

Edificio Roca : Proyecto de Interiorismo

Contexto Histórico: Fase 1

Nacimiento del ferrocarril

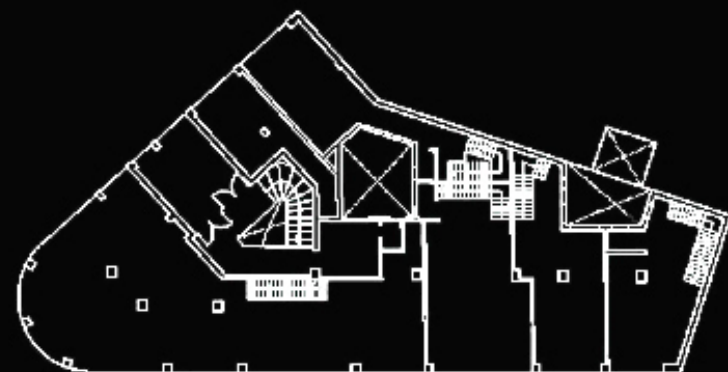

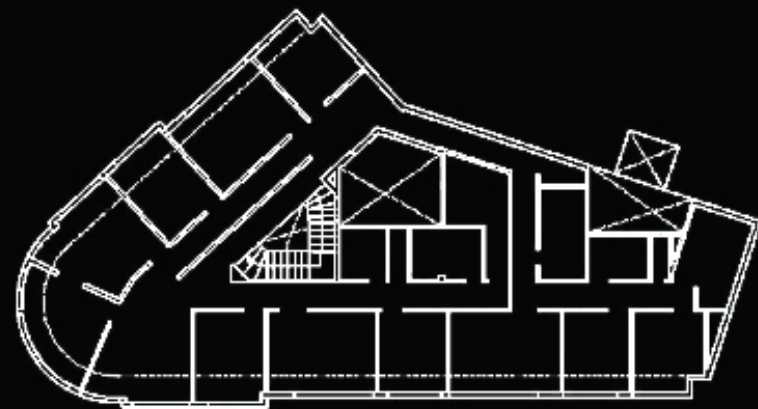

Bauhaus de Walter Gropius

- Influencias de la Bauhaus, de Le Corbusier, del CIAM
- El uso de materiales surgidos de la nombrada Revolución Industrial (vidrio, acero, hormigón,..)
- Las influencias expresionistas en el uso de formas curvas en fachada, sobre todo en chaflanes.
- Utilización de la horizontal
- Huecos continuos
- Se desliga la estructura del muro
- La simplificación de las formas, ausencia de ornamentación.
- El uso de estructura metálica
- La preocupación por la disposición de las habitaciones, la iluminación, ventilación, higiene, ...

