<b>ACKNOWLEDGEMENTS</b> .....	iii
<b>ABSTRACT</b> .....	iv
<b>RESUMEN</b> .....	v
<b>RESUM</b> .....	vi
<b>1 An overview of Terahertz waves</b> .....	<b>1</b>
1.1 Terahertz generation and detection .....	1
1.2 Terahertz applications.....	10
<b>2 Dielectric substrate-based polarizer</b> .....	<b>13</b>
2.1 Polarizer theory.....	14
2.2 Analysis of the THz response of a simple periodic graphite-based structure 27	
2.2.1 Graphite-based polarizer fabrication .....	27
2.2.2 Experimental results.....	28
2.2.3 Conclusion .....	31
2.3 Flexible Sub-THz Metal Wire Grid Polarizer Based on an EGaln <sub>24.5</sub> Alloy 32	
2.3.1 EGaln <sub>24.5</sub> based polarizer fabrication: drawing.....	32
2.3.2 Experimental results.....	34
2.3.3 Conclusion .....	36
2.4 Printing sub-THz wire grid polarizers using a composite liquid metal ink 38	

2.4.1	EGaIn <sub>24,5</sub> based polarizer fabrication: printing.....	38
2.4.2	Experimental results .....	39
2.4.3	Conclusion.....	41
3	Fast quantitative characterization of defects with fixed-delay THz sensors	44
3.1	Fixed delay sensing .....	44
3.2	Principle of operation .....	46
3.2.1	Performance analysis.....	48
3.3	Experimental results .....	50
3.3.1	Void detection and characterization .....	51
3.3.2	Thickness measurement .....	53
3.4	Conclusion.....	54
4	Dielectric - based beam profiler .....	56
4.1	Beam profiling fundamentals .....	56
4.2	Principle of operation .....	60
4.3	Diffraction .....	61
4.4	Numerical simulation.....	63
4.5	Experimental results.....	66
4.6	Conclusion .....	69
5	Conclusion.....	71
	Bibliography.....	75
	Acronyms and abbreviations.....	85
	Publications derived from the Thesis .....	87
I.	Annex – Mathematical study of diffraction on the slit.....	88
