

# Contents

|       |   |    |
|-------|---|----|
| 1     | Introduction  | 7  |
| 1.1   | Motivation  | 7  |
| 1.2   | Objectives  | 8  |
| 1.3   | Main Contributions  | 8  |
| 1.4   | Framework   | 10 |
| 1.5   | Outline   | 11 |
| 2     | Background  | 13 |
| 2.1   | Anatomy of the Retina   | 13 |
| 2.2   | Types of Glaucoma   | 14 |
| 2.3   | Imaging Technology  | 17 |
| 2.3.1 | Fundus photographs  | 17 |
| 2.3.2 | Optical Coherence Tomography  | 18 |
| 2.4   | Retinal Image Analysis for Automatic Glaucoma Assessment                | 20 |
| 2.4.1 | Optic Disc and Optic Cup Segmentation                                   | 20 |
| 2.4.2 | Glaucoma Classification and Retinal Image Synthesis using Deep Learning | 22 |

|       |   |     |
|-------|---|-----|
| 3     | Materials   | 27  |
| 3.1   | Private Databases   | 27  |
| 3.2   | Public Databases  | 28  |
| 4     | Optic Disc and Optic Cup Segmentation                                   | 35  |
| 4.1   | Stochastic-watershed-based approach                                     | 35  |
| 4.2   | U-Net-based approach  | 44  |
| 4.2.1 | Convolutional Neural Networks (CNNs)                                    | 44  |
| 4.2.2 | U-Net architecture  | 48  |
| 4.3   | Results   | 50  |
| 4.4   | Discussion  | 57  |
| 5     | Glaucoma Classification and Retinal Image Synthesis using Deep Learning | 61  |
| 5.1   | Convolutional Neural Networks (CNNs) for Glaucoma Assessment            | 61  |
| 5.2   | Ensemble Setting with CNNs  | 68  |
| 5.3   | Retinal Image Synthesis and Semi-supervised Learning                    | 69  |
| 5.4   | Results   | 74  |
| 5.5   | Discussion  | 93  |
| 6     | Conclusions   | 95  |
|       | Merits  | 99  |
|       | Bibliography  | 101 |