Almacenes Schocken de Mendelsohn

Edificio Llopi-Crespo

Estudio del Edificio: Fase 2

Edificio Roca de Vicente Valls Gadea

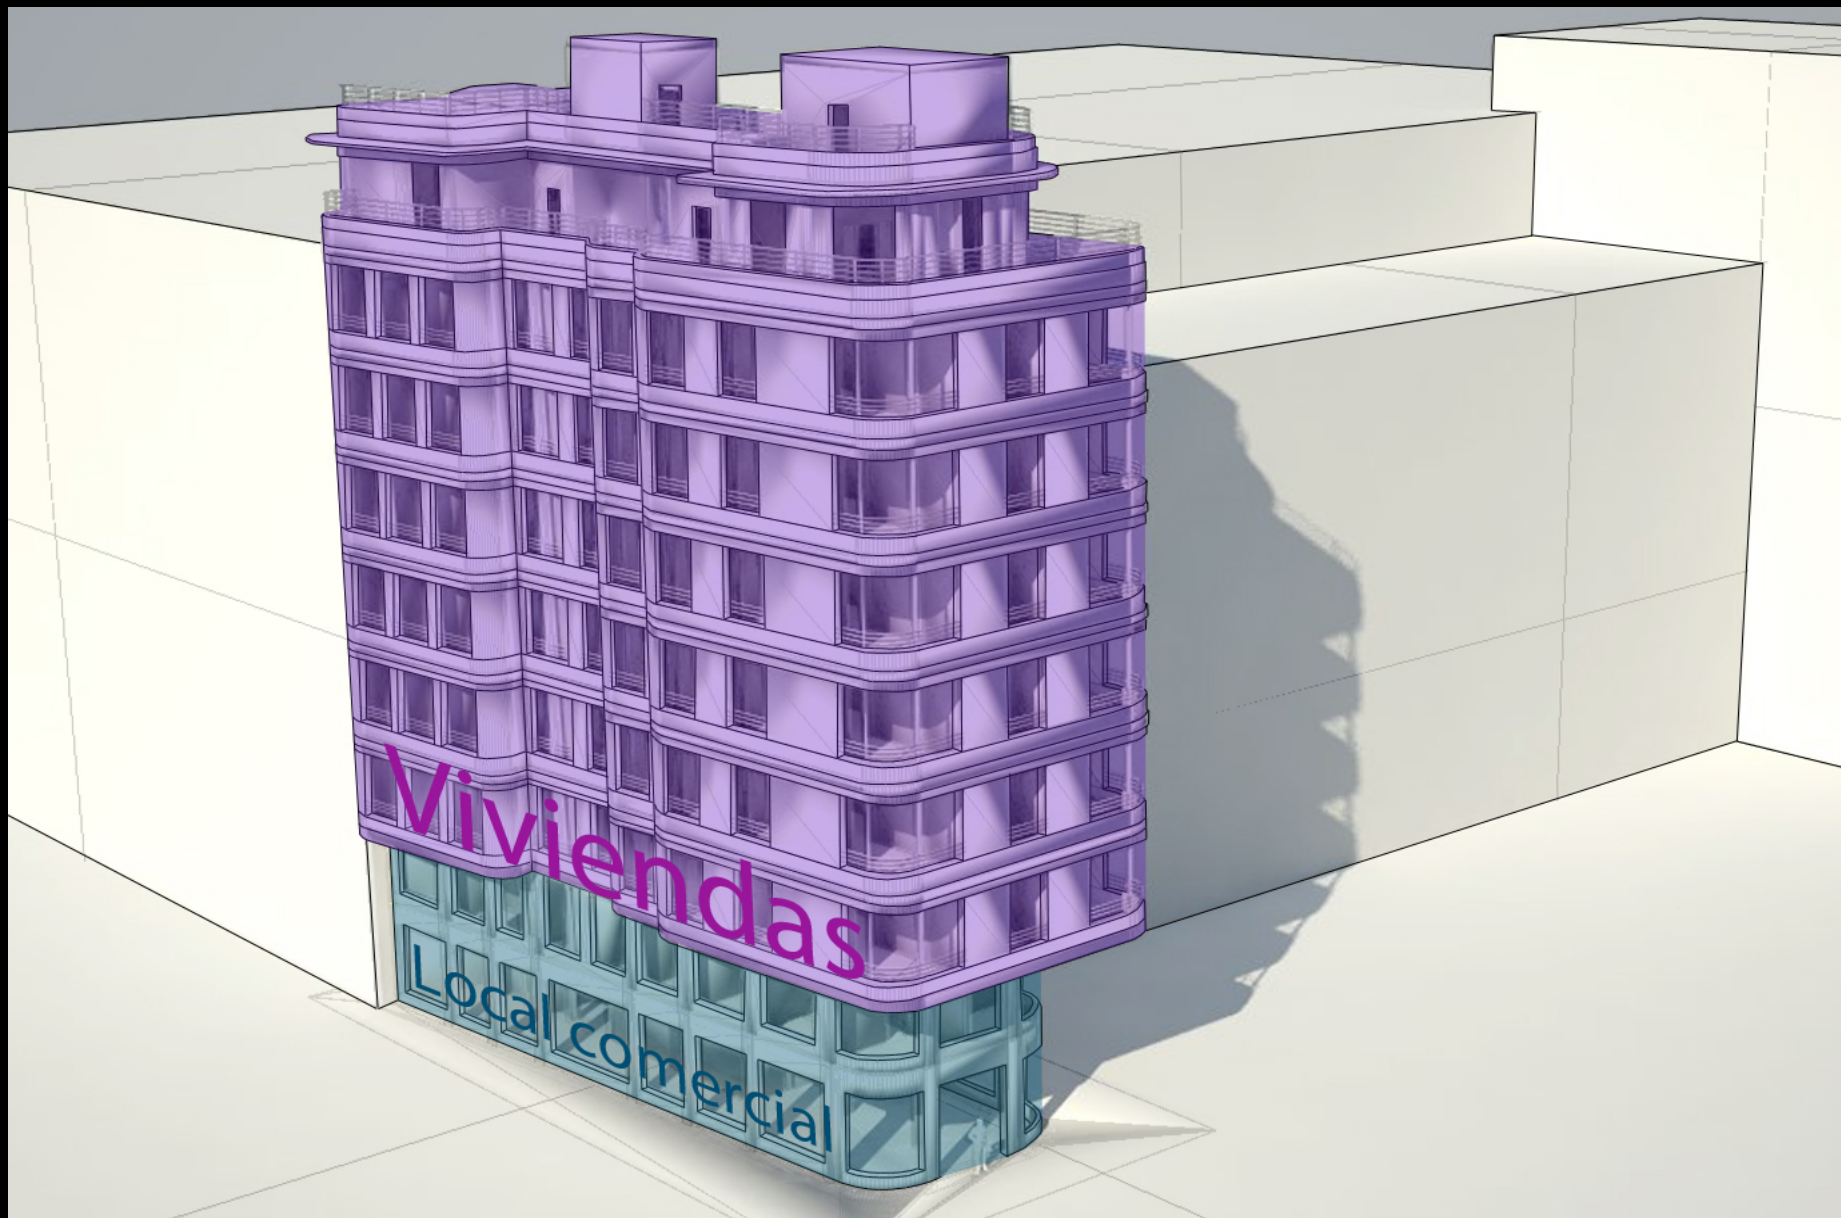

Espacios expositivos (1936)

