Abstract xv

List of figures xv

List of tables xxi

Contents xxiii

1 Thesis overview 1

1.1 Background. 1

1.2 Motivation and Thesis Structure. 3

2 Introduction to fiber Bragg grating devices and applications 9

2.1 Fiber Bragg gratings. 9

2.1.1 Synthesis of fiber Bragg gratings 12

2.1.2 Sensitivity of fiber Bragg gratings 13

2.1.3 Types of fiber Bragg gratings 14

2.1.4 Manufacturing of FBGs 17
2.1.5 Measurement of fiber Bragg grating sensors 20

3 Amplitude encoded Super-structured FBG sensors 31

3.1 Introduction 31
3.2 Amplitude encoded sensors: Design 35
3.2.1 Detection process 38
3.3 Modeling the encoded FBG sensors 43
3.3.1 Parameters influence 43
3.3.2 Overlapping scenarios 50
3.3.3 Synthesis and manufacturing of the SSFBG devices 55
3.4 Experimental results 56
3.4.1 Characterization of the devices 57
3.4.2 Overlapping detection 60
3.4.3 Error assessment 62
3.5 Conclusion 67

4 Phase and amplitude encoded sensors 73

4.1 Introduction 73
4.2 Principle 78
4.2.1 Design 78
4.2.2 Interrogation 81
4.3 Experimental Results and Discussion 85
4.3.1 Wavelength detection 85
4.3.2 SSFBG devices manufacturing and characterization 87
4.3.3 Experimental validation 92
4.4 Conclusions 95

5 Interrogation of complex sensing devices: Discrete Prolate Spheroidal Sequences 99

5.1 Introduction 99

5.2 DPSS structures: Principle and manufacturing 100
5.2.1 Demodulation 103
5.3 Experimental validation 108
5.3.1 Frequency modulation at 8 GHz 110
5.3.2 Frequency modulation at 14 GHz 111
5.3.3 Discussion 111
5.4 Conclusion 113

6 Conclusions and future work 115

6.1 Conclusions 115
6.1.1 Amplitude encoding of FBG sensors 116
6.1.2 Amplitude & Phase encoding of FBG sensors 117
6.2 Future work 119
6.3 Journal papers 121
6.4 Conference papers 122
