

Table of contents

Abstract	1
Abbreviations.....	9
Introduction.....	17
1. Synthetic Biology	19
1.1. A brief history of Synthetic Biology origin and evolution.....	19
1.2. The Engineering Influence on Synthetic Biology	22
1.3. Engineering challenges in multicellular systems.....	24
2. Plant Synthetic Biology	24
2.1. Modular cloning for plant synthetic gene circuit assembly	25
2.2. Common standardized DNA parts for plant transcriptional units.....	26
2.2.1. Promoters.....	28
2.2.2. 3' untranslated regions (3'UTRs)	29
2.2.3. Coding sequences (CDS).....	30
2.2.4. Insulators.....	31
2.2.5. Binary T-DNA vectors.....	31
2.3. Modularity of plant synthetic gene circuits	32
2.3.1. Sensor modules.....	33
2.3.2. Processor modules	37
2.3.2.1. dCas9-based programmable transcriptional activators	39
2.3.2.2. Geminiviral-based replicative systems.....	43
3. The need of synthetic gene circuits in Molecular Farming context.....	49
Objectives	53
Chapter 1	57
ABSTRACT	59
INTRODUCTION.....	60
RESULTS	61
Optimization of a copper-responsive sensor for efficient reporter gene activation in <i>N. benthamiana</i>	61
Optimization of copper-mediated dCasEV2.1 regulation in <i>N. benthamiana</i>	64
Effect of gRNA regulation on copper-inducible dCasEV2.1 activation	65
Copper-regulated dCasEV2.1-mediated activation of endogenous genes	68
DISCUSSION	69
MATERIALS AND METHODS	72
Cloning and assembly of the GoldenBraid constructs	72

Agroinfiltration experiments	73
Quantification of reporter gene expression	73
Real-time quantitative PCR analysis	73
SUPPLEMENTARY MATERIAL	74
Chapter 2	79
ABSTRACT	81
INTRODUCTION	82
RESULTS	85
Optimization of the replicative module for the CuBe system	85
Optimization of a copper-regulated sensor module for the CuBe system	87
Stable <i>N. benthamiana</i> CuBe-eGFP plants	89
Copper treatment regimes	92
Production of antibody n72_hyHC by the CuBe system in transgenic <i>N. benthamiana</i> plants	95
DISCUSSION	97
MATERIALS AND METHODS	101
Cloning and assembly of the GoldenBraid constructs	101
Agroinfiltration experiments	101
Fluorescence quantification of eGFP expression	101
Fluorescence imaging of eGFP expression	101
Stable transformation of <i>Nicotiana benthamiana</i>	101
Copper induction of CuBe plant material	102
Total soluble protein extraction	102
Antibody Purification by Affinity Chromatography	102
Isolation of apoplast fluid	102
SDS-PAGE and Western Blot Analysis	103
Protein quantification	103
ELISA	103
Quantitative PCR analysis	104
SUPPLEMENTARY MATERIAL	105
Chapter 3	121
ABSTRACT	122
INTRODUCTION	123
RESULTS	126
Application of bioluminescence pathway as a sensitive qualitative and quantitative reporter for geminiviral systems characterization	126

Adaptation of TYLCV and BCTV replicative elements for Rep-regulated recombinant protein expression	128
Adaptation of the new geminiviral replicative systems for Rep-regulated multiprotein expression	129
Exploration of orthogonality between geminiviral replicative systems	131
Optimization of TYLCV-based vectors	134
DISCUSSION	135
MATERIALS & METHODS	139
Cloning and assembly of GoldenBraid constructs.....	139
Agroinfiltration experiments.....	139
Luminescence and fluorescence measurements	139
Luminescence imaging of leaves.....	139
Confocal imaging to co-localize eGFP, dsRed, and BFP proteins	140
<i>General discussion</i>.....	141
<i>Conclusions</i>.....	147
<i>References</i>.....	151
