Abstract	v
Resumen	vii
Resum	ix
Acknowledgements	xi
List of Figures	xvii
List of Tables	xxiii
1 Introduction	1
1.1 Motivation and objective	1
1.2 Thesis organization	3
2 Inverse Methods in Hydrogeology: Trajectory and Future Trends (<i>submitted to Journal of Hydrology</i>)	5
Abstract	5
2.1 Introduction	5
2.1.1 The forward problem and the inverse problem	6
2.1.2 Why is the inverse problem necessary?	7
2.1.3 Why is the inverse problem difficult?	7
2.1.4 Outline of the paper	9
2.2 Evolution of inverse methods	10
2.2.1 Direct approach or indirect avenue?	10
2.2.2 Linearization or not?	11
2.2.3 Deterministic estimation or stochastic simulation?	13
2.2.4 Minimization or sampling?	16
2.2.5 Real time integration or not?	19
2.2.6 Preserve prior structure or not?	22
2.2.7 MultiGaussian or not?	26
2.2.8 Trajectory of inverse approaches to date	27

2.3	Recent trend of inverse methods	29
2.3.1	Integrating multi-sources information	29
2.3.2	Combining high-order moments	30
2.3.3	Multiscale problem	30
2.4	Conclusions	31
	Bibliography	33
3	An Approach to Handling Non-Gaussianity of Parameters and State Variables in Ensemble Kalman Filtering (<i>published in Advances in Water Resources</i>)	47
	Abstract	47
3.1	Introduction	48
3.2	Methodology	51
3.2.1	Flow and transport equations	52
3.2.2	Standard EnKF	52
3.2.3	Normal-score EnKF	54
3.3	Synthetic experiment	57
3.4	Performance assessment measures	61
3.5	Results and discussion	62
3.5.1	Standard EnKF versus NS-EnKF	62
3.5.2	Parameter sensitivity on NS-EnKF	72
3.5.3	Discussion	79
3.6	Conclusions	82
	Bibliography	85
4	Pattern Recognition in a Bimodal Aquifer using the Normal-Score Ensemble Kalman Filter (<i>submitted to Mathematical Geosciences</i>)	91
	Abstract	91
4.1	Introduction	92
4.2	The NS-EnKF	93
4.3	Synthetic example	94
4.4	Results and discussions	97
4.4.1	Spatial variety characterization of lnK	97
4.4.2	Prediction capacity of updated lnK	102
4.5	Conclusions	105
	Bibliography	109
5	A Pattern Search Based Inverse Method (<i>submitted to Water Resources Research</i>)	113
	Abstract	113
5.1	Introduction	114
5.2	Methodology	116

5.2.1	Flow chart of the algorithm	116
5.2.2	Distance function	122
5.3	A synthetic example	123
5.4	Results and discussions	125
5.4.1	Hydraulic conductivity characterization	125
5.4.2	Prediction capability of the updated model	127
5.5	A comparison test	131
5.5.1	Reference	131
5.5.2	Prior model and conditioning data	133
5.5.3	Calibrated model	133
5.6	Conclusions	135
	Bibliography	141
6	General Conclusions	147
6.1	Summary	147
6.2	Recommendations for future research	149
	Bibliography	151
	Appendix	153
A	Normal-score transform	153
