gulf of Mexico	75
1.5.3	Legal framework and management	76
1.5.4	The Central Gulf Hydrological Region	77
2	The research project	83
2.1	Problem statement	84
2.2	Aims of the research project	85
2.3	Research hypothesis	86
2.4	Thesis structure	86
2.5	Significance of the research	88
2.6	Methodological framework	88
3	Anthropogenic impact on nitrification dynamics in coastal waters of the Mediterranean Sea	91
3.1	Abstract	92
3.2	Introduction	92
3.3	Materials and Methods	95

3.3.1	Study area	95
3.3.2	Workflow	97
3.3.3	Model formulation	98
3.3.4	Model calibration and validation	101
3.3.5	Parameter variation analysis	102
3.4	Results	103
3.4.1	Variable values	103
3.4.2	Model results	104
3.4.3	Analysis of spatial parameter variations	106
3.5	Discussion	109
3.6	Conclusion	111
4	Future trends of dissolved inorganic nitrogen concentrations in Mediterranean coastal waters under climate change	113
4.1	Abstract	114
4.2	Introduction	114
4.3	Materials and Methods	118
4.3.1	Study area	118
4.3.2	Data pre-analysis	120
4.3.3	Artificial neural networks	120
4.3.4	Climate change scenarios	123
4.4	Results	125
4.4.1	Monitoring data	125
4.4.2	ANN model	126

4.4.3	Water temperature and salinity models	128
4.4.4	The effect of climate change on DIN concentrations	131
4.5	Discussion	134
4.6	Conclusion	138
5	Using grey clustering to evaluate nitrogen pollution in estuaries with limited data	141
5.1	Abstract	142
5.2	Introduction	143
5.3	Materials and Methods	145
5.3.1	Study area	147
5.3.2	Spatiotemporal criteria for Grey Nitrogen Management Priority (GNMP) index	149
5.3.3	Pressure criteria for the Grey Land Use Pressure (GLUP) index	151
5.3.4	Grey clustering	153
5.3.5	Entropy weighting method	156
5.4	Results	157
5.4.1	Total nitrogen concentrations	157
5.4.2	Grey Nitrogen Management Priority (GNMP) index	158
5.4.3	Grey Land Use Pressure (GLUP) index	159
5.5	Discussion	162
5.6	Conclusion	168
6	A spatiotemporal analysis of nitrogen pollution in a coastal region with mangroves of the Southern Gulf of Mexico	171

CONTENTS

6.1	Abstract	172
6.2	Introduction	172
6.3	Materials and Methods	176
6.3.1	Study Area	176
6.3.2	Data analysis	178
6.4	Results	180
6.4.1	Spatial variations	180
6.4.2	Temporal variations	181
6.5	Discussion	183
6.6	Conclusions	191
7	Final Discussion	193
7.1	Anthropogenic land uses which modify nitrogen dynamics in coastal waters	194
7.1.1	Urban development	194
7.1.2	Agriculture and livestock	195
7.2	The alteration of the nitrogen processes in coastal waters by climate change	195
7.2.1	Temperature	195
7.2.2	Rainfall and river runoff	197
7.2.3	Overall impact of climate change	198
7.3	Aspects of the N cycle altered by anthropogenic pressures	199
7.3.1	Modification of the biogeochemical processes	199
7.3.2	Changes in interannual variations	200

CONTENTS

CONTENTS

7.3.3	Destruction of coastal ecosystems	201
7.4	Differences between the two case studies	202
7.4.1	Geomorphological and ecological differences	202
7.4.2	Socio-economic differences	203
7.5	New tools to evaluate the anthropogenic alteration of the N cycle in coastal waters	204
7.5.1	Biogeochemical model	204
7.5.2	Artificial neural networks	205
7.5.3	Grey systems theory	205
7.6	Tying results to the big picture	206
7.7	Limitations of the research	207
7.8	Future research	208
7.9	Final conclusions	208