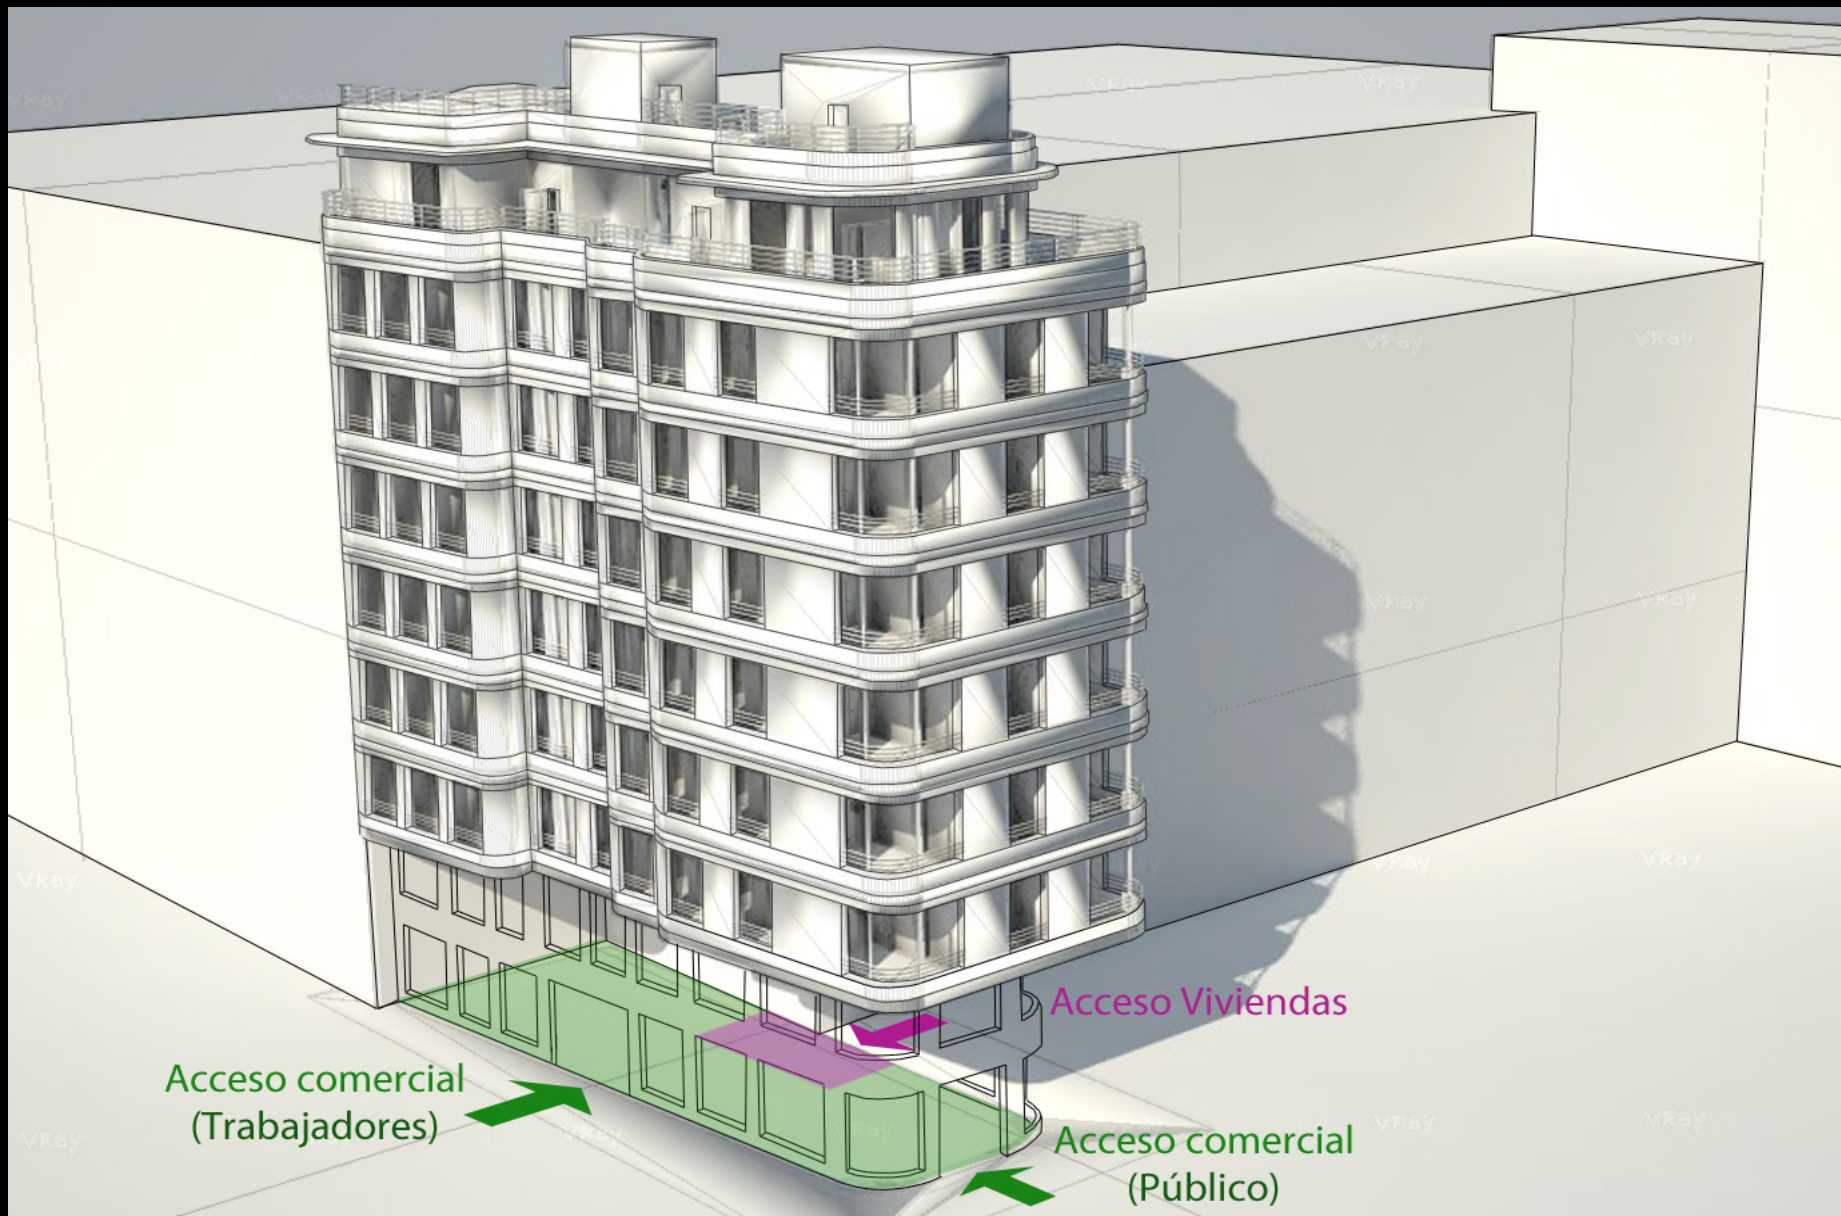

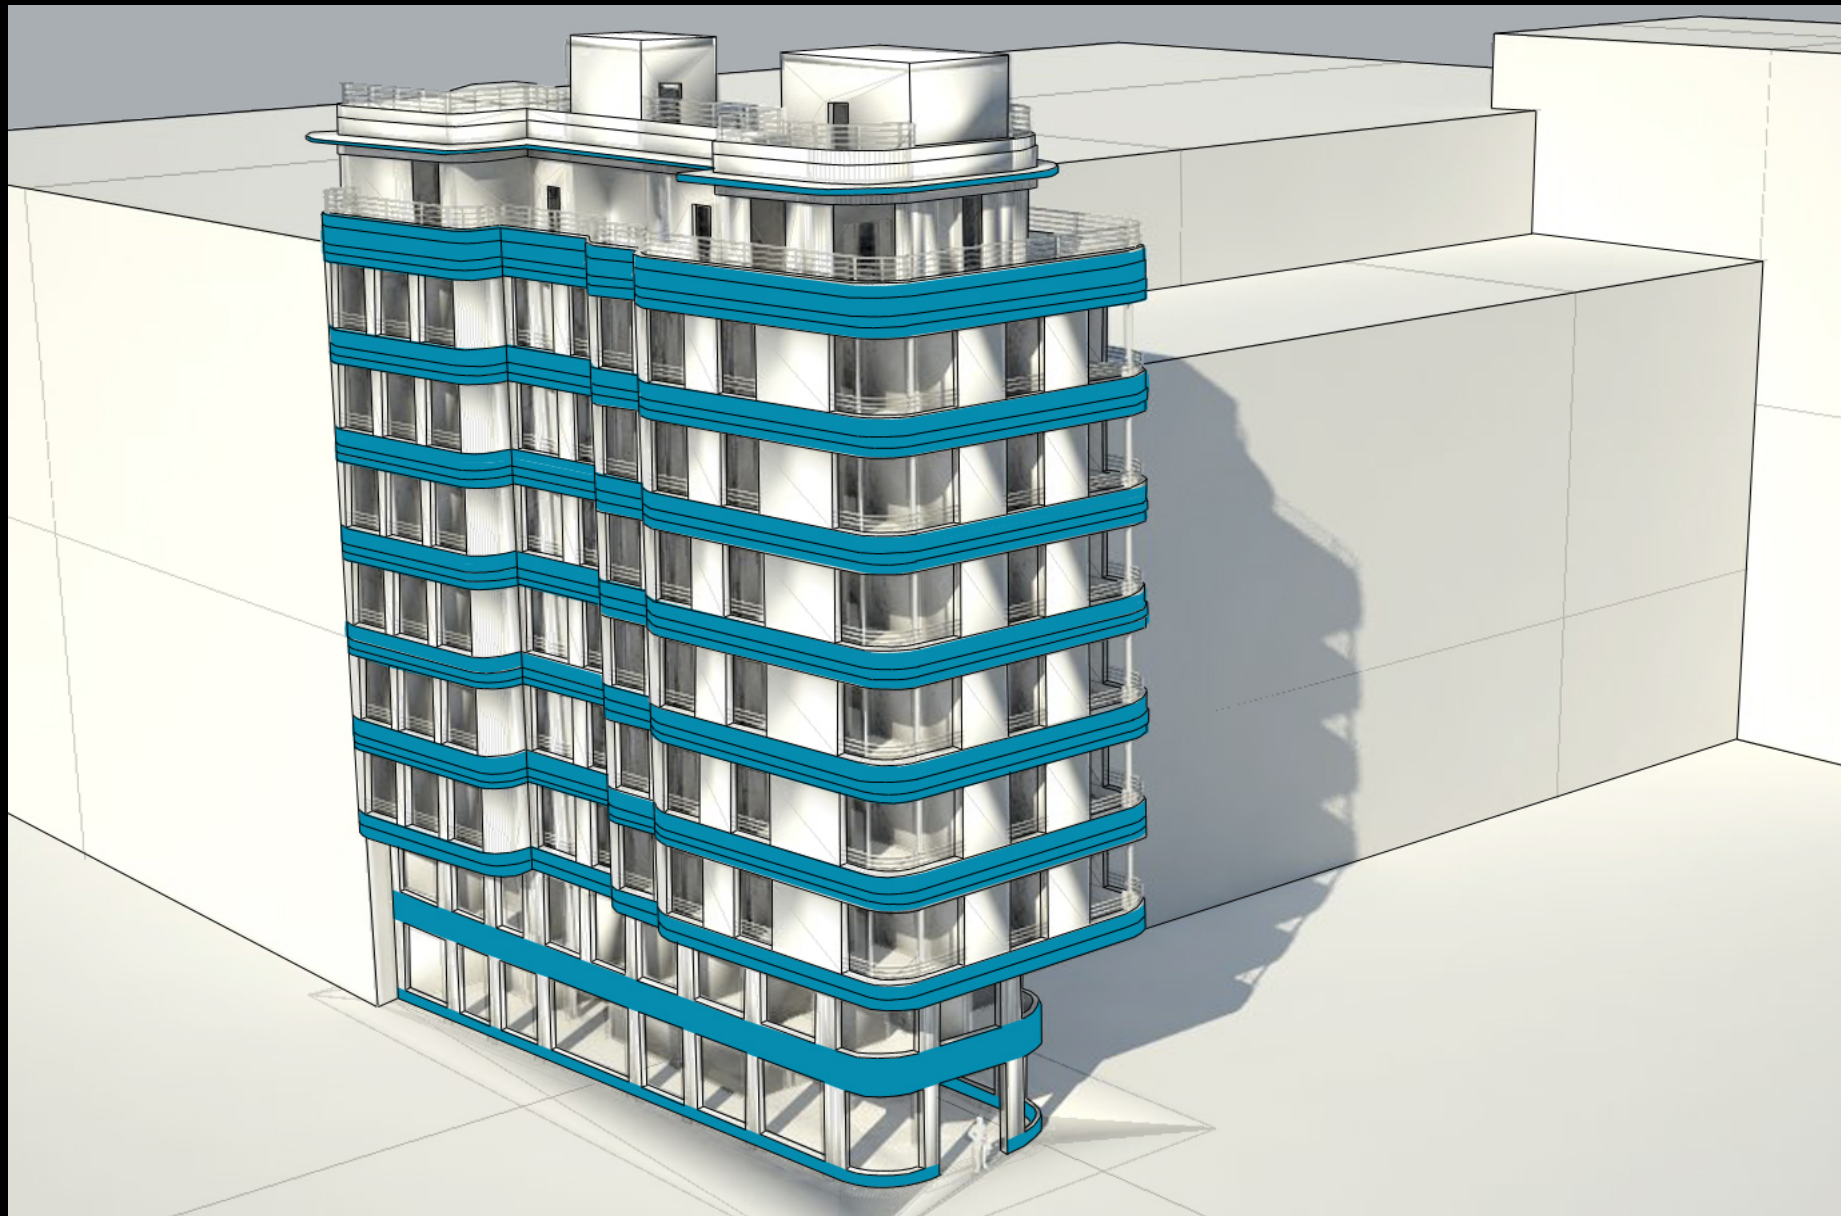

Situación Edificio Roca

