|---|-----|
| Abstract  | vii |
| Contents  | xv  |
| 1 Introduction  | 1   |
| 1.1 State of the Art  | 2   |
| 1.1.1 Electromagnetics in the Healthcare                                  | 2   |
| 1.1.2 Standardization of Wireless Medical Systems                         | 4   |
| 1.1.3 Revision of Current Standard for Next Generation of In-body Devices | 6   |
| 1.2 Motivation and Scope  | 8   |
| 1.3 Thesis Overview   | 9   |
| 1.4 Scientific Publications   | 11  |
| 1.5 Academic Contributions  | 13  |
| 2 Experimental Measurement Setup  | 15  |
| 2.1 Introduction  | 16  |
| 2.1.1 Reproducing the Propagation through Living Tissues                  | 16  |
| 2.1.2 Frequency-Domain Channel Sounder                                    | 19  |

|  |     |
|--|-----|
| 2.2 Phantom-based Measurements . . . . .                             | 20  |
| 2.2.1 UWB Phantom. . . . .   | 20  |
| 2.2.2 Measurement Setup . . . . .                                    | 23  |
| 2.3 <i>In vivo</i> Measurements. . . . .                             | 32  |
| 2.3.1 Living Animal Subject . . . . .                                | 32  |
| 2.3.2 Measurement Setup . . . . .                                    | 32  |
| <br>   |     |
| 3 UWB Biomedical Antennas . . . . .                                  | 39  |
| 3.1 Introduction . . . . .   | 40  |
| 3.1.1 Antenna Fundamentals. . . . .                                  | 40  |
| 3.1.2 Overview of UWB antennas for Biomedical Applications . . . . . | 44  |
| 3.2 UWB Implantable Antennas . . . . .                               | 47  |
| 3.2.1 Typical Procedure for In-Body Antenna Models . . . . .         | 47  |
| 3.2.2 Direct Antenna Design Procedure . . . . .                      | 69  |
| 3.3 UWB On-Body Antennas . . . . .                                   | 80  |
| 3.3.1 Simulation setup & Antenna Candidates . . . . .                | 82  |
| 3.3.2 Simulated Results . . . . .                                    | 85  |
| 3.3.3 Manufacturing & Testing . . . . .                              | 88  |
| <br>   |     |
| 4 UWB Channel Characterization . . . . .                             | 91  |
| 4.1 Introduction . . . . .   | 92  |
| 4.1.1 Promising In-Body Scenarios at UWB Frequencies . . . . .       | 92  |
| 4.1.2 Path Loss Models . . . . .                                     | 93  |
| 4.1.3 Correlation . . . . .  | 94  |
| 4.2 In-Body to In-Body Scenario . . . . .                            | 94  |
| 4.2.1 Preliminary Analysis . . . . .                                 | 94  |
| 4.2.2 In-Body to In-Body Channel Characterization . . . . .          | 96  |
| 4.3 In-Body to On-Body Scenario . . . . .                            | 104 |
| 4.3.1 Path Loss Models . . . . .                                     | 105 |
| 4.3.2 Diversity of the Channel . . . . .                             | 114 |

|          |   |            |
|----------|---|------------|
| <b>5</b> | <b>Diversity Techniques</b>   | <b>121</b> |
| 5.1      | Introduction . . . . .  | 122        |
| 5.1.1    | Time Reversal Technique . . . . .   | 122        |
| 5.1.2    | Maximal-Ratio Combining. . . . .  | 124        |
| 5.1.3    | Reconstruction of the Channel Impulse Response, CLEAN algorithm . . . . . | 125        |
| 5.2      | Time Reversal for In-Body to In-body Communications . . . . .             | 127        |
| 5.2.1    | Configuration & Methodology. . . . .                                      | 127        |
| 5.2.2    | Reciprocity of the Propagation Channel . . . . .                          | 128        |
| 5.2.3    | Results. . . . .  | 130        |
| 5.3      | MRC Technique for In-Body to On-body Communications . . . . .             | 131        |
| 5.3.1    | Measurement setup & Methodology . . . . .                                 | 131        |
| 5.3.2    | Threshold Selection for CLEAN Algorithm . . . . .                         | 132        |
| 5.3.3    | MRC Applied at In-body to On-body Communications . . . . .                | 133        |
| <br>     |   |            |
| <b>6</b> | <b>Conclusions and Perspective</b>  | <b>137</b> |
| 6.1      | Conclusions. . . . .  | 138        |
| 6.2      | Perspective . . . . .   | 141        |
| <br>     |   |            |
| <b>A</b> | <b>Dielectric Properties of Human Body and Tissue-equivalent Phantoms</b> | <b>143</b> |
| <br>     |   |            |
|          | <b>Bibliography</b>   | <b>163</b> |
