

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Motivation . . . . .	2
1.2	Environmental Regulations . . . . .	8
1.3	EGR Systems . . . . .	9
1.4	Transient operation . . . . .	12
1.5	Background . . . . .	13
1.6	Objectives . . . . .	15
1.7	Thesis outline . . . . .	17
	Chapter 1 bibliography . . . . .	27
<b>2</b>	<b>Analysis of driving cycles</b>	<b>29</b>
2.1	Introduction . . . . .	30
2.2	Driving cycles . . . . .	31
2.3	Vehicle Model . . . . .	37
2.4	Analysis . . . . .	39
2.5	Comparison of the cycles . . . . .	45
2.6	Conclusion . . . . .	48
	Chapter 2 bibliography . . . . .	50
<b>3</b>	<b>Tools and modelling</b>	<b>51</b>
3.1	Introduction . . . . .	52
3.2	Engine and test cell . . . . .	52
3.3	Performance measurement . . . . .	55
3.4	Emission measurement . . . . .	56
3.5	Transient tests . . . . .	64
3.6	Driving cycle tests . . . . .	66
3.7	Data analysis procedure . . . . .	68
3.8	Simulation . . . . .	70
	Chapter 3 bibliography . . . . .	88
<b>4</b>	<b>Hybrid EGR strategies</b>	<b>89</b>
4.1	Introduction . . . . .	90
4.2	Engine model . . . . .	92
4.3	Model validation . . . . .	96

4.4	EGR Split Index . . . . .	97
4.5	Methodology . . . . .	99
4.6	Parametric study . . . . .	101
4.7	ESI Optimization . . . . .	120
4.8	Conclusion . . . . .	127
	Chapter 4 bibliography . . . . .	133
<b>5</b>	<b>Transient EGR strategies</b>	<b>135</b>
5.1	Introduction . . . . .	136
5.2	Methodology . . . . .	138
5.3	Analysis . . . . .	141
5.4	Conclusions . . . . .	154
	Chapter 5 bibliography . . . . .	159
<b>6</b>	<b>A quasi-steady prediction of NOx during transients and real driving cycles</b>	<b>161</b>
6.1	Introduction . . . . .	162
6.2	NOx mapping . . . . .	163
6.3	Methodology . . . . .	165
6.4	Load transient prediction . . . . .	165
6.5	RDE cycle prediction . . . . .	168
6.6	Conclusion . . . . .	174
	Chapter 6 bibliography . . . . .	178
<b>7</b>	<b>Conclusions and Future Work</b>	<b>179</b>
7.1	Introduction . . . . .	180
7.2	Conclusions . . . . .	180
7.3	Future work . . . . .	183
	Chapter 7 bibliography . . . . .	185
	<b>Global bibliography</b>	<b>187</b>