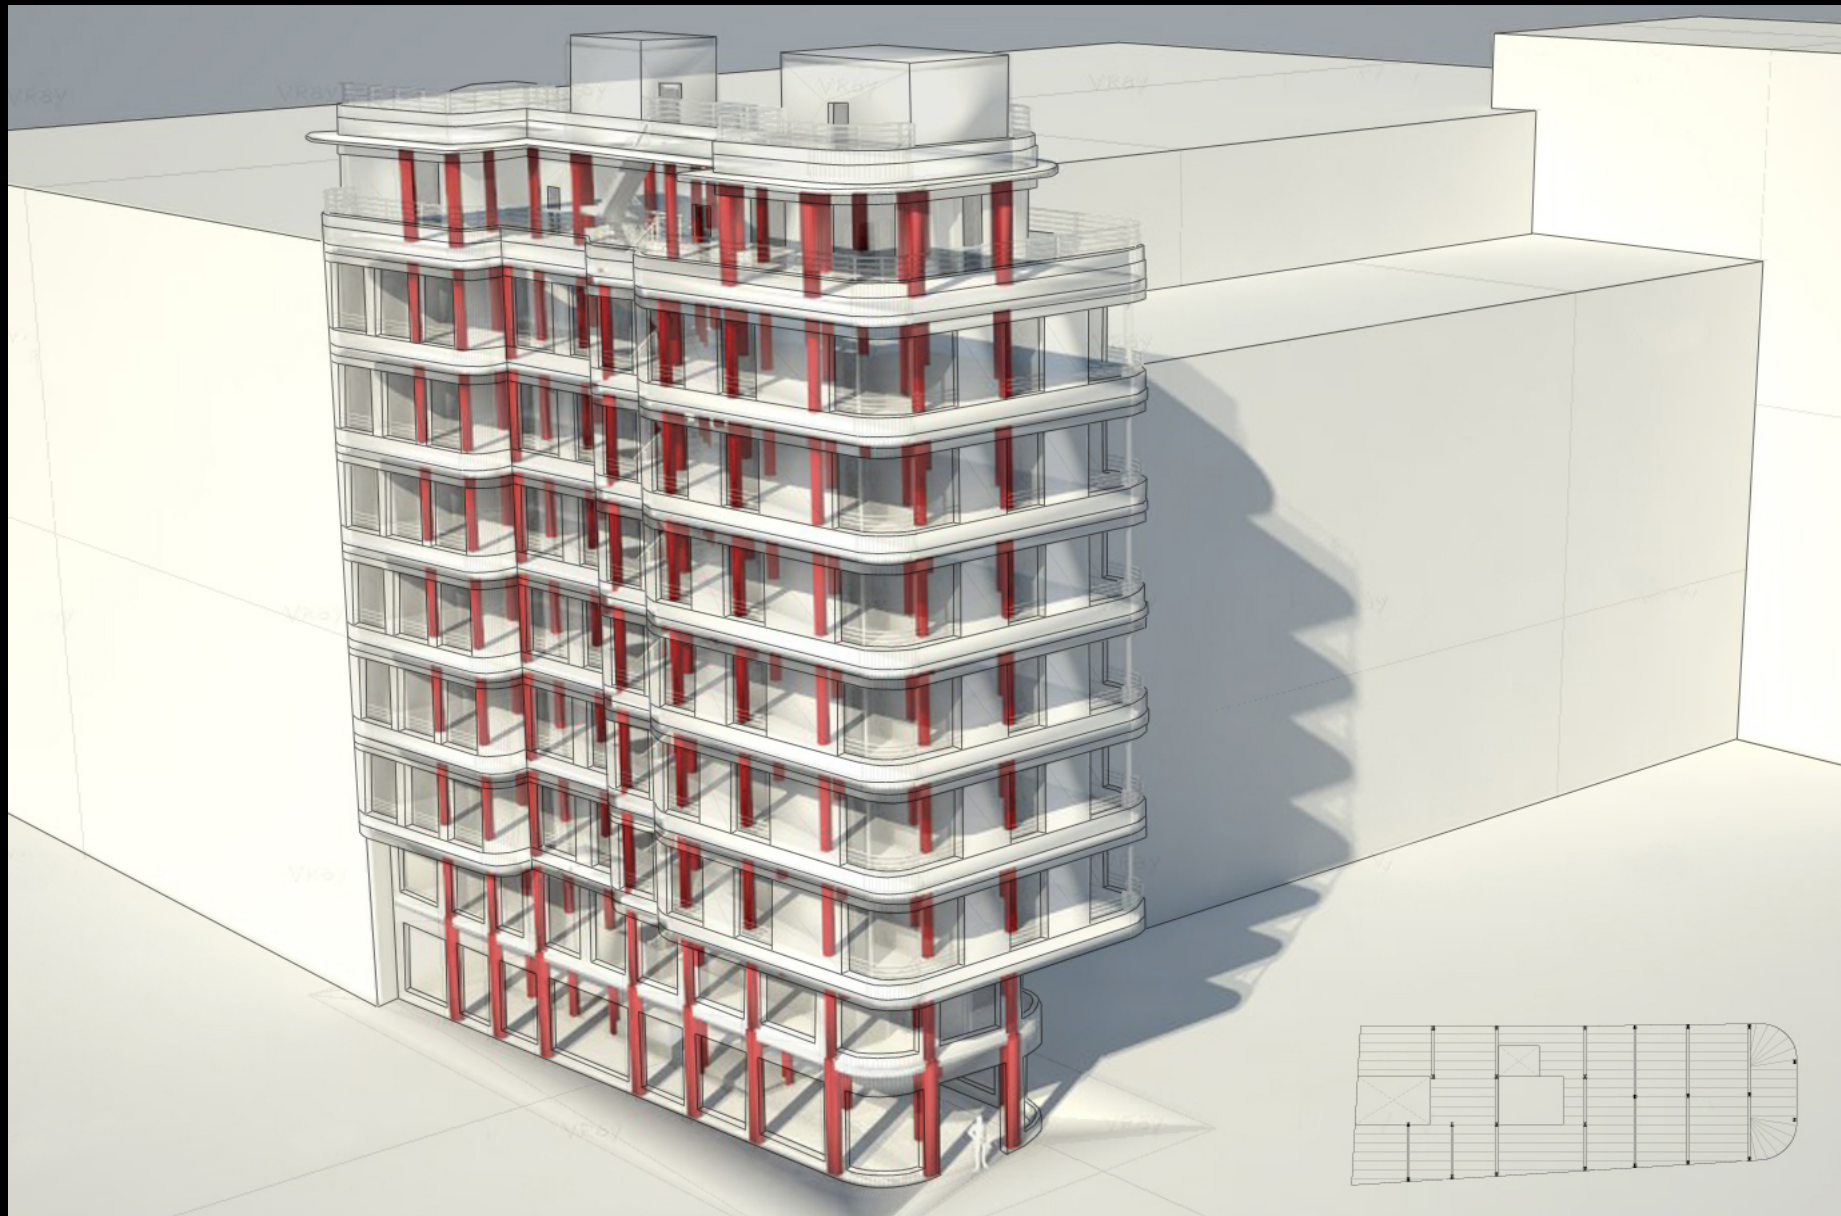

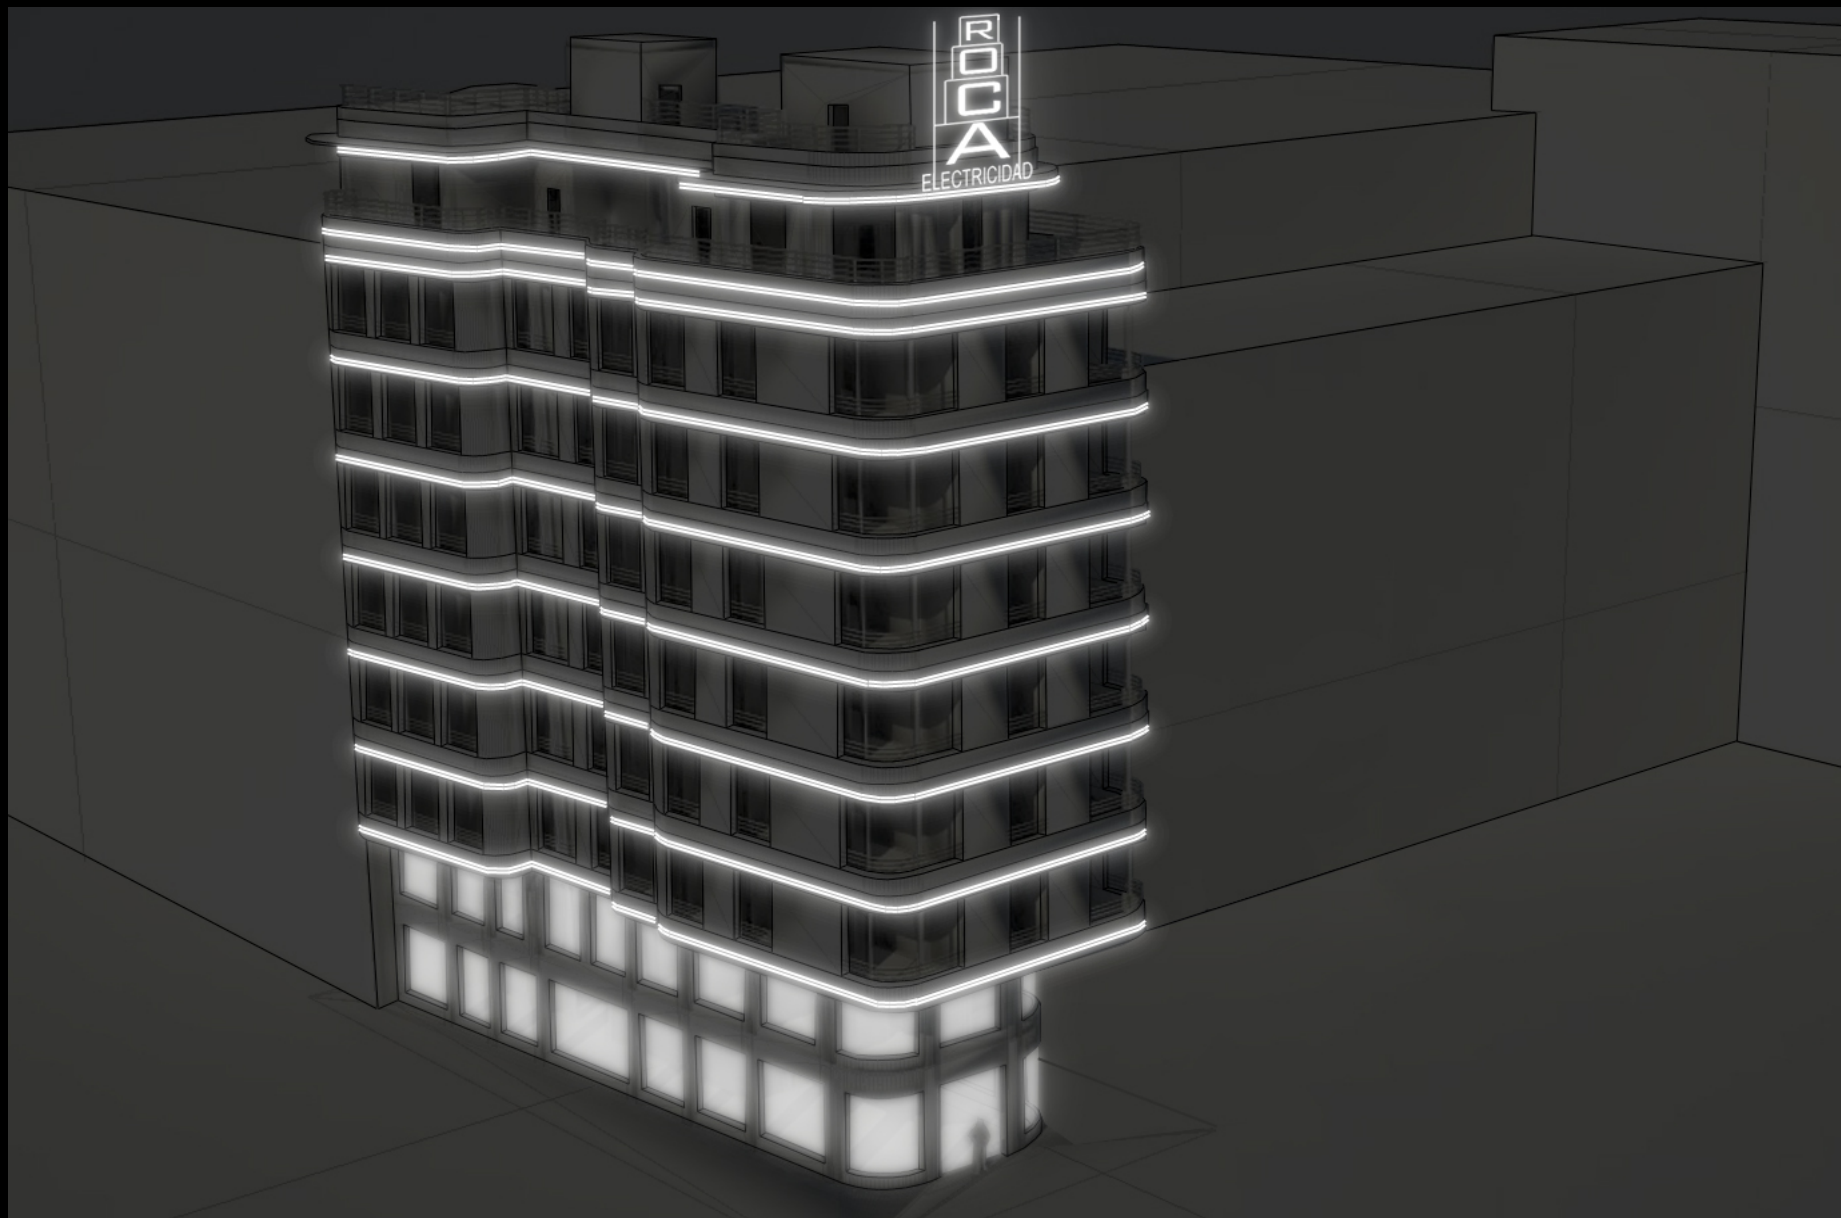

Esquema estructura

