

Summary	11
Resumen	13
Resum	16
Abbreviations	21
General introduction	25
1. Virus concept	27
2. Alfalfa mosaic virus (AMV)	28
2.1. Origin, geographical distribution and economic impact	28
2.2. Viral transmission and symptomatology	29
2.3. Genome organization and life cycle	30
2.3.1. Replication, translation and encapsidation	32
2.3.2. Cell-to-cell and systemic movement	34
2.4. CP interaction proteins	36
3. RNA granules	37
3.1. Interplay between cytoplasmic RNA granules and viral infections	39
4. RNA m ⁶ A methylation	41
4.1. m ⁶ A machinery	42
4.1.1. m ⁶ A <i>writers</i>	43
4.1.2. m ⁶ A <i>erasers</i>	44
4.1.3. m ⁶ A <i>readers</i>	45
4.2. Roles of m ⁶ A	48
4.2.1. Molecular functions	48
4.2.2. Biological functions	50
5. m ⁶ A modification in animal viral infections	52
5.1. Viral regulation mediated by m ⁶ A-modified vRNA	53
5.1.1. Positive m ⁶ A-mediated viral regulation	53
5.1.2. Negative m ⁶ A-mediated viral regulation	56
5.1.3. Mixed m ⁶ A-mediated viral regulation	56

5.2. Indirect m ⁶ A-mediated viral regulation	61
6. m ⁶ A methylation in plant viral infections: everything is about to be done	63
Justification and objectives.....	67
Chapter I.....	71
Arabidopsis m ⁶ A demethylase activity modulates viral infection of a plant virus and the m ⁶ A abundance in its genomic RNAs.....	73
Chapter II	115
The Arabidopsis m ⁶ A readers ECT2, ECT3 and ECT5 restrict infection of <i>Alfalfa mosaic virus</i>	117
General discussion.....	167
Conclusions	177
References	181
