

TABLE OF CONTENTS

LIST OF ACRONYMS.....	29
INTRODUCTION	31
1. Current situation of food packaging.....	34
2. Polymer-based films for food packaging.....	35
2.1. Starch-based films	37
2.2. Chitosan-based films	40
2.3. Films based on mixtures of polymers.....	42
3. Active compounds of natural origin for food preservation	46
3.1. Polyphenols from plant extracts	47
3.2. Polyphenols from essential oils.....	52
4. Development of films with active compounds.....	55
4.1. Encapsulation of the incorporated active ingredients	57
4.2. Encapsulation agents (wall materials).....	65
5. Effectiveness of the incorporation of the active compounds.....	71
5.1. Antioxidant activity.....	72
5.2. Antimicrobial activity.....	73
5.3. Release studies	74
References.....	77
OBJECTIVES.....	99
CHAPTERS.....	103
I. Antioxidant edible films based on chitosan and starch containing polyphenols from thyme extracts	107
ABSTRACT.....	109
1. INTRODUCTION	110
2. MATERIALS AND METHODS.....	112
2.1 Raw materials	112
2.2 Thyme extract preparation.....	112
2.3. Experimental design and preparation of the films.....	112
2.4 Characterization of the films	113

3. RESULTS AND DISCUSSION	117
3.1 Physical properties of films	117
3.2 Film microstructure	123
3.3. Antioxidant activity.....	125
4. CONCLUSIONS	127
REFERENCES	128

II. Release of polyphenols from starch-chitosan based films containing thyme extract
..... **133**

ABSTRACT	135
1. INTRODUCTION	136
2. MATERIALS AND METHODS	138
2.1 Raw materials	138
2.2. Measurement of thyme extract polyphenols	138
2.3. Film preparation and characterization	139
3. RESULTS AND DISCUSSION	143
3.1. Water content, solubility, thickness and antioxidant activity of the films	143
3.2. Polyphenols release kinetics	145
4. CONCLUSIONS	154
REFERENCES	155

III. Encapsulation of eugenol by spray-drying using whey protein isolate or lecithin.
Release kinetics, antioxidant and antimicrobial properties. **159**

GRAPHICAL ABSTRACT	161
ABSTRACT	163
1. INTRODUCTION	164
2. MATERIALS AND METHODS	167
2.1. Raw materials	167
2.2. Emulsion preparation	167
2.3. Spray-drying.....	168
2.4. Characterization of the emulsions	168
2.5. Characterization of the spray-dried powders	169
2.6. Release Kinetics of eugenol from powders into food simulants.....	171
2.7. Antioxidant activity.....	171

2.8. Antimicrobial activity.....	172
2.9. Statistical analysis.....	173
3. RESULTS AND DISCUSSION	174
3.1. Emulsion characterization	174
3.2. Powder encapsulate characterization	177
3.3. Release Kinetics	186
3.4. Antioxidant and antibacterial activity	189
4. CONCLUSIONS	191
REFERENCES.....	192

IV. Eugenol incorporation into thermoprocessed starch films, using different encapsulating materials..... 199

ABSTRACT.....	201
1. INTRODUCTION	202
2. MATERIALS AND METHODS.....	204
2.1. Raw materials	204
2.2. Preparation of spray-drier microcapsules.....	204
2.3. Preparation of the films.....	204
2.4. Characterization of the films	205
2.5. Kinetics of eugenol release.....	209
2.6. Statistical analysis.....	209
3. RESULTS AND DISCUSSION	210
3.1. Microstructure.....	210
3.2. Tensile properties	212
3.3. Barrier properties, moisture content, solubility and thickness	214
3.4. Optical properties.....	215
3.5. Antioxidant activity.....	216
3.6. Kinetics of eugenol release.....	219
4. CONCLUSIONS	223
REFERENCES.....	224

V. Starch-eugenol based films for sunflower oil preservation: release kinetics and functional properties 229

ABSTRACT.....	231
----------------------	------------

1. INTRODUCTION	232
2. MATERIALS AND METHODS.....	234
2.1. Raw materials.....	234
2.2. Preparation of the microcapsules	234
2.3. Preparation of the films.....	234
2.4. Characterization of the films	235
2.5. Kinetics of eugenol release.....	238
2.6. Antioxidant performance of the films on sunflower oil.....	239
2.7. Statistical analysis.....	240
3. RESULTS AND DISCUSSION	241
3.1. Microstructure, moisture content, solubility, thickness, barrier mechanical and optical properties	241
3.2. Antioxidant activity.....	245
3.3. Kinetics of eugenol release.....	246
3.4. Antioxidant performance of the films in preventing sunflower oil oxidation	250
4. CONCLUSIONS	253
REFERENCES.....	254
GENERAL DISCUSSION.....	259
CONCLUSIONS	273