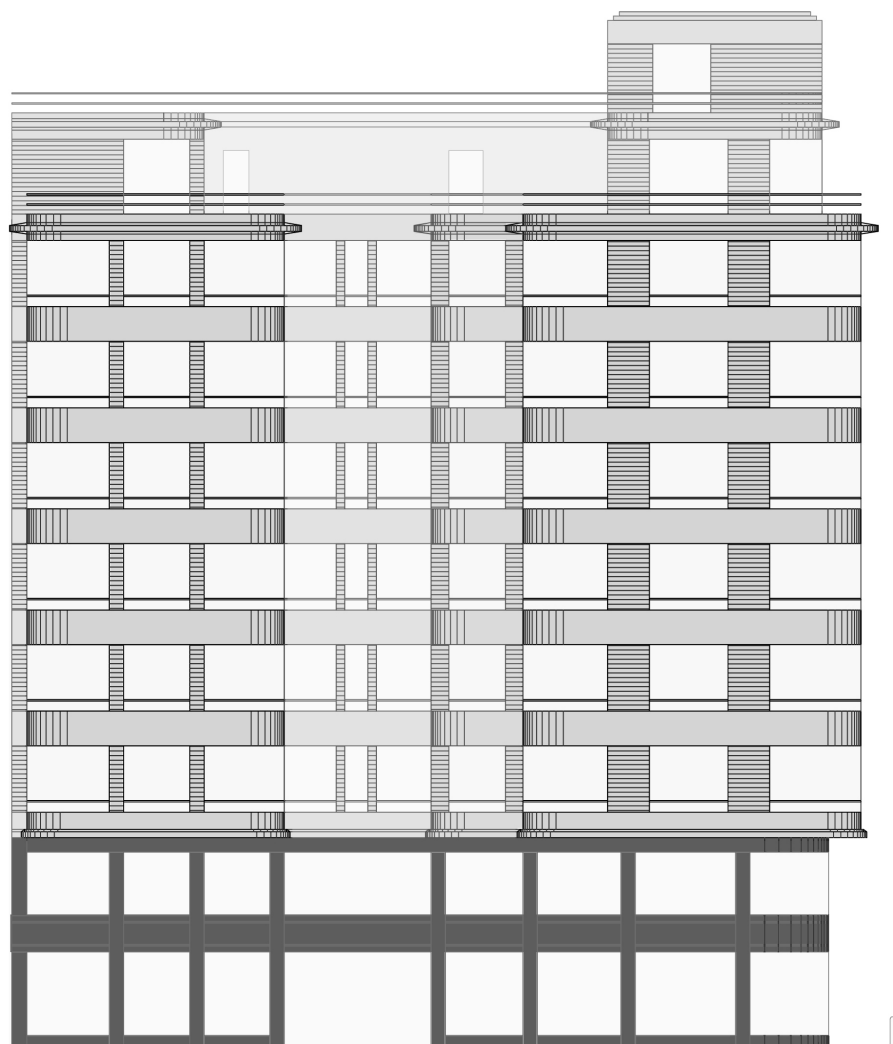

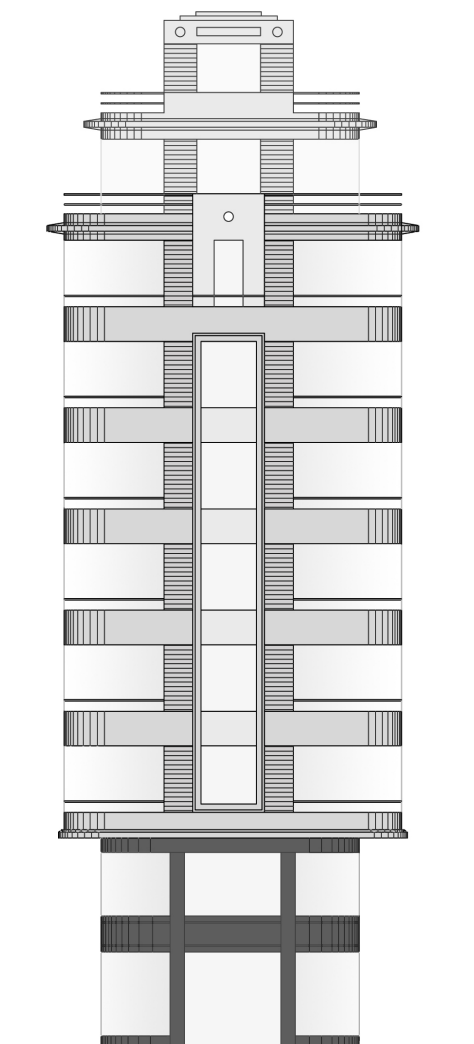

Uso de la curva en chaflanes

