Abstract	i
Resumen	iii
Resum	vi
Acronyms	ix
Acknowledgements	xii
Chapter 1. Introduction.....	1
1.1 Metallic species in porous materials probed by XAS	3
<i>1.1.1 Supported metal nanoparticles</i>	6
<i>1.1.2 Metal-exchanged zeolites and isomorphous substitution</i>	24
Chapter 2. Objectives.....	45
Chapter 3. Experimental section.....	49
3.1 Preparation of Pd-based catalysts	51
3.2 Preparation of Ag-zeolites	52
<i>3.2.1 Synthesis of zeolites</i>	52
<i>3.2.2 Ion-exchange process (Ag incorporation)</i>	55
<i>3.2.3 Ion-exchange process (Cs removal)</i>	56
<i>3.2.4 Metal reduction and reoxidation</i>	56
<i>3.2.5 SCO-NH₃ catalytic experiments</i>	57
3.3 Characterization by laboratory techniques	58

<i>3.3.1 Chemical analysis by Inductively Coupled Plasma Optical Emission Spectrometry (ICP-OES).....</i>	58
<i>3.3.2 Thermogravimetric analysis.....</i>	58
<i>3.3.3 X-ray powder diffraction (XRD)</i>	59
<i>3.3.4 Textural properties.....</i>	60
<i>3.3.5 Field Emission Scanning Electron Microscopy (FESEM).....</i>	61
<i>3.3.6 Transmission Electron Microscopy (TEM)</i>	61
<i>3.3.7 CO chemisorption.....</i>	61
<i>3.3.8 ^{29}Si, ^{27}Al and ^{109}Ag MAS NMR.....</i>	62
<i>3.3.9 UV-Vis spectroscopy.....</i>	63
3.4 XAS measurements.....	63
<i>3.4.1 Synchrotron radiation.....</i>	64
<i>3.4.2 Interaction of X-ray with matter, XAS and related phenomena.....</i>	68
<i>3.4.3 XAS experiment and data treatment.....</i>	79
<i>3.4.4 Technique limitations.....</i>	83
<i>3.4.5 Beamlines specifications.....</i>	84
<i>3.4.6 Sample environment.....</i>	84
<i>3.4.7 Measurement protocol for Pd-based catalysts.....</i>	85
<i>3.4.8 Measurement protocol for Ag-based catalysts.....</i>	86
<i>3.4.9 Data treatment.....</i>	88
Chapter 4. XAS study on formation of precursor-dependent Pd nanoparticles.....	95
4.0 Introduction.....	97

4.1 Results and Discussion.....	99
<i>4.1.1 Characterization of supports and Pd-based catalysts.....</i>	99
<i>4.1.2 Characterization of activation process of catalysts by XAS.....</i>	104
4.2 Conclusions.....	136
4.3 Appendix.....	138
Chapter 5. Zeolite-driven Ag species during redox treatments and catalytic implications for SCO of NH₃.....	141
5.0 Introduction.....	143
5.1 Results and Discussion.....	146
<i>5.1.1 Characterization of as-made and ex situ thermally-activated Ag-exchanged zeolites.....</i>	147
<i>5.1.2 In situ characterization of Ag-loaded zeolites during thermal treatments in oxidative and inert atmospheres.....</i>	169
<i>5.1.3 Nanoparticles formation and silver redispersion on Ag-loaded zeolites by thermal treatments.....</i>	176
<i>5.1.4 Catalytic implications of different activated Ag-loaded zeolites for SCO-NH₃.....</i>	196
5.2 Conclusions.....	203
5.3 Appendix.....	205
Chapter 6. References.....	215
Chapter 7. General conclusions.....	237

Chapter 8. Other works.....	241
