

# TABLE OF CONTENTS

|  |           |
|--|-----------|
| <b>ABSTRACT .....</b>  | <b>7</b>  |
| <b>RESUMEN .....</b>   | <b>11</b> |
| <b>RESUM .....</b>   | <b>15</b> |
| <b>ACKNOWLEDGEMENTS .....</b>                                    | <b>19</b> |
| <b>TABLE OF CONTENTS .....</b>                                   | <b>21</b> |
| <b>LIST OF FIGURES .....</b>                                     | <b>25</b> |
| <b>LIST OF TABLES .....</b>                                      | <b>33</b> |
| <b>NOMENCLATURE .....</b>  | <b>35</b> |
| <b>CHAPTER 1. INTRODUCTION .....</b>                             | <b>37</b> |
| <b>1.1 Motivation .....</b>                                      | <b>37</b> |
| <b>1.2 Present Contribution and Objectives .....</b>             | <b>39</b> |
| <b>1.3 Thesis Outline .....</b>                                  | <b>42</b> |
| <b>CHAPTER 2. LITERATURE SURVEY .....</b>                        | <b>45</b> |
| <b>2.1 Introduction .....</b>                                    | <b>45</b> |
| <b>2.2 Experimental Observations in Cavitating Nozzles .....</b> | <b>46</b> |
| <b>2.3 Cavitation-Modelling Approaches and Validation .....</b>  | <b>67</b> |
| 2.3.1 Barotropic equation approach .....                         | 69        |
| 2.3.2 Bubbly mixture approach .....                              | 74        |

2.4 Studies taking into account needle displacement..... 87

2.5 Summary..... 95

**CHAPTER 3. RESEARCH TOOLS ..... 99**

3.1 Introduction..... 99

3.2 Numerical Models..... 99

3.2.1 Governing equations for fluid flow ..... 100

3.2.2 Equations of moving mesh operations ..... 100

3.2.3 Turbulence equations ..... 101

3.2.4 Cavitation modelling..... 103

3.3 Experimental Facilities..... 105

3.3.1 Experimental apparatus and operating conditions ..... 105

3.3.2 Internal geometry characterization ..... 107

3.4 Summary..... 110

**CHAPTER 4. VALIDATION OF THE CAVITATION MODEL WITH AN ACADEMIC STUDY ..... 111**

4.1 Introduction..... 111

4.2 Computational Domain and Grid Independence Results..... 112

4.3 Turbulence Modelling Study..... 114

4.4 Set-up of Numerical Method ..... 117

4.5 Validation Results ..... 119

4.5.1 Injection rate results ..... 120

4.5.2 Velocity profiles..... 122

4.5.3 Pressure profiles and fields ..... 124

4.6 Further Analysis of the Predicted Flow Field Results ..... 126

4.7 Summary..... 128

**CHAPTER 5. CAVITATION IN REAL SIZE INJECTORS AT FULL NEEDLE LIFT ..... 131**

**5.1 Introduction..... 131**

**5.2 Investigated Computational Domains..... 132**

**5.3 Nozzle flow characterization..... 134**

**5.4 Validation results..... 135**

**5.5 Analysis of the Flow Cavitation Pattern ..... 141**

    5.5.1 Predicted flow in single-hole Diesel injectors ..... 141

    5.5.2 Predicted flow in multi-hole Diesel injectors ..... 146

**5.6 Summary..... 155**

**CHAPTER 6. EFFECT OF THE NEEDLE MOVEMENT ON THE NOZZLE FLOW ..... 157**

**6.1 Introduction..... 157**

**6.2 Moving mesh strategy..... 157**

**6.3 Results obtained by Moving Needle Simulations ..... 166**

    6.3.1 Predicted flow in single-hole Diesel injectors ..... 166

    6.3.2 Predicted flow of multi-hole Diesel injectors..... 174

**6.4 Summary..... 188**

**CHAPTER 7. COMPARATIVE STUDY OF QUASI-STEADY AND MOVING MESH SIMULATIONS ..... 193**

**7.1 Introduction..... 193**

**7.2 Fixed needle lift strategy ..... 194**

**7.3 Results obtained by Fixed Needle Lift Simulations..... 195**

    7.3.1 Predicted flow of multi-hole Diesel injectors (symmetry of the injector) .... 195

    7.3.2 Predicted flow of multi-hole Diesel injectors (whole injector)..... 217
