Abstract	I
Resumen	III
Resum	V
Contents	VII
List of Figures	XIII
List of Tables	XIX
Nomenclature	XXI
Chapter 1.....	1
Introduction	1
1.1 Background.....	3
1.2 Motivation of the thesis.....	4
1.3 Objectives.....	5
1.4 Methodology.....	6
1.5 References.....	8
Chapter 2.....	11
Literature review.....	11
2.1 Introduction	14
2.2 Objectives.....	15
2.3 International Standard Atmosphere.....	15
2.3.1. ISA constants.....	16
2.3.2. Atmospheric layers.....	17
2.3.3. Physical laws and model equations	17
2.4 Altitude testing.....	19
2.4.1. Real altitude tests	19
2.4.2. Hypobaric chambers.....	20
2.4.3. Altitude simulators	22
2.5 Homologation cycles	26
2.6 ICE emissions	28
2.6.1. Carbon dioxide.....	29
2.6.2. Carbon monoxide.....	29
2.6.3. Nitrogen oxides.....	30

2.6.4.	Unburned hydrocarbons	31
2.6.5.	Particle matter	31
2.7	Compression Ignition Engines performance and emissions in altitude conditions.....	32
2.7.1.	Altitude effect on the combustion chamber.....	32
2.7.2.	Altitude effect on the ICE elements.....	33
2.7.3.	ICE control strategies in altitude	34
2.7.4.	Compression ignition ICE emissions in altitude	35
2.8	Strategies to compensate altitude effects	36
2.9	References.....	38
Chapter 3.....		49
Altitude simulator development.....		49
3.1	Introduction	54
3.2	Operation principle.....	54
3.2.1	Main elements	58
3.2.2	Auxiliary elements	66
3.3	Operation maps	69
3.3.1	Vacuum operation range.....	69
3.3.2	Vacuum temperature range	71
3.3.3	Overpressure operation range.....	75
3.3.4	Limitations in the operation maps.....	76
3.4	Fluid dynamic 1-D model	79
3.4.1	Altitude simulator model description	79
3.4.2	Altitude simulator model flow path.....	81
3.4.3	Model validation.....	81
3.4.4	Elements analysis	83
3.5	Redesign of the prototype	88
3.5.1	VGTv valve	88
3.5.2	Cooler upstream the engine intake in overpressure	89
3.5.3	Overpressure valves.....	90
3.5.4	On-off valves.....	91

3.6	Altitude simulator flow path.....	92
3.6.1	Vacuum Operation Mode	93
3.6.2	Overpressure Operation Mode	94
3.6.3	Altitude simulator operation maps.....	94
3.7	Altitude simulator aspect.....	96
3.8	Conclusions.....	99
3.9	References.....	100
Chapter 4.....		103
	Altitude simulator analysis.....	103
4.1	Introduction	107
4.2	Operation points in the mechanical compressor map.....	107
4.3	Ambient conditions effect on the operation maps.....	109
4.4	Altitude simulator reduced maps.....	114
4.5	Limits on the operation map of the altitude simulator	116
4.5.1	Maximum mass flow area.....	117
4.5.2	Minimum mass flow area	118
4.5.3	Maximum altitude.....	119
4.6	Control strategies	120
4.6.1	Control variables and actuators.....	120
4.6.2	Control by reduced maps	122
4.6.3	Other controls.....	125
4.6.4	Operation mode changes.....	125
4.6.5	Dynamic operation	128
4.7	Altitude simulator operation.....	131
4.7.1	Interfaces	131
4.7.2	Engine modifications.....	135
4.7.3	User interface description.....	135
4.8	Variables stability when coupled to an engine	143
4.9	Conclusions.....	147
4.10	References.....	147
Chapter 5.....		149
	Altitude simulator and hypobaric chamber correlation	149
5.1	Introduction	152

5.2	Methodology.....	152
5.2.1.	Test bench description	153
5.2.2.	Tested points.....	154
5.2.3.	Engine tested	155
5.3	Results	155
5.3.1.	Boundary conditions	155
5.3.2.	Compressor behavior.....	159
5.3.3.	Engine sump pressure	160
5.3.4.	EGR and VGT.....	162
5.3.5.	Torque	164
5.3.6.	Fresh air.....	164
5.3.7.	BSFC	165
5.3.8.	Emissions.....	166
5.4	Error analysis.....	168
5.5	Summary and conclusions.....	171
5.6	References.....	172
Chapter 6.....	Turbocharged diesel engines behavior when operating at high altitude	175
	175	
6.1	Introduction	178
6.2	Methodology.....	179
6.2.1.	Test bench description	180
6.2.2.	Tested points.....	180
6.2.3.	Engine tested	181
6.3	Results	182
6.3.1.	Steady tests.....	182
6.3.2.	Dynamic tests.....	187
6.4	Summary and conclusions.....	195
6.5	References.....	196
Chapter 7.....	Strategies to reduce emissions in extended conditions	199
7.1	Introduction	202

7.2	Methodology.....	204
7.2.1.	Heat transfer model description	204
7.2.2.	Engine model specifications	205
7.2.3.	Simulated operation points	206
7.3	Results	207
7.3.1.	Exhaust ports length and distribution	211
7.3.2.	Valves and ports diameter.....	215
7.3.3.	Exhaust valve timing.....	219
7.3.4.	Multi-step valve opening	222
7.4	Summary and conclusions.....	228
7.5	References.....	230
Chapter 8.....		233
	Conclusions and future works.....	233
8.1	Introduction	234
8.2	Main contributions	234
8.2.1.	Altitude simulator.....	234
8.2.2.	Correlation with a hypobaric chamber	235
8.2.3.	Engine behavior when operating at high altitude.....	236
8.2.4.	Strategies to reduce emissions	237
8.3	Future works	238
8.3.1.	New systems development.....	238
8.3.2.	Hypobaric chamber correlations	239
8.3.3.	Engine altitude tests.....	239
8.3.4.	Strategies to reduce emissions in extended conditions	239
8.4	Scientific and Technical contribution.....	240
8.4.1.	Journals	240
8.4.2.	Congresses	240
8.4.3.	Patents	241
Bibliography.....		243
