

ÍNDICE TESIS (Eduardo Javier Pérez Sánchez)

1 Introduction

1.1 Motivation of the study and background	1
1.2 Objectives	6
1.3 Document structure	7
References	8

2 Bibliographical review

2.1 Introduction	12
2.2 Fluid mechanics equations	15
2.3 Turbulence theory.....	20
2.3.1 Introduction and fundamentals	20
2.3.2 Statistical description of turbulence	25
2.3.3 Turbulence models	33
2.3.3.1 Introduction to the different approaches	33
2.3.3.2 Turbulent fluxes modelling	38
2.3.3.3 RANS turbulence models	41
2.3.3.4 LES turbulence models	45
2.4 Combustion theory	48
2.4.1 Auto-ignition	48
2.4.2 Laminar combustion	56
2.4.2.1 Premixed combustion	56
2.4.2.2 Non-premixed combustion	58
2.4.3 Turbulent combustion	63
2.4.3.1 Premixed combustion	64
2.4.3.2 Non-premixed combustion	66
2.4.3.3 Partially premixed combustion	68
2.4.3.4 Combustion models	69
2.5 Spray description and theory	77
2.5.1 Gas-gas jet	77
2.5.2 Liquid-gas spray	81
2.5.3 General comments on the reactive spray	83
2.5.4 The reacting diesel spray	84
References	89

3 Combustion model description and validation

3.1 Introduction and overview to the flamelet concept	97
3.2 Description of the model	107
3.2.1 Initial and boundary conditions	110

3.2.2 Flamelet equations	111
3.2.2.1 The DF model	111
3.2.2.2 The ADF model	113
3.2.3 Turbulent combustion database	125
3.2.4 Flamelet model and CFD coupling	132
3.3 Validation of the ADF model	137
3.3.1 Steady regime	140
3.3.2 Unsteady regime	147
3.3.3 Conclusions	157
3.4 Conclusions	160
References	161

4 Analysis of the diesel spray in the RANS framework

4.1 Introduction	165
4.2 Boundary conditions	169
4.3 Mesh and model description	169
4.4 Results and discussion	171
4.4.1 Homogeneous reactor results	172
4.4.2 Flamelet results	179
4.4.3 Turbulent diesel-like flame	182
4.4.3.1 Set-up of the model	183
4.4.3.2 Flame metrics	186
4.4.3.3 Spray auto-ignition	190
4.4.3.4 Flame structure during quasi-steady regime	197
4.4.3.5 Influence of C_χ	217
4.5 Conclusions	221
Appendix	223
References	229

5 Analysis of the diesel spray in the LES framework

5.1 Introduction	233
5.2 Boundary conditions	235
5.3 Mesh and model description	235
5.4 Results and discussion	238
5.4.1 Set-up of the model	238
5.4.2 Flame metrics	243
5.4.3 Instantaneous filtered fields	247
5.4.4 Comparison between RANS and LES simulations	253
5.5 Conclusions	255
References	257

6 Conclusions and future works

6.1 Conclusions	261
6.2 Future works	264

References	265