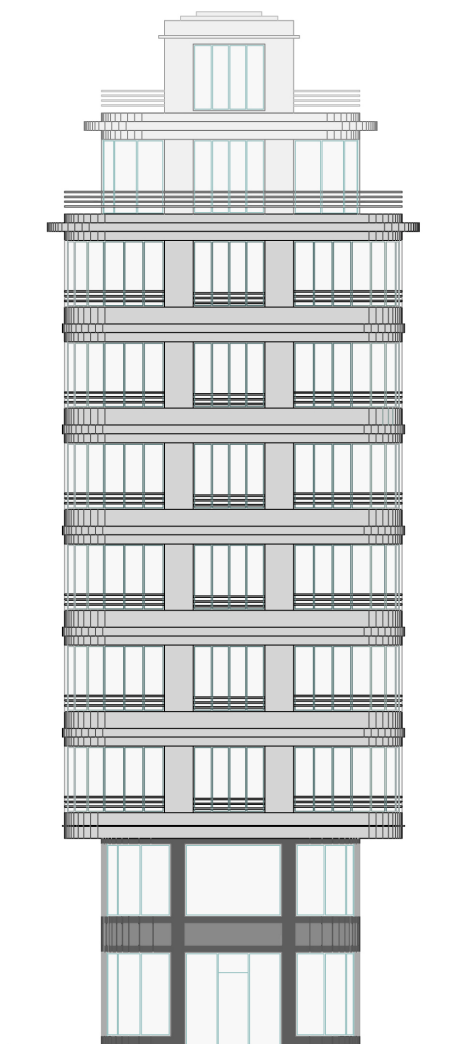

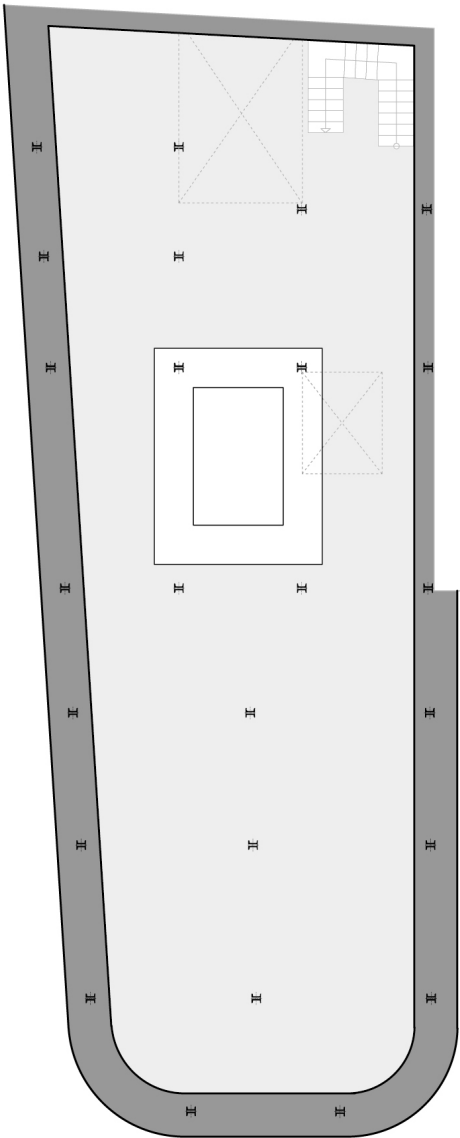

