Abstract xiii

Resumen xv

Resum xvii

Presentation xix

Part I Preliminaries

1 State-of-the-art of Smoothing and Sharpening 3
1.1 Introduction 3
1.2 Smoothing 4
1.3 Sharpening 10
1.4 Simultaneous Smoothing and Sharpening 14

References 23

2 Assessment of color image denoising and sharpening methods 31
2.1 Full-Reference Image Quality Assessment 34
2.2 Reduced-Reference Image Quality Assessment 36
2.3 Non-Reference Image Quality Assessment 37

References 41

3 Graph Theory 45
3.1 Basic Graph Theory 45
3.2 Paths, Trees and Connectivity 50
3.3 Graph representations 54

References 57

Part II Model based on Graph Theory

4 Model based on Graph Theory for Color Image processing 61
4.1 Modeling color images with Graph Theory: Introduction 61
4.2 Definition of the model 63
4.3 A edge detector based on the graph-model 68

References 73

Part III Applications of the model

Introduction 77

5 Contribution (i) 79
Pérez-Benito, C., Morillas, S., Jordán, C., Conejero, J. A. (2018). A model based on local graphs for colour images and its application for Gaussian noise smoothing. *Journal of Computational and Applied Mathematics*, 330, 955-964. 79
Abstract 79
5.1 Introduction 79
5.2 Image model based on local graphs 81
5.3 A characterization of colour image pixels for smoothing 82
5.4 Proposed hybrid smoothing method 85
5.5 Experimental results 87
Conclusions 90

References 93

6 Contribution (ii) 99
Pérez-Benito, C., Jordán, C., Conejero, J. A., Morillas, S. (2018). Graph-based methods for simultaneous smoothing and sharpening of color images. *Journal of Computational and Applied Mathematics*, 350, 380-395. 99
Abstract 99
6.1 Introduction 99
6.2 Local graphs for color image modeling 102
6.3 Proposed methods for simultaneous smoothing and sharpening 104
6.4 Experimental results 109
Conclusions 118

References 121

Part IV Conclusions and Future Work

7 Conclusions and Future Work 127
7.1 Overall conclusions 127
7.2 Future work 128
