

ÍNDICE GENERAL

|  |           |
|--|-----------|
| <b>Capítulo I. Introducción general.....</b>   | <b>1</b>  |
| Estructura de la Tesis Doctoral. Objetivos.....  | 3         |
| 1.1. Escasez de agua.....  | 5         |
| 1.2. Gestión sostenible de los recursos.....   | 11        |
| 1.3. Eficiencia del uso del agua.....  | 16        |
| 1.4. Agricultura inteligente: digitalización.....  | 20        |
| 1.5. Contextualización: agricultura de regadío en el área de estudio.....  | 23        |
| Referencias.....   | 25        |
| <br>   |           |
| <b>Capítulo II. Diseño agronómico de la instalación de riego.....</b>  | <b>35</b> |
| ASSESSMENT OF YIELD AND WATER PRODUCTIVITY OF CLEMENTINE TREES UNDER SURFACE AND SUBSURFACE DRIP IRRIGATION..... | 37        |
| 1. Introduction.....   | 39        |
| 2. Materials and methods.....  | 41        |
| 2.1. Experimental plot.....  | 41        |
| 2.2. Irrigation strategies and experimental design.....  | 43        |
| 2.3. Monitoring soil and plant water status.....   | 46        |
| 2.4. Yield, irrigation water productivity and fruit quality.....   | 47        |
| 2.5. Data analysis.....  | 48        |
| 3. Results.....  | 48        |
| 3.1. Meteorological data and seasonal irrigation volumes.....  | 48        |
| 3.2. Soil water content and plant water status.....  | 51        |
| 3.3. Yield, fruit quality and irrigation water productivity.....   | 55        |

## Índice

|   |           |
|---|-----------|
| 4. Discussion.....  | 58        |
| 5. Conclusions.....   | 62        |
| 6. Acknowledgements.....  | 63        |
| 7. References.....  | 64        |
| <br>  |           |
| <b>Capítulo III. Programación de riego en base a sensores de humedad del suelo.....</b>                 | <b>71</b> |
| MANDARIN IRRIGATION SCHEDULING BY MEANS OF FREQUENCY DOMAIN REFLECTOMETRY SOIL MOISTURE MONITORING..... | 73        |
| 1. Introduction.....  | 75        |
| 2. Materials and methods.....   | 78        |
| 2.1. General approach.....  | 78        |
| 2.2. Experimental plot.....   | 79        |
| 2.3. Critical soil water content definition.....  | 80        |
| 2.4. Critical soil water content standardization.....   | 82        |
| 2.5. Critical soil water content extrapolation.....   | 84        |
| 2.6. Irrigation dose computation.....   | 85        |
| 2.7. Irrigation strategy validation.....  | 87        |
| 3. Results and discussion.....  | 88        |
| 3.1. Critical soil water content determination.....   | 88        |
| 3.2. Critical soil water content standardization and extrapolation.....                                 | 91        |
| 3.3. Irrigation strategy validation.....  | 96        |
| 4. Conclusions.....   | 100       |
| 5. Acknowledgements.....  | 101       |
| 6. References.....  | 102       |

| <b>Capítulo IV. Control del estado hídrico de la planta.....</b>   | <b>117</b> |
| EVALUATING THE USEFULNESS OF CONTINUOUS LEAF TURGOR PRESSURE MEASUREMENTS FOR THE ASSESSMENT OF PERSIMMON TREE WATER STATUS..... | 119        |
| 1. Introduction.....   | 121        |
| 2. Materials and methods.....  | 124        |
| 2.1. Plot and irrigation treatments.....   | 124        |
| 2.2. Leaf turgor monitoring.....   | 126        |
| 2.3. Other plant water status determinations.....  | 127        |
| 2.4. Data analysis.....  | 128        |
| 3. Results.....  | 128        |
| 3.1. Meteorological data conditions.....   | 128        |
| 3.2. Experiment1: L-WW vs. L-DS .....  | 129        |
| 3.2.1. Stem water potential measurements.....  | 129        |
| 3.2.2. Leaf turgor monitoring with the Yara ZIM-probes.....  | 130        |
| 3.3. Experiment 2: L-125-DS vs. V-125-DS.....  | 134        |
| 3.3.1. Stem water potential and trunk diameter measurements.....   | 134        |
| 3.3.2. Leaf turgor monitoring with the Yara ZIM-probes.....  | 135        |
| 4. Discussion.....   | 139        |
| 5. Conclusions.....  | 144        |
| 6. Acknowledgements.....   | 144        |
| 7. References.....   | 145        |
