<b>ACKNOWLEDGEMENTS.....</b>	<b>I</b>
<b>ABSTRACT.....</b>	<b>III</b>
<b>RESUM.....</b>	<b>V</b>
<b>RESUMEN.....</b>	<b>IX</b>
<b>CONTENTS.....</b>	<b>XIII</b>
<b>LIST OF FIGURES .....</b>	<b>XIX</b>
<b>LIST OF TABLES .....</b>	<b>XXXI</b>
<b>LIST OF ABBREVIATIONS AND NOTATION .....</b>	<b>XXXIII</b>
<b>CHAPTER 1: INTRODUCTION.....</b>	<b>1</b>
1.1. Background.....	1
1.2. Objectives .....	4
1.3. Structure of the document .....	7
<b>CHAPTER 2: STATE OF THE ART .....</b>	<b>9</b>
2.1. Introduction.....	9
2.2. UHPFRC: definition and properties.....	10
2.2.1. Definition of UHPFRC .....	10
2.2.2. Properties of UHPFRC.....	11

2.2.2.1. Tension stiffening.....	11
2.2.2.2. Shrinkage.....	13
2.3. Mechanical characterisation of UHPFRC tensile behaviour.....	16
2.3.1. UHPFRC uniaxial tensile response.....	17
2.3.2. UHPFRC tensile experimental tests.....	24
2.4. UHPFRC in standards and recommendations.....	28
2.4.1. UHPFRC constitutive behaviour and experimental tests.....	28
2.4.2. UHPFRC in design.....	31
2.5. Modelling UHPFRC.....	32
2.5.1. Brief introduction to material models.....	33
2.5.1.1. Basic types of models.....	33
2.5.1.2. Kinematic behaviour.....	36
2.5.1.3. Numerical solutions.....	39
2.5.2. Models and computational methods in structural analysis.....	40
2.5.2.1. Finite difference method.....	40
2.5.2.2. Boundary element method.....	41
2.5.2.3. Finite volume method.....	42
2.5.2.4. Spectral methods.....	43
2.5.2.5. Meshless methods.....	44
2.5.2.6. Finite element method.....	45
2.5.3. Modelling UHPFRC in the literature.....	46
2.5.3.1. Material characteristics and FEM calibration.....	49
2.5.3.2. Modelling UHPFRC structural elements.....	68
2.6. Chapter summary and relevant conclusions.....	85
<b>CHAPTER 3: PROPOSED CONSTITUTIVE MATERIAL MODELS.....</b>	<b>91</b>
3.1. Introduction.....	91
3.2. The uniaxial UHPFRC material model.....	92
3.2.1. Material behaviour in compression.....	92
3.2.2. Material behaviour in tension.....	93
3.2.3. Cracking.....	94

---

3.2.3.1 Smearred crack model .....	98
3.2.3.2 Discrete crack approach .....	104
3.2.4 The UHPFRC material model.....	105
3.2.4.1 Smearred cracking approach in UHPFRC .....	105
3.2.4.2 Discrete cracking approach in UHPFRC.....	109
3.2.5 Determining constitutive UHPFRC parameters .....	110
3.2.5.1 Compression.....	110
3.2.5.2 Tension.....	111
3.3. Multiaxial constitutive UHPFRC behaviour .....	112
3.3.1 Multiaxial cracking .....	112
3.3.2 Multiaxial smearred crack model .....	115
3.4. Reinforcement steel uniaxial constitutive behaviour .....	121
3.5. Bond between concrete and reinforcement steel bars .....	122
3.6. Chapter summary and relevant conclusions.....	124
<b>CHAPTER 4: NUMERICAL MODEL: DEFINITION AND IMPLEMENTATION</b> .....	<b>127</b>
4.1. Introduction.....	127
4.2. Overview of the finite element method.....	128
4.2.1. Discretisation .....	128
4.2.2. Solution strategies for nonlinear analysis.....	132
4.2.3. Workflow .....	135
4.3. UHPFRC material model in the FEM .....	137
4.3.1. Adaptation of the smearred cracking approach to the FEM .....	137
4.3.2. Inobjectivity of the strain-softening continuum material models.....	142
4.3.3. Adaptation of the discrete cracking approach to the FEM .....	146
4.4. Numerical implementation.....	149
4.4.1. Smearred cracking implementation .....	150
4.4.1.1. Loading and Unloading Determination.....	152
4.4.1.2. Stiffness Matrix.....	154
4.4.1.3. Lateral Expansion Effects due to Poisson’s Ratio.....	160
4.4.1.4. Tensile behaviour .....	162

