List of Figures	xvii
List of Tables	xxi
I Preliminaries	1
1 Introduction	3
1.1 Motivation	3
1.2 Goals and Contributions	5
1.3 Research Hypothesis	6
1.4 Research Methodology	6
1.5 Outline of the Thesis	7
2 Toward a General Conceptualization of Multi-Display Environments	13
2.1 Introduction	13
2.2 Historical Evolution of MDEs	15
2.3 Previous Taxonomies to Describe MDEs	18
2.4 Technical Classification of Previous MDEs	18
2.4.1 Topology of the MDE	19
2.4.2 Surface Coupling in the MDE	24
2.4.3 Interaction with the MDE	28
2.5 Additional Considerations related to Context	32
2.5.1 User Information	33
2.5.2 Location	33
2.5.3 Purpose	34
2.6 Conclusions	34

II	MarkAirs: A Mid-Air Approach	37
3	Around-Device Interactions: A Usability Study of Frame Markers in Acquisition Tasks	39
3.1	Introduction	40
3.2	Related Works	41
3.3	User Evaluation	42
3.3.1	Apparatus	43
3.3.2	Participants	43
3.3.3	Design	43
3.3.4	Procedure	43
3.3.5	Results	44
3.3.6	Discussion	45
3.4	Limitations and Future Work	46
4	MarkAirs: Around-Device Interactions with Tablets Using Fiducial Markers—An Evaluation of Precision Tasks	49
4.1	Introduction	50
4.2	Related Works	51
4.3	Interacting with MarkAirs	51
4.4	Evaluation	52
4.4.1	Participants and Apparatus	52
4.4.2	Tasks	53
4.4.3	Procedure and Experimental Design	53
4.4.4	Results	54
4.4.5	Discussion	55
4.5	Conclusions and Future Work	56
5	Airsteroids: Re-designing the Arcade Game Using MarkAirs	59
5.1	Introduction	60
5.2	Related Works	60
5.3	Interaction with MarkAirs	61
5.4	Airsteroids	62
5.5	Conclusion	62
6	MarkAirs: Are Children Ready for Marker-Based Mid-Air Manipulations?	65
6.1	Introduction	65
6.2	Related Works	67
6.3	Building Multi-Display Educational Games with MarkAirs	68
6.4	Evaluating the Precision of MarkAirs	70
6.4.1	Participants and Apparatus	70
6.4.2	Tasks	72
6.4.3	Experimental Design	72
6.4.4	Procedure	73

6.4.5	Precision Results	73
6.4.6	Qualitative Results	75
6.4.7	Discussion and Design Implications	77
6.5	Conclusions and Future Work	78
7	Evaluation of an Educational Collaborative Game Based on Cross-Surface Interactions with Fiducial Markers for Children in Primary School	81
7.1	Introduction	82
7.2	Related Works	83
7.3	An Overview of MarkAirs: A Mid-Air Cross-Tablet Interaction	85
7.4	Study 1: Evaluation of the Precision of MarkAirs for Manipulation Tasks	86
7.4.1	Participants	87
7.4.2	Apparatus	87
7.4.3	Tasks	87
7.4.4	Design and Measurement Instruments	88
7.4.5	Procedure	88
7.4.6	Precision Results	89
7.4.7	Results on Users' Impressions	92
7.4.8	Discussion and Design Implications	92
7.5	Study 2: Evaluation of a Multi-Tablet Collaborative Game Using MarkAirs	94
7.5.1	Designing a Collaborative Multi-Tablet Game	94
7.5.2	Participants	96
7.5.3	Apparatus	96
7.5.4	Measurement Instruments	97
7.5.5	Task and Procedure	98
7.5.6	Results	98
7.5.7	Discussion	102
7.6	Conclusions and Future Work	103
III	Tangibot: A Companion-Based Approach	105
8	Design and Evaluation of a Tangible-Mediated Robot for Kindergarten Instruction	107
8.1	Introduction	108
8.2	Related Works	109
8.3	Platform Design	111
8.3.1	Phase 1: Initial Prototype	111
8.3.2	Phase 2: Review Sessions with Instructors and Design Refinement	112
8.4	Potential Educational Activities	113
8.5	Evaluation	115