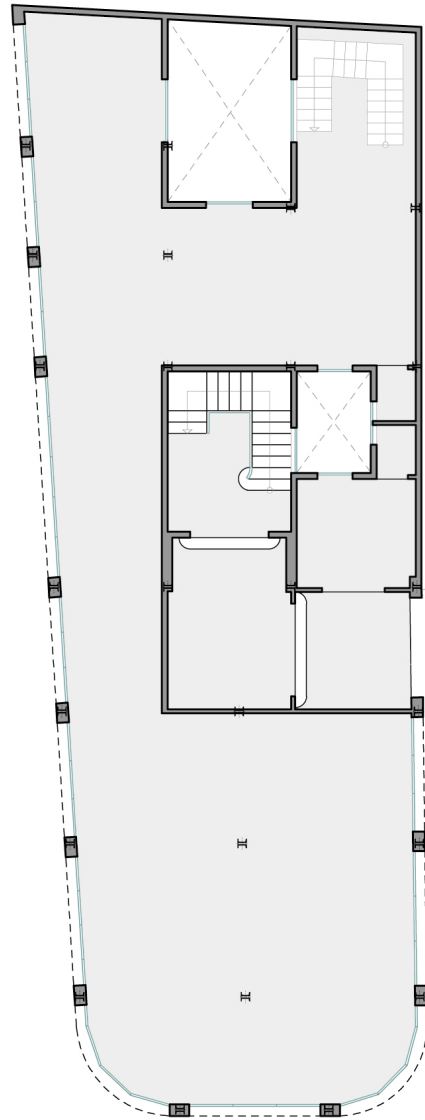

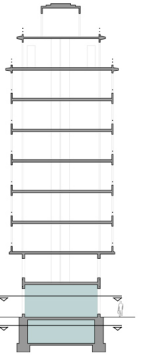

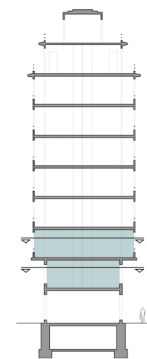