4.4.1.5. Compressive behaviour .....	175
4.4.1.6. Shear behaviour .....	176
4.4.2. Discrete cracking implementation .....	177
4.4.3. Constitutive behaviour for interface elements implementation .....	177
4.4.3.1. Discrete cracking constitutive behaviour of UHPFRC .....	179
4.4.3.2. Bond-slip constitutive behaviour between reinforcement and UHPFRC .....	180
4.4.4. Implementation of the constitutive behaviour in tension for reinforcement steel. ....	181
4.5. Chapter summary and relevant conclusions .....	185
<b>CHAPTER 5: DIRECT PROCEDURE TO CHARACTERISE THE UHPFRC TENSILE CONSTITUTIVE BEHAVIOUR .....</b>	<b>189</b>
5.1. Introduction. ....	189
5.2. Four point bending test .....	191
5.3. Strain-hardening UHPFRC and material validation .....	193
5.3.1. Numerical non-linear finite element modelling (NLFEM) .....	194
5.3.1.1. Constitutive behaviour .....	196
5.3.1.2. Finite element mesh .....	198
5.3.1.3. Analysis procedure .....	199
5.3.2. NLFEM application .....	200
5.3.2.1. Smeared cracking approach .....	200
5.3.2.2. Discrete cracking approach .....	210
5.4. Strain-softening UHPFRC: characterisation of the tensile constitutive behaviour .....	225
5.4.1. Experimental programme .....	226
5.4.2. Numerical model application .....	232
5.5. Direct procedure: UHPFRC tensile constitutive behaviour .....	241
5.5.1. Characteristic UHPFRC tensile constitutive behaviour. ....	242
5.5.2. Predicting application to obtain UHPFRC tensile constitutive behaviour	246
5.6. Chapter summary and relevant conclusions .....	249
<b>CHAPTER 6: UHPFRC: REINFORCED ELEMENTS .....</b>	<b>253</b>
6.1. Introduction .....	253

6.2. Flexural reinforced elements.....	254
6.2.1. Experimental programme.....	254
6.2.1.1. Short beams.....	255
6.2.1.2. Long beams.....	259
6.2.1.3. Material characterisation.....	264
6.2.2. Numerical validation.....	268
6.2.3. Results and Discussion.....	273
6.2.3.1. Short beams.....	273
6.2.3.2. Long beams.....	288
6.2.4. Design considerations for UHPFRC.....	295
6.2.4.1. Serviceability level.....	295
6.2.4.2. Ultimate level.....	297
6.3. Tensile bars.....	299
6.3.1. Experimental programme.....	299
6.3.1.1. Reinforced tensile bars.....	299
6.3.1.2. Material characterisation.....	301
6.3.2. Numerical validation.....	303
6.3.3. Results and Discussion.....	306
6.3.3.1. Tension stiffening analysis.....	319
6.3.3.2. 3D-NLFEM-multicrack detailed application.....	323
6.4. Chapter summary and relevant conclusions.....	337
<b>CHAPTER 7: CONCLUSIONS AND FUTURE RESEARCH LINES.....</b>	<b>341</b>
7.1. Conclusions.....	341
7.1.1. On UHPFRC characterisation and modelling up to the present-day.....	343
7.1.2. On the definition and implementation of the UHPFRC model.....	344
7.1.3. On a direct procedure to characterise tensile UHPFRC behaviour.....	345
7.1.4. On the modelling of reinforced UHPFRC flexural and tensile elements.....	347
7.2. Future research lines.....	350
7.3. Publications deriving from this thesis.....	351
<b>BIBLIOGRAPHY.....</b>	<b>353</b>

<b>ANNEXE I: INVERSE ANALYSIS METHODOLOGY .....</b>	<b>377</b>
Closed form non-linear hinge model.....	378
1. Material level: .....	378
2. Definition of the non-linear hinge: .....	379
3. Closed-form formulation:.....	380
4. Average curvature to displacement at the mid-span in a 4PBT.....	380
Iterative Inverse Analysis (I-IA) .....	381
Simplified five-point inverse analysis (5P-IA).....	383
Simplified four-point inverse analysis (4P-IA) .....	384
Experimental results for SH-UHPFRC numerical validation.....	385
Experimental programme for the I-IA.....	385
Experimental validation of the simplified 5P-IA .....	387
<b>ANNEXE II: 2D-NLFEM-MULTICRACK.....</b>	<b>389</b>
