I Preliminaries	1
1 Introduction	3
1.1 Motivation	3
1.1.1 Playful Technology for Animals	4
1.1.2 Natural User Interfaces based on Body Tracking.	5
1.2 Research Hypothesis	6
1.3 Research Methodology.	6
1.4 Goals and Contributions	7
1.5 Outline of the Thesis.	9
2 Seven years after the Manifesto: Literature Review and Research Directions for Technologies in Animal Computer Interaction	15
2.1 Introduction	16
2.2 What is ACI?	18
2.2.1 What is Interaction?	19
2.3 Technologies in ACI	21
2.3.1 Model of Technologies within ACI	21
2.3.2 Tangible and Physical Objects.	22

2.3.3 Haptic and Wearable Technologies	27
2.3.4 Olfactory Interfaces	31
2.3.5 Screen Technology	33
2.3.6 Tracking Technologies	37
2.4 Future of Technologies within ACI.	40
2.4.1 Animal-Driven Devices for Enrichment and Work	42
2.4.2 Investigating What Is Interactivity in Animal-Computer Interaction (ACI)	42
2.4.3 Ethics and Agency in Animal-Computer Interaction (ACI)	43
2.4.4 Moving Beyond the Human-Animal-Computer Void.	44
2.5 Conclusions	45
3 Envisioning Future Playful Interactive Environments for Animals	47
3.1 Introduction	48
3.1.1 Animals as Target Users of Digital Systems.	49
3.1.2 Playful Environments as Intelligent Ecosystems	51
3.2 Related Works	52
3.2.1 Computer Interfaces for Animals	52
3.2.2 Playful Experiences within Animal Computer Interaction	55
3.3 Situating Intelligent Playful Environments	59
3.4 Situating Current Playful Environments for Animals	62
3.4.1 Game Participants: Static or Dynamic Approach?.	62
3.4.2 Adapting Computer Interfaces to a Broader Audience: Species Awareness and Interrelationships.	65
3.4.3 Broadening the Horizon: More Devices, More Fun!	66
3.4.4 Decision Making and Adaptation: Who Controls the Controllers?	67
3.5 Application Scenarios for IPE4A	68
3.5.1 Mental Well-being	68
3.5.2 Physical Activity	69
3.5.3 Training	69
3.5.4 Therapy	70
3.6 Challenges and Considerations	70
3.7 Conclusions and Future Work.	72

II	Study and Recognition of Playful Interactions	75
4	Developing a depth-based tracking system for interactive playful environments with animals	79
4.1	Introduction	80
4.2	Related Works	81
4.3	Tracking System.	82
4.3.1	Set-up.	82
4.3.2	Cat Tracking.	82
4.3.3	Human Tracking	85
4.3.4	Object Tracking.	86
4.3.5	Challenges	87
4.4	Applications	87
4.4.1	Intelligent Playful Environments based on Gesture and Posture Recognition	87
4.4.2	Learning Behavioral Habits.	89
4.5	Designing Future Tracking-based Gaming Experiences	90
4.5.1	Tracking Systems for Open Spaces	90
4.5.2	Mixed-reality Games and Embodied Interactions	91
4.6	Conclusions	93
5	Towards Future Interactive Intelligent Systems for Animals: Study and Recognition of Embodied Interactions	95
5.1	Introduction	96
5.2	Related Works	98
5.2.1	Technologically Mediated Playful Systems for Animals	98
5.2.2	Animals' Behavior and Posture Recognition	99
5.3	Playful Interactions with Technology	100
5.3.1	Observational Study	100
5.3.2	Results and Discussion	105
5.4	Behavior Recognition Using Depth-based Tracking.	108
5.4.1	System Description.	109
5.4.2	System Evaluation	112
5.5	Conclusions and Future Work.	114