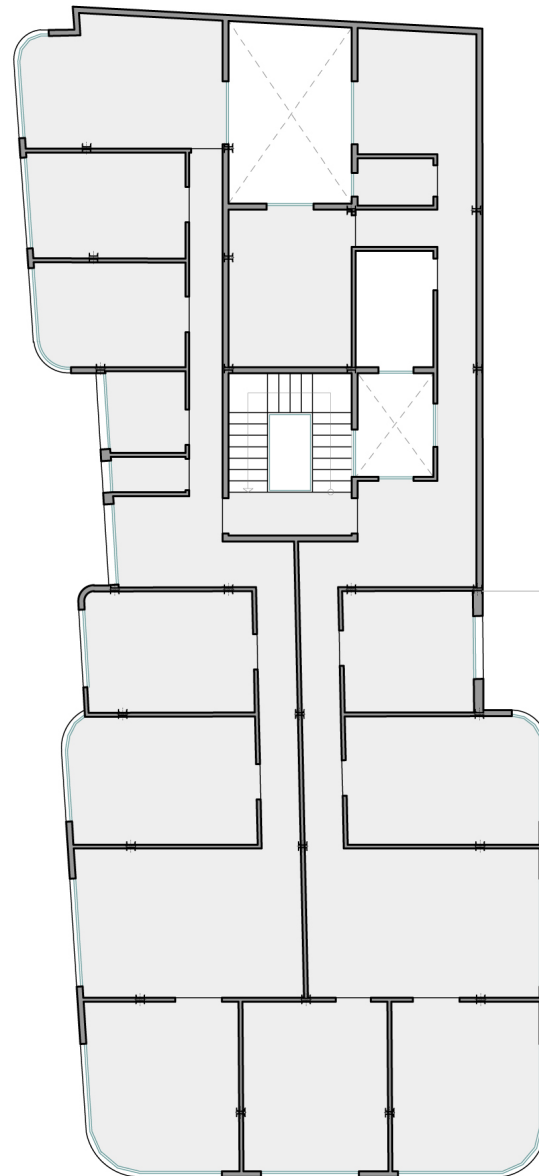

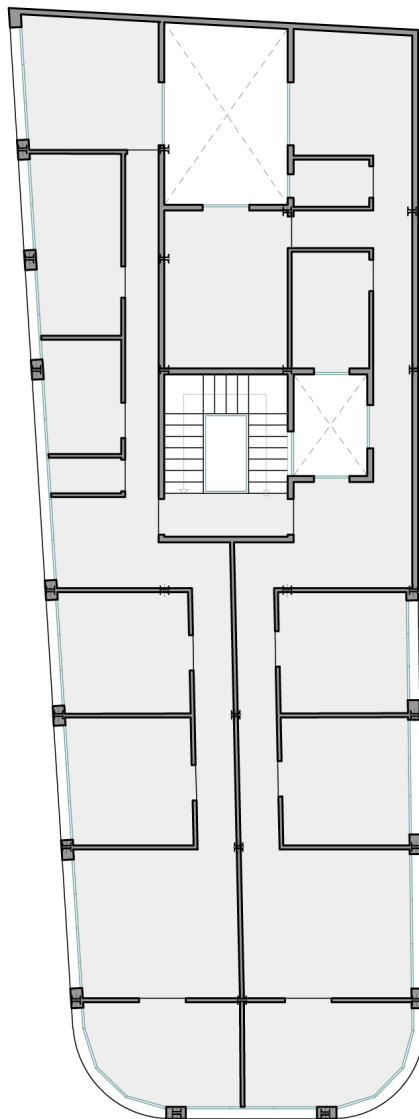

Fachada nocturna original
