

TABLE OF CONTENTS

Abstract	i
Resumen	iii
Resum	v
1. INTRODUCTION	1
1.1 DISCOVERY AND ROLE OF ABA IN PLANT PHYSIOLOGY.	1
1.1.1. THE ROLE OF ABA IN ABIOTIC STRESS	1
1.1.2. THE ROLE OF ABA IN BIOTIC STRESS	9
1.1.3. THE ROLE OF ABA IN PLANT GROWTH AND DEVELOPMENT	9
1.2 CORE ELEMENTS OF THE ABA SIGNALING PATHWAY.	11
1.2.1 PROTEIN SERINE/ THREONINE PHOSPHATASES 2C (PP2C)	14
1.2.2 ABA RECEPTORS IDENTIFIED UP TO NOW	21
1.2.3 SNF1-RELATED PROTEIN KINASES 2 (SNRK2s)	26
1.3 MECHANISM OF ACTION OF THE ABSCISIC ACID AGONIST PYRABACTIN	33
2. OBJECTIVES	39
3. RESULTS: CHAPTER 1	43
Modulation of abscisic acid signaling <i>in vivo</i> by an engineered receptor insensitive protein phosphatase type 2C allele.	
4. RESULTS: CHAPTER 2	75
Selective inhibition of clade A phosphatases type 2C by PYR/PYL/RCAR abscisic acid receptors.	
5. RESULTS: CHAPTER 3	103
PYRABACTIN RESISTANCE1-LIKE8 plays an important role for the regulation of abscisic acid signaling in root.	
6. RESULTS: CHAPTER 4	121
A chemical genetic approach directed to isolate new agonists of the abscisic acid.	

7. GENERAL DISCUSSION	139
7.1 MOLECULAR FEATURES OF THE INTERACTION BETWEEN PP2CS AND PYR/PYL/RCARS.	140
7.2 CHARACTERIZATION OF A SUBBRANCH OF THE CLADE A PP2Cs	142
7.3 THE CHARACTERIZATION OF MULTIPLE MUTANTS AND THE ANALYSIS OF THE EXPRESSION PATTERNS REVEAL IMPORTANT DIFFERENCES BETWEEN THE MEMBERS OF THE PYR/PYL/RCAR FAMILY.	144
7.4 THE ROLE OF ABSCISIC ACID AS A GROWTH PROMOTER	145
7.5 THE ROLE OF ABA IN THE HYDROTROPIC RESPONSE	146
7.6 ISOLATION OF NEW ABA AGONISTS THROUGH CHEMICAL GENETICS.	147
8. CONCLUSIONS	149
9. REFERENCES	153
10. APPENDIX 1	169
11. APPENDIX 2	189
