List of Figures xxi

List of Tables xxv

Abbreviations and Acronyms xxvii

1 Introduction 1

1.1 Motivation 1

1.2 Objectives 3

1.3 Contributions to knowledge 3
1.4 Thesis structure 4

2 Approaching the brain as a complex network 7

2.1 Brain connectivity 7
2.2 Network science 9
2.3 The brain network analysis process based on MRI 15
2.3.1 MRI data acquisition 15
2.3.2 MRI data preprocessing 18
2.3.3 Brain network reconstruction: defining nodes and edges 22
2.3.4 Brain network analysis 24
2.4 Summary 30

3 Structural and functional brain networks in the cerebral cortex of the rat 33

3.1 Introduction 34
3.2 Materials and methods 35
3.2.1 Animals and MRI acquisition protocol 35
3.2.2 Preprocessing of MRI data 36
3.2.3 Rat connectome and definition of brain areas 37
3.2.4 Construction of functional brain networks 40
3.2.5 Modularity 40
3.2.6 Reciprocity 44
3.2.7 Network motifs 45
3.3 Results 47
3.3.1 Characterization of structural connectivity and rs-fMRI-derived functional connectivity 47
3.3.2 Relationship between functional modules and structural network-level patterns 52
3.4 Discussion 54
3.4.1 Role of higher-order patterns in shaping cortical functional modular organization 56
3.4.2 Construction of brain graphs 58

3.4.3 Relevance of data preprocessing: global signal regression . . . 59
3.4.4 Effect of anesthesia on functional connectivity 60
3.5 Conclusions 61

4 Structural brain network deterioration associated with Alzheimer's disease 63

4.1 Introduction 64
4.2 Materials and methods 65
4.2.1 Participants and MRI acquisition protocol 65
4.2.2 Preprocessing of MRI data and construction of structural brain networks 68
4.2.3 Mathematical models 70
4.2.4 Feature extraction and machine learning analysis 73
4.3 Results 83
4.3.1 Diagnosis of dementia caused by Alzheimer's disease 83
4.3.2 Predictions in the simulated disease progression 90
4.4 Discussion 93
4.4.1 Prediction of Alzheimer's disease using real-world data 94
4.4.2 Discriminative brain signatures of dementia 95
4.4.3 Spreading process and Alzheimer's disease 95
4.4.4 Network alterations in the simulated disease progression . . . 96
4.4.5 Limitations 97
4.5 Conclusions 98

5 Functional brain network alterations in alcohol use disorder 99

5.1 Introduction 100
5.2 Materials and methods 101
5.2.1 Animals and MRI acquisition protocol 101
5.2.2 Preprocessing of MRI data 102
5.2.3 Construction of functional brain networks 103
5.2.4 Network-based statistic 103
5.3 Results and discussion 104

5.4 Conclusions 108

6 Conclusion 111
