| <b>Acknowledgements.....</b>  | <b>9</b>  |
| <b>List of symbols and abbreviations.....</b>   | <b>11</b> |
| <b>1 Basic concepts of heterogenous catalysis.....</b>                                  | <b>13</b> |
| 1.1 Catalysis.....  | 13        |
| 1.2 Heterogeneous catalysis.....  | 15        |
| 1.3 Solid catalysts.....  | 17        |
| 1.3.1 <i>Crystal lattices</i> .....   | 17        |
| 1.3.2 <i>Metal surfaces and nanoparticles</i> .....                                     | 19        |
| 1.3.3 <i>Zeolites</i> .....   | 21        |
| 1.4 Motivation.....   | 25        |
| 1.5 References.....   | 27        |
| <b>2 Methods and models.....</b>  | <b>31</b> |
| 2.1 Introduction.....   | 31        |
| 2.2 Periodic models.....  | 31        |
| 2.2.1 <i>Surfaces models</i> .....  | 32        |
| 2.2.2 <i>Zeolites models</i> .....  | 33        |
| 2.3 Electronic structure methods.....   | 35        |
| 2.3.1 <i>Basic concepts</i> .....   | 35        |
| 2.3.2 <i>Density functional theory</i> .....  | 39        |
| 2.3.3 <i>The Kohn-Sham approach</i> .....   | 40        |
| 2.3.4 <i>The search for approximations to the exchange-correlation functional</i> ..... | 42        |
| 2.3.5 <i>Dispersion corrections</i> .....   | 44        |
| 2.3.6 <i>Reciprocal space</i> .....   | 45        |
| 2.3.7 <i>Plane waves and pseudopotentials</i> .....                                     | 46        |
| 2.4 Potential Energy Surface (PES).....   | 49        |
| 2.5 Static Techniques.....  | 50        |
| 2.5.1 <i>Vibrational analysis</i> .....   | 51        |
| 2.5.2 <i>Free energy</i> .....  | 52        |
| 2.6 Dynamics techniques.....  | 55        |
| 2.6.1 <i>Molecular dynamics</i> .....   | 55        |
| 2.6.2 <i>Free energy methods</i> .....  | 56        |
| 2.6.3 <i>Collective variables</i> .....   | 58        |
| 2.6.4 <i>Vibrational frequencies from ab-initio molecular dynamics</i> ..               | 61        |

|   |            |
|---|------------|
| 2.7 NMR basic concepts and computation.....   | 62         |
| 2.8 References.....   | 68         |
| <b>3 Chemoselective reduction of nitrostyrene with non-noble metals.....</b>  | <b>75</b>  |
| 3.1 Introduction.....   | 75         |
| 3.2 Methods and models.....   | 79         |
| 3.3 Adsorption of nitrostyrene.....   | 80         |
| 3.4 Reaction network.....   | 83         |
| 3.5 Activation of H <sub>2</sub> on Ni(111), Co(111) and Cu(111).....   | 84         |
| 3.6 Reduction of the vinyl group on Ni(111) and Co(111).....  | 90         |
| 3.7 Reduction of the nitro group on Ni(111). Direct Route.....  | 92         |
| 3.7.1 <i>Parallel pathways</i> .....  | 92         |
| 3.7.2 <i>Normal pathways</i> .....  | 96         |
| 3.8 Reduction of nitro group on Co(111). Direct route.....  | 101        |
| 3.8.1 <i>Parallel pathways</i> .....  | 101        |
| 3.8.2 <i>Normal pathways</i> .....  | 106        |
| 3.9 Indirect or condensation route on Ni(111) and Co(111).....  | 110        |
| 3.10 Reduction of nitro group on Cu(111) and Pd (111).....  | 117        |
| 3.11 Water formation.....   | 121        |
| 3.12 Cu based bimetallic catalysts.....   | 124        |
| 3.13 Conclusions.....   | 128        |
| 3.14 References.....  | 130        |
| <b>4 Insights on the NH<sub>3</sub>-SCR-NO<sub>x</sub> reaction with Cu-CHA catalysts using static DFT methods.....</b> | <b>135</b> |
