

# Table of Contents

<b>Chapter 1</b> .....	<b>1</b>
1.1 Introduction.....	2
1.2 Energy matrix and transport sector relevance.....	2
1.3 Document content and structure .....	9
1.4 Bibliography .....	13
<b>Chapter 2</b> .....	<b>16</b>
2.1 Introduction.....	17
2.2 Problematic of conventional diesel combustion .....	17
2.3 Potential of low temperature combustion strategies.....	19
2.3.1 Homogeneous charge compression ignition.....	21
2.3.2 Reactivity controlled compression ignition combustion.....	24
2.4 Dual-Mode Dual-Fuel concept: potential and challenges.....	28
2.4.1 Conceptual description of the DMDF combustion.....	28
2.4.2 Hardware influence on DMDF combustion .....	31
2.4.3 DMDF: benefits and challenges.....	35
2.5 Approach of the study .....	40
2.5.1 Motivation of the study .....	40
2.5.2 Objectives of the study .....	42
2.5.3 General methodology and research development.....	43
2.6 Bibliography .....	46
<b>Chapter 3</b> .....	<b>54</b>
3.1 Introduction.....	56

3.2	Experimental facilities .....	56
3.2.1	Multi-cylinder engine description .....	56
3.2.2	Test cell characteristics.....	62
3.2.3	Instrumentation and measuring equipment.....	65
3.3	Fuels properties and characteristics .....	74
3.3.1	Low reactivity fuels .....	74
3.3.2	High reactivity fuels.....	76
3.4	Theoretical tools.....	78
3.4.1	0 - dimensional models.....	78
3.4.2	GT-suite description .....	82
3.5	Experimental and numerical methodologies .....	84
3.5.1	Calibration Methodology .....	84
3.5.2	Vehicle model and driving cycle assessment methodology.....	89
3.6	Summary and conclusions.....	95
3.7	Bibliography .....	96
<b>Chapter 4</b>	.....	<b>100</b>
4.1	Introduction.....	102
4.2	Steady-state engine calibration under DMDF combustion .....	103
4.2.1.	Engine settings: injection and air management .....	104
4.2.2.	Performance analysis: efficiency, combustion, and main energy losses of the DMDF calibration.....	110
4.2.3.	Emissions: NO <sub>x</sub> , CO, HC, Soot and CO <sub>2</sub> .....	116
4.2.4.	Summary of the DMDF calibration .....	119
4.3	Driving cycle assessment: CDC <i>versus</i> DMDF .....	120

4.3.1. Driving cycles .....	121
4.3.2. GT-power model validation .....	124
4.3.3. DMDF performance and emission results in driving cycle evaluations.....	133
4.4 Drawbacks of the concept under real applications.....	151
4.5 Summary and conclusions.....	153
4.6 Bibliography .....	156
<b>Chapter 5 .....</b>	<b>158</b>
5.1 Introduction.....	160
5.2 Oxidation catalyst evaluation .....	161
5.2.1. Steady-state evaluation.....	161
5.2.2. DOC Transient evaluation.....	175
5.3 DPF assessment.....	189
5.3.1. Passive Regeneration .....	189
5.3.2. Active Regeneration.....	192
5.4 DOC and DPF evaluation through driving cycle approach.....	197
5.4.1. Methodology .....	198
5.4.2. DOC calibration .....	201
5.4.3. DPF Calibration .....	208
5.4.4. Results.....	210
5.5 Summary and conclusions.....	221
5.6 Bibliography .....	224
<b>Chapter 6 .....</b>	<b>229</b>
6.1 Introduction.....	231

6.2	Potential of octane modification on DMDF combustion.....	232
6.2.1.	Research Octane Number effect .....	234
6.2.2.	Sensitivity effect on representative DMDF conditions.....	253
6.2.3.	Summary .....	276
6.3	Advanced high reactivity fuels: path to reduce emissions and CO <sub>2</sub> footprint .....	278
6.3.1.	Potential of e-FT and Oxymethyl ester (OMEx) as high reactivity fuels for DMDF combustion.....	280
6.3.2.	Full map calibration with OMEx.....	296
6.4	Summary and conclusions.....	312
6.5	Bibliography .....	315
<b>Chapter 7</b>	.....	<b>319</b>
7.1	Introduction.....	320
7.2	Summary and conclusions.....	320
7.2.1	Steady-state calibration and driving cycle assessment with diesel- gasoline.....	322
7.2.2	DOC and DPF evaluation under steady and transient conditions .....	324
7.2.3	Fuel modifications to realize near future normative .....	325
7.3	Suggestions for future work.....	327
7.3.1	Assessment of the particulate composition and particulate number with OMEx.....	328
7.3.2	Implementation on a real demonstrator .....	328
7.3.3	Electrification of turbocharger, DOC and DPF.....	329
7.3.4	Additional long-term suggestions: hybridization of the concept .....	330