6 Assessing machine learning classifiers for the detection of animals' behavior using depth-based tracking	117
6.1 Introduction	118
6.2 Related Works	120
6.2.1 Wearable Tracking Systems.	120
6.2.2 Non-wearable Tracking Systems	122
6.3 Tracking System.	124
6.3.1 Equipment and Procedure	125
6.3.2 Processing Depth-based Information	126
6.4 Classification Results and Discussion	127
6.4.1 Supervised Classification of Body Parts and Postures.	128
6.4.2 Knowledge-based Classification of Body Parts and Postures.	131
6.5 Applications within Animal-Computer Interaction	135
6.5.1 Behavior Recognition, Learning Behavioral Habits and Welfare Assessment	135
6.5.2 Playful Environments based on Gesture and Posture Recognition	136
6.5.3 Tracking Systems for Zoo Enrichment and Open Spaces	138
6.6 Conclusions and Future Work.	139
III Tangible User Interfaces for Animal Enrichment	143
7 Tangible User Interfaces for Zoo Enrichment	147
7.1 Introduction	148
7.2 Proposal and Research Agenda	149
7.3 Benefits	150
7.4 Conclusions	150
8 Sound to your Objects: A Novel Design Approach to Evaluate Orangutans' Interest in Sound-based Stimuli	153
8.1 Introduction	154
8.2 Related Works	155
8.3 Design Process.	156
8.3.1 Tangible Interactions.	156
8.3.2 Technical Development	158
8.3.3 Sound-based Enrichment	159

8.4 Conclusion and Future Work 160

IV Interspecies Participatory Design of Playful Interactive Environments 163

9 Interactive spaces for children: gesture elicitation for controlling ground mini-robots 167

9.1 Introduction 168

9.2 Related Works 169

 9.2.1 Children’s Communication with Robots and Interactive Spaces. 169

 9.2.2 Elicitation Studies with Children 171

 9.2.3 Elicitation Studies with Adults 172

9.3 Elicitation Study 173

 9.3.1 Participants 174

 9.3.2 Set-up. 174

 9.3.3 Procedure 175

 9.3.4 Results 177

9.4 Discussion and Future Recommendations 190

9.5 Threats to Validity 195

9.6 Conclusion and Future Work 195

10 Designing interspecies playful interactions: studying children perceptions of games with animals 197

10.1 Introduction. 198

10.2 Related Works 199

 10.2.1 Participatory Design with Children 199

 10.2.2 ACI Playful Interactions and Human Perceptions 200

10.3 Designing Games for Animals 201

 10.3.1 Participants 201

 10.3.2 Procedure and Materials. 201

 10.3.3 Experimental Design 203

 10.3.4 Observational Findings. 204

 10.3.5 Design Results 206

 10.3.6 Questionnaire Results 213

10.4 Discussion	217
10.4.1 Improving Relationships	217
10.4.2 Collaboration	218
10.4.3 Remote Interaction	219
10.4.4 Threats to Validity	219
10.5 Conclusion and Future Work.	220
11 Remote Interspecies Interactions: Improving humans and animals' wellbeing through mobile playful spaces	221
11.1 Introduction.	222
11.2 Related Works	223
11.2.1 Applications for Hospitalized Children	224
11.2.2 Playful Applications for and with Animals.	224
11.2.3 Designing to Improve Relationships between Humans and Animals.	225
11.3 Technological Platform	226
11.4 Observational Study on Children	228
11.4.1 Participants	228
11.4.2 Methodology and Procedure	228
11.4.3 Observational Results	230
11.4.4 Questionnaire Results	231
11.5 Animal Computer Interaction for Playful Interactive Environments.	234
11.5.1 Participants	235
11.5.2 Interactive Playful Environment for Dogs: Remote vs. Pervasive	235
11.5.3 Observational Results	238
11.5.4 Threats to Validity	239
11.6 Discussion	240
11.6.1 Remote Mobile Games for Children's Wellbeing	240
11.6.2 Improving the Human-Animal Relationship	242
11.6.3 Shaping the Future of Pervasive Interactive Spaces for Animals.	243
11.7 Conclusion and Future Work.	244
V Closure	247
12 Discussion	249
12.1 On NUIs for the Detection of Animals' Behaviors.	250

12.2 On NUIs Adaptation to Different Species and Contexts	252
12.3 On Human Participation in Playful Interactive Spaces for Animals	254
13 Conclusions and Future Work	259
Bibliography	263
Figures	305
Tables	311
