Table of contents

Abstract **5**

Acknowledgements **11**

List of Figures **17**

List of Tables **21**

1 Introduction **23**
1.1 Wireless Capsule Endoscopy 23
1.2 Motivation and Scope 25
1.3 Thesis Outline 26
1.4 Scientific Publications 28

2 State of the Art **31**
2.1 Overview of WCE Localization System 31
2.2 Ultra-Wideband (UWB) for next-generation WCE 32
2.3 WCE localization techniques 33
2.4 RF localization at UWB frequencies 37

3 Scenarios and Methodology **39**
3.1 Application Scenario 39
3.2 Data Collection for RF Localization 40
3.2.1 Frequency Domain Channel Sounding 41
3.2.2 Experimental Laboratory Measurements 42
3.2.2.1 UWB phantom models 42
3.2.2.2 Homogeneous phantom-based campaigns . . . 44
3.2.2.3 Heterogeneous phantom-based campaign . . . 49
3.2.3 Software Simulations 51
3.2.4 *In Vivo* Measurements 53
3.2.4.1 Living animal subjects 53
3.2.4.2 First experiment 53

3.2.4.3 Second experiment . . . 56
3.2.4.4 Third experiment . . . 58
3.3 Offline RF-based Localization . . . 61
3.3.1 Ranging distance estimation . . . 61
3.3.1.1 Received Signal Strength (RSS) . . . 61
3.3.1.2 Time of Arrival (ToA) . . . 63
3.3.2 Coordinates Estimation . . . 64
3.3.2.1 1D Localization . . . 64
3.3.2.2 2D Localization . . . 65
3.3.2.3 3D Localization . . . 66

4 Localization Results and Discussion 69
4.1 Performance Metrics . . . 69
4.2 1D Positioning . . . 71
4.2.1 RSS-based localization . . . 71
4.2.2 ToA-based localization . . . 74
4.3 2D Positioning . . . 76
4.3.1 RSS-based localization . . . 76
4.3.1.1 Homogeneous Phantom . . . 76
4.3.1.2 Heterogeneous Phantom . . . 78
4.3.2 ToA-based localization . . . 81
4.4 3D Positioning . . . 83
4.4.1 RSS-based localization . . . 83
4.4.1.1 Simulations . . . 83
4.4.1.2 *In Vivo* . . . 87
4.4.2 Hybrid RSS/AoA localization . . . 93
4.5 Effect of Receivers Distribution on Localization Accuracy . . . 96
4.6 Summary and Discussion . . . 102

5 Real-Case Application: HemoPill Localization 105
5.1 Detection of Upper Gastrointestinal bleeding: HemoPill . . . 105
5.1.1 Introduction . . . 105
5.1.2 Design and Working Principle . . . 107
5.2 Measurements Setup . . . 108
5.2.1 Ovesco RAMCE System . . . 108
5.2.2 HemoPill Testbed . . . 109
5.3 RSS-based Localization Results . . . 111

6 Conclusions and Future Trends 115
6.1 Conclusions . . . 116
6.2 Future Directions . . . 119

A Graphical User Interface (GUI) 121
