Abstract iii

Contents xiii

1 Introduction 1

1.1 Motivation . . . 3
1.2 Objectives. . . . 4
1.3 Main contributions . . . 4
1.4 Framework . . . 6
1.5 Outline. . . . 7

2 Myoelectric control for upper limb prostheses 9

2.1 Introduction . . . 11
2.2 Data acquisition. . . . 14
2.2.1 Muscle contraction physiology . . . 14
2.2.2 Input signals . . . 15
2.2.3 Data amount: number of channels and sampling frequency . . . 16
2.2.4 Data segmentation: sample size for feature extraction . . . 17
2.2.5 Feature extraction . . . 19

2.3 Learning . . . 20
2.3.1 Classification . . . 20
2.3.2 Regression . . . 22
2.3.3 Feedback . . . 24
2.3.4 Human adaptation . . . 26
2.4 Usability . . . 27
2.5 Open problems . . . 29

3 User-prosthesis co-adaptation 33
3.1 Introduction . . . 35
3.2 Machine adaptation . . . 37
3.3 Human adaptation . . . 38
3.4 Re-calibration . . . 40
3.5 Co-adaptive prosthesis control . . . 43
3.6 Discussion . . . 46

4 Adaptive auto-regressive proportional myoelectric control 49
4.1 Introduction . . . 51
4.2 Auto-regressive approach . . . 53
4.3 Adaptive filtering of the EMG signals . . . 56
4.4 Experimental paradigm . . . 61
4.4.1 Data acquisition . . . 61
4.4.2 Study design . . . 62
4.4.3 Performance metrics . . . 65
4.5 Results . . . 67
4.5.1 Real-time adaptation during training . . . 67
4.5.2 Performance gains of IIR system during the test phase . . . 69
4.5.3 Results on participants with limb deficiency . . . 71
4.6 Discussion . . . 72

5 Optimal training for myoelectric regression control 75
5.1 Introduction . . . 77
5.2 Prostheses control problem . . . 79

5.3 Traditional position based controller open-loop training paradigm 80
5.4 A novel velocity based controller closed-loop training paradigm 83
5.5 Experimental paradigm 84
5.5.1 Data acquisition 84
5.5.2 Controller 84
5.5.3 Study design 85
5.6 Results 88
5.6.1 Training analysis 89
5.6.2 Test analysis 92
5.7 Discussion 93

6 Robustness analysis 95
6.1 Introduction 97
6.2 Materials and methods 98
6.2.1 Study design 98
6.2.2 Experimental paradigm 100
6.2.3 Performance metrics 102
6.3 Results 102
6.3.1 Donning and doffing experiment 102
6.3.2 Arm position experiment 107
6.4 Discussion 110

7 Future work 115
7.1 3 DoFs control 117
7.1.1 Material and methods 117
7.1.2 Preliminary results 120
7.2 Virtual reality interface 125
7.3 Prosthesis experimentation 126

8 Conclusion 129

Merits 135
