

INDEX

I. INTRODUCTION.....	1
I.1. Origin, botany and morphology of persimmon.....	3
I.2. Worldwide production of persimmon.....	6
I.3. Persimmon production in Spain.....	8
I.4. Current challenges in the postharvest of persimmon ‘Rojo Brillante’	10
I.4.1 Treatments to remove astringency.....	10
I.4.2 Cold storage and chilling injury.....	14
I.5. Extending varietal range under Mediterranean agroclimatic conditions.....	16
II. OBJECTIVES.....	29
III. RESULTS.....	33
III.1. POSTHARVEST TECHNOLOGY TO GUARANTEE FRUIT QUALITY ON ARRIVAL AT OVERSEAS MARKETS.....	35

CHAPTER I

Effect of temperature during and immediately after CO₂-destringency treatment on internal flesh browning after cold storage of persimmon fruit.....37

Reference: *Scienza Horticulturae*, 2020, 268, 109363.

<https://doi.org/10.1016/j.scienta.2020.109363>

CHAPTER II

Application of a new wax containing ethanol as a method to remove persimmon astringency during cold storage.....61

Reference: *Journal of Food Science and Technology*, 2021. <https://doi.org/10.1007/s13197-021-05011-w>

III.2. PRE- AND POSTHARVEST METHODS TO GUARANTEE FRUIT QUALITY AFTER COLD STORAGE IN PACKING HOUSES.....87

CHAPTER III

Efecto de múltiples aplicaciones de Ácido Giberélico sobre la maduración y calidad postcosecha del caqui ‘Rojo Brillante’89

Reference: Under Review: *Levante Agrícola*

CHAPTER IV

Chlorophyll fluorescence imaging as a tool to evaluate calyx senescence during ripening of persimmon fruit treated with gibberellic acid.....107

Reference: Under Review: Postharvest Biology and Technology

CHAPTER V

Effect of storage conditions on quality of persimmon produced under organic conditions.....135

Reference: Acta Horticulturae, 1256, 2019, 195-202. ISHS, Proc. VI International Conference Postharvest Unlimited (Oct, 2017). Eds.: D. Valero et al.
<https://doi.org/10.17660/ActaHortic.2019.1256.27>

III.3. EVALUATION OF POSTHARVEST BEHAVIOR OF CULTIVARS INTRODUCED FROM OTHER COUNTRIES UNDER MEDITERRANEAN CONDITIONS.....149

CHAPTER VI

Harvest time and postharvest behavior of six Japanese non-astringent persimmon cultivars grown under Mediterranean conditions.....151

Reference: HortScience, 2020, 55(11), 1766-1771. <https://doi.org/10.21273/HORTSCI15181-20>

CHAPTER VII

Caracterización de variedades de caqui no astringentes del banco de germoplasma del IVIA.....177

Reference: Agrícola vergel, 2020, N° 428, 216-220

IV. GENERAL DISCUSSION.....193

V. GENERAL CONCLUSIONS.....207
