Abstract	i
Abbreviation and Acronyms	vii
Notations and Conventions	ix
Acknowledgments	xv
1 Introduction and Scope	1
1.1 Introduction	1
1.2 Motivation and scope of the thesis	2
1.3 Organization of the thesis	5
2 The Sound Field in an Enclosed Space	9
2.1 Introduction	10
2.2 Sound waves propagation	10
2.2.1 Free field sound propagation	11
2.2.2 Sound pressure and particle velocity	12
2.2.3 Plane waves	12

2.2.4	Spherical waves	15
2.2.5	Acoustic Impedance	17
2.2.6	Sound energy density and sound intensity	18
2.2.7	Reflection and absorption of acoustic waves	20
2.2.7.1	Reflection	20
2.2.7.2	Absorption	22
2.3	Sound in an enclosed space	25
2.3.1	Sound propagation within rooms	26
2.3.1.1	The direct sound	28
2.3.1.2	Early reflections	29
2.3.1.3	The reverberant sound	30
2.3.1.4	The room impulse response	31
2.3.2	Room acoustics approaches	34
2.3.2.1	Quasi-plane wave approach	34
2.3.2.2	Statistical approach	35
2.3.2.3	Wave equation approach	40
2.3.3	Room-acoustic quality parameters	45
2.3.3.1	Reverberation time, RT	46
2.3.3.2	Early decay time, EDT	47
2.3.3.3	Clarity, C_{80}	47
2.3.3.4	Definition, D_{50}	48
2.3.3.5	Centre time, TS	48
2.3.3.6	Just noticeable differences, jnd	48
2.4	Summary	49

3 Room Acoustics Modelling Techniques 51

3.1	Introduction	51
3.2	Statistical methods	52
3.3	Wave methods	54
3.3.1	Frequency domain	55
3.3.1.1	Finite Element Method	56
3.3.1.2	Boundary Element Method	57
3.3.2	Time Domain	58
3.3.2.1	Finite-Difference Time-Domain	58
3.3.2.2	Digital Waveguide Mesh	60
3.4	Geometrical methods	60
3.4.1	Ray-tracing	64
3.4.2	Image-source	65
3.4.3	Acoustical radiosity	67
3.4.4	Room-acoustic rendering equation	69
3.4.5	Acoustic diffusion equation model	70
3.5	Discussion	72
3.5.1	About room acoustics simulation methods	72
3.5.2	About diffuse reflection	73
3.5.3	About numerical techniques	75
4	The Radiative Transfer Model for Sound Field Modelling in Rooms	79
4.1	Introduction	80
4.2	Mathematical phase space	81
4.3	Basic variables of the acoustic radiative transfer model	82
4.4	Acoustic radiative transfer model	86

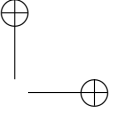

4.4.1	General assumptions	86
4.4.2	Governing acoustic radiative transfer equation	88
4.4.3	General boundary conditions	92
4.5	Derivation of the diffusion equation model from the acoustic radiative transfer equation	93
4.5.1	Technical and mathematical foundations of the acoustic diffusion equation model	93
4.5.1.1	Governing diffusion equation	94
4.5.1.2	Boundary conditions	95
4.5.2	Relation to the acoustic radiative transfer model	97
4.5.2.1	Governing diffusion equation	97
4.5.2.2	Boundary conditions	101
4.6	Derivation of the room-acoustic rendering equation	103
4.6.1	Technical and mathematical foundations of the room-acoustic rendering equation	103
4.6.2	Relation to the acoustic radiative transfer model	104
4.7	Derivation of acoustical radiosity	109
4.7.1	Technical and mathematical foundations of acoustical radiosity	109
4.7.2	Relation to the acoustic radiative transfer model	110
4.8	Discussion about assumptions, advantages and disadvantages	110
4.9	Summary	114
5	Implementation of a Diffusion Equation Model for Sound Field Modelling by a Finite-Difference Scheme	117
5.1	Introduction	117
5.2	Finite-difference schemes for the acoustic diffusion model	119

5.2.1	Forward-time centred-space scheme	120
5.2.1.1	Governing equation discretisation	120
5.2.1.2	Boundary conditions discretisation	121
5.2.1.3	Von Neumann analysis	124
5.2.1.4	Suitability	126
5.2.2	Analysis of other schemes	127
5.2.3	Dufort-Frankel scheme	129
5.2.3.1	Governing equation discretisation	129
5.2.3.2	Boundary conditions discretisation	129
5.2.3.3	Von Neumann analysis	130
5.3	Evaluation of the implementations	132
5.3.1	Spatial resolution	134
5.3.2	Temporal resolution	136
5.3.3	Computational efficiency	139
5.3.4	Comparison with other methods	141
5.4	Summary	144
6	Evaluation and Applicability of the Diffusion Equation Model for Room Acoustics Simulations	147
6.1	Introduction	147
6.2	Simulations in rectangular rooms	149
6.2.1	Air absorption effects	149
6.2.1.1	Introduction	149
6.2.1.2	Analysis	149
6.2.2	Comparison with other diffuse reflection prediction models	152

6.2.2.1	Introduction	152
6.2.2.2	Analysis	153
6.2.3	Limitation in the temporal domain	155
6.2.3.1	Introduction	155
6.2.3.2	Analysis	156
6.3	Simulations in a complex shape room	163
6.3.1	Introduction	163
6.3.2	Analysis	165
6.4	Summary	170
7	Conclusions and Future	
	Research Lines	177
7.1	Summary and conclusions	177
7.2	Contributions of this thesis	178
7.3	Future research lines	181
	Bibliography	185