8.5.1	Participants	115
8.5.2	Procedure	115
8.5.3	Method	116
8.5.4	Observational Findings	117
8.6	General Discussion	122
8.7	Conclusions and Future Work	123
9	Evaluating the Usability of a Tangible-Mediated Robot for Kindergarten Children Instruction	125
9.1	Introduction	126
9.2	Related Works	126
9.3	Empirical Study	127
9.3.1	Participants	127
9.3.2	Procedure	128
9.4	Results	128
9.4.1	Success	128
9.4.2	Completion Time	128
9.4.3	Accuracy	129
9.4.4	Interaction Evaluation	129
9.5	Discussion and Future Work	130
10	Children’s Acceptance of a Collaborative Problem Solving Game Based on Physical versus Digital Learning Spaces	133
10.1	Introduction	134
10.2	Related Works	135
10.2.1	Single-Display Multi-Touch Environments	135
10.2.2	Multi-Display Multi-Touch Environments	136
10.2.3	Tangible User Interfaces and Physical Spaces	137
10.3	A Robot Board-Based Gamification Approach to Support CPS	138
10.3.1	Designing to Support CPS	138
10.3.2	Quizbot: A CPSbot Game	140
10.4	Evaluation	144
10.4.1	Participants	145
10.4.2	Apparatus	145
10.4.3	Procedure	145
10.4.4	Results	146
10.4.5	Discussion	153
10.5	Conclusions	157
11	Evaluating a Tactile and a Tangible Multi-Tablet Game for Collaborative Learning in Primary Education	159
11.1	Introduction	160
11.2	Background	162
11.2.1	Serious Games for Tactile Mobile Devices	162
11.2.2	Serious Games for Tangible User Interfaces	163

11.2.3	Comparison of Tactile and Tangible Interactions	165
11.3	Quizbot: A Multi-Tablet Game for Collaborative Learning	166
11.3.1	Tactile Version	170
11.3.2	Tangible Version	170
11.4	Evaluation	171
11.4.1	Participants	173
11.4.2	Apparatus	173
11.4.3	Evaluation Instruments	173
11.4.4	Procedure	175
11.4.5	Results	175
11.4.6	Discussion	179
11.5	Conclusions	183

IV Related Exploratory Work 185

12 From Tabletops to Multi-Tablet Environments in Educational Scenarios: A Lightweight and Inexpensive Alternative 187

12.1	Introduction	187
12.2	Technological Infrastructure	188
12.2.1	WeTab: Tracking the Devices	188
12.2.2	MarkAirs: Interacting Above the Surface	190
12.3	Potential Educational Activities	191

13 Tangibot: A Tangible-Mediated Robot to Support Cognitive Games for Ageing People—A Usability Study 193

13.1	Introduction	194
13.2	Related Works	195
13.3	Technological Platform	197
13.4	Usability Evaluation	199
13.4.1	Apparatus and Participants	200
13.4.2	Tasks and Procedure	200
13.4.3	Design	202
13.4.4	Results	202
13.4.5	Discussion	208
13.4.6	Threats to Validity	211
13.5	Designing Cognitive Games for Ageing People with Tangibot	211
13.5.1	Age-Related Reduction of Cognitive Abilities	211
13.5.2	Examples of Cognitive Games	212
13.6	Conclusions	215

14 Augmented Tangible Surfaces to Support Cognitive Games for Ageing People 217

14.1	Introduction	218
14.2	Related Works	219

14.3 Designing the Prototype	220
14.4 A Game to Stimulate Cognitive Abilities for the Elderly	222
14.5 Conclusions and Future Work	223
V Closure	225
15 Discussion	227
15.1 On Optical Mid-Air ADIs	228
15.2 On Companion-Based ADIs	230
16 Conclusions and Future Work	233
Bibliography	237
