

## INDEX

ABSTRACT	15	
1	CHAPTER 1: INTRODUCTION	17
1.1	Motivation	17
1.2	Background	18
1.3	Thesis structure	23
1.4	Problem statement	24
1.4.1	Global Water Infrastructure Status	24
1.4.2	Current Challenges and Trends	24
1.4.3	Infrastructure Aging and Maintenance	27
1.4.4	Climate Change Impact	30
1.5	Research objectives	33
1.6	State of the art	34
1.6.1	Understanding Non-Revenue Water (NRW)	34
1.6.2	Case Studies of NRW Management in Developing Areas	43
1.6.3	Smart Water Management: Concepts and Technologies	44
1.6.4	Hydraulic software simulation in Water Management	47
1.6.5	Advanced Modeling Techniques in Water Utility Management	48
1.6.6	Integration with GIS Systems	50
1.6.7	Development and Implementation of the Water Smart Application	52
1.6.8	Implementation and Validation	55
1.6.9	Future Developments	57
2	CHAPTER 2: METHODOLOGY	60
2.1	Introduction	60
2.2	Material and methods	63
2.2.1	Reference Applications and Foundations for Water Smart	63
2.2.2	GIS NRW Mathematical model	64
2.2.3	Change Management Index (CMI)	72
2.2.4	Sistema Integrado de Saneamento Rural (SISAR)	80
2.2.5	Water infrastructure resilience against Climate Change. Future development (Water Smart Resilience Optimizer)	81

2.3	Development of the Water Smart Application	87
2.3.1	Water Smart Network Administration (WSNA)	89
2.3.2	Water Smart Network Optimization (WSNO)	96
2.3.3	Water Smart complementary Modules	109
2.4	Cases of study	110
2.4.1	Batumi (Georgia), Water Utility Management Information System (MIS)	110
2.4.2	Khelvachauri (Georgia), Pressure recovery module	131
2.4.3	Várzea da Cobra (Brazil), Leakage reduction	148
2.4.4	Jakarta (Indonesia), Water Infrastructure Resilience module against Climate Change	157
3	CHAPTER 3: RESULTS AND DISCUSSION	178
3.1	Results by Case Study	178
3.1.1	Batumi (Georgia): MIS/Water Smart Adaptation	178
3.1.2	Khelvachauri (Georgia): Pressure Recovery Module	182
3.1.3	Várzea da Cobra (Brazil): Leakage Reduction with PRV	184
3.1.4	Jakarta (Indonesia): Water Infrastructure Resilience against Climate Change	194
3.2	Findings general overview	196
3.3	Comparative Discussion with Existing Digital Water Platforms	197
3.4	Strengths and weaknesses of the Water Smart	200
3.5	Scalability and Replicability in Small and Mid-size Water Utilities	200
3.6	Interpretation of the results	201
4	CHAPTER 4: CONCLUSION AND FUTURE RESEARCH	203
4.1	Implications and potential applications	203
4.2	Recap of key findings and final recommendations	203
4.3	Suggestions for future research	204
4.4	Conclusion	206
5	BIBLIOGRAPHY	208