| 4.1 Introduction.....   | 135        |
| 4.2 Methods and models.....   | 138        |
| 4.3 Identification of Cu species in Cu-CHA by IR spectroscopy and theoretical modeling.....                             | 140        |
| 4.3.1 <i>Stability of Cu species from DFT calculations</i> .....  | 140        |
| 4.3.2 <i>Identification of the Cu species through IR analysis</i> .....   | 142        |
| 4.4. Theoretical study of the reaction mechanism.....   | 148        |
| 4.4.1. <i>Oxidation half-cycle: formation of nitrites and nitrates on Cu-CHA catalysts</i> .....                        | 148        |
| 4.4.2. <i>Reduction of Cu<sup>2+</sup> to Cu<sup>+</sup> with NO and NH<sub>3</sub></i> .....                           | 161        |
| 4.5 Conclusions.....  | 170        |
| 4.6 References.....   | 171        |
| <b>5 Insights on the NH<sub>3</sub>-SCR-NO<sub>x</sub> reaction from Molecular Dynamics simulations.....</b>            | <b>181</b> |
| 5.1 Introduction.....   | 181        |
| 5.2 Methods and models.....   | 184        |

|  |            |
|--|------------|
| 5.3 Adsorption of reactant molecules on the copper cations with AIMD.....  | 185        |
| 5.3.1 <i>Interaction of the reactant molecules with Cu<sup>2+</sup></i> .....  | 187        |
| 5.3.2 <i>Interaction of the reactant molecules with Cu<sup>+</sup></i> .....   | 192        |
| 5.4 Stability of Cu <sup>+</sup> complexes at low temperature with umbrella sampling.....                            | 201        |
| 5.5 Oxidation of NO to NO <sub>2</sub> .....   | 203        |
| 5.5.1 <i>Oxidation of NO to NO<sub>2</sub> at low temperature with umbrella sampling</i> .....                       | 208        |
| 5.6 Diffusion of amino complex.....  | 212        |
| 5.7 IR analysis. Comparison of static DFT and AIMD computed frequencies.....   | 219        |
| 5.8 Conclusions.....   | 227        |
| 5.9 References.....  | 229        |
| <b>6 Ab-initio simulation of NMR parameters: location of the F<sup>-</sup> in the as-made pure silica RTH.....</b>   | <b>233</b> |
| 6.1 Introduction.....  | 233        |
| 6.2 Methods.....   | 235        |
| 6.3 Elucidation of Fluoride location in the as-made RTH.....   | 236        |
| 6.3.1 <i>Linear fit for the prediction of the <sup>19</sup>F isotropic chemical shifts</i> .....                     | 237        |
| 6.3.2 <i>Simulation of the <sup>19</sup>F chemical shift assuming a monoclinic unit cell</i> .....                   | 239        |
| 6.3.3 <i>Redefinition of the unit cell</i> .....   | 245        |
| 6.3.4 <i>Simulation of the <sup>19</sup>F chemical shift with the triclinic unit cell</i> .....                      | 247        |
| 6.4 Conclusions.....   | 254        |
| 6.5 References.....  | 255        |
| <b>7 Conclusions.....</b>  | <b>263</b> |
| <b>8 Summary.....</b>  | <b>265</b> |
| <b>9 Resumen.....</b>  | <b>269</b> |
| <b>10 Resum.....</b>   | <b>273</b> |
| <b>Appendix A.....</b>   | <b>275</b> |
| <b>Appendix B.....</b>   | <b>279</b> |
| B.1 Calculated absolute <sup>29</sup> Si isotropic shieldings for the RTH framework with a monoclinic unit cell..... | 279        |
| B.2 Calculated absolute <sup>29</sup> Si isotropic shieldings for the RTH framework with a triclinic unit cell.....  | 284        |
