Abstract	iii
1 Introduction	1
1.1 Block-oriented models . . . . .	2
1.2 Wiener-Hammerstein models . . . . .	4
1.3 Motivation and objectives of the thesis . . . . .	7
1.4 Overview and Outline . . . . .	10
2 WH-EA: evolutionary algorithm for Wiener-Hammerstein system identification	13
2.1 Introduction . . . . .	14
2.2 Discrete-time formulation . . . . .	15
2.3 The BLA of a Wiener-Hammerstein system . . . . .	16
2.4 Genetic coding and search space . . . . .	18
2.5 Optimisation problem statement . . . . .	22
2.6 Genetic operations . . . . .	23
2.7 WH-EA description . . . . .	31
2.8 Application of WH-EA and results . . . . .	35

<b>3 A unified approach for the identification of Wiener, Hammerstein, and Wiener-Hammerstein models.</b>	<b>49</b>
3.1 Introduction . . . . .	50
3.2 Continuous-time formulation for the unified approach . . . . .	52
3.3 Initial linear model . . . . .	54
3.4 Optimisation problem statement . . . . .	55
3.5 Genetic coding . . . . .	56
3.6 Search space for poles and zeros . . . . .	58
3.7 Search space for static nonlinearity . . . . .	58
3.8 The multi-step signal . . . . .	64
3.9 Application examples . . . . .	68
<b>4 WH-MOEA: A Multi-objective Evolutionary Algorithm for Wiener-Hammerstein system identification. A novel approach for trade-off analysis between complexity and accuracy.</b>	<b>87</b>
4.1 Introduction . . . . .	88
4.2 Preliminary considerations . . . . .	90
4.3 Multi-objective optimization problem statement . . . . .	93
4.4 Wiener-Hammerstein Multi-objective Evolutionary Algorithm (WH-MOEA) . . . . .	95
4.5 Using WH-MOEA to compare design concepts: a procedure . . . . .	101
4.6 Evaluation of WH-MOEA . . . . .	104
4.7 Application of WH-MOEA and trade-off analysis using design concepts . . . . .	112
<b>5 Conclusions and future research directions</b>	<b>133</b>
5.1 Conclusions . . . . .	134
5.2 Future research directions . . . . .	139
<b>Bibliography</b>	<b>141</b>
