

TABLE OF CONTENTS

I. INTRODUCTION	26
1. Bioplastics for food packaging	28
1.1. Poly (vinyl alcohol)	30
1.2. Poly (lactic acid)	31
2. Biodegradation	32
2.1. Polyvinyl alcohol degradation	33
2.2. PLA degradation	34
3. Active food packaging using bioplastics	35
4. Biodegradable multilayer films for food active packaging	41
References	52
II. OBJECTIVES	63
III. CHAPTERS	67
CHAPTER I. Liposomal encapsulation of carvacrol to obtain active poly (vinyl alcohol) films	69
ABSTRACT	70
1. INTRODUCTION	71
2. MATERIALS AND METHODS	73
2.1. Materials	73
2.2. Liposome production	73
2.3. Liposome properties	73
2.4. Preparation of films	74
2.5. Final carvacrol content in the films	74
2.6. Microstructure of films	74
2.7. Statistical analysis	75
3. RESULTS AND DISCUSSION	76
3.1. Liposomal characteristics	76
3.2. Liposomal stability	79
3.3. Carvacrol content and film microstructure of PVA matrices with liposomes	81

4. CONCLUSION	86
References	87

CHAPTER II. Effect of carvacrol in the properties of films based on poly (vinyl alcohol) with different molecular characteristics 93

ABSTRACT	95
1. INTRODUCTION	96
2. MATERIALS AND METHODS	98
2.1. Materials	98
2.2. Film preparation	98
2.3. Characterisation of the active PVA films	98
3. RESULTS AND DISCUSSION	102
3.1. Carvacrol retention	102
3.2. Film microstructure.....	102
3.3. Thermal behaviour and crystallinity of the films.....	106
3.4. Tensile, barrier and optical properties of the films.	111
4. CONCLUSION	115
References	116

CHAPTER III. The incorporation of carvacrol into poly (vinyl alcohol) films encapsulated in lecithin liposomes..... 121

ABSTRACT	123
1. INTRODUCTION	124
2. MATERIALS AND METHODS	126
2.1. Materials	126
2.2. Preparation of liposome dispersions	126
2.3. Preparation of films	126
2.4. Characterization of the active poly (vinyl alcohol) films	127
3. RESULTS AND DISCUSSION	130
3.1. Microstructure	130
3.2. Thermal behaviour.....	136
3.3. Functional properties.....	140
4. CONCLUSION	144

References	145
------------------	-----

CHAPTER IV. Incorporation of phenolic acids in poly (vinyl alcohol) matrices for the active films development..... 151

IV.I. Effect of phenolic acids on the properties of films from poly (vinyl alcohol) of different molecular characteristics 153

ABSTRACT	155
1. INTRODUCTION	156
2. MATERIALS AND METHODS	158
2.1. Materials	158
2.2. Preparation of films	158
2.3. Characterisation of the active PVA films	158
Final content of phenolic acids	158
3. RESULTS AND DISCUSSION	162
3.1. Content of phenolic acids in the films	162
3.2. Microstructure, crystallinity and FTIR characterization of the films.	162
3.3. Tensile properties	166
3.4. Water solubility and barrier properties.....	168
3.5. Thermal behaviour.....	169
3.6. Thermal degradation	171
4. CONCLUSION	173
References	174

IV.II. Effect of the processing method on the physicochemical and active properties of poly (vinyl alcohol) films incorporating phenolic acids..... 179

ABSTRACT	181
1. INTRODUCTION	182
2. MATERIALS AND METHODS	184
2.1. Materials	184
2.2. Preparation of films	184
2.3. Characterisation of the active PVA films	185
3. RESULTS AND DISCUSSION.....	189
3.1. Phenolic acid and moisture content in the films, and their water solubility	189

3.2.	Microstructure and crystallinity of the films.	191
3.3.	FTIR characterisation	195
3.4.	Tensile properties	196
3.5.	Barrier properties.....	198
3.6.	Optical properties of the films	199
3.7.	Thermal behaviour.....	200
3.8.	Antioxidant and antimicrobial capacity of the films.....	203
4.	CONCLUSION	206
	References	207
 CHAPTER V. Antimicrobial PLA-PVA multilayer films containing phenolic compounds.....		211
	ABSTRACT	213
1.	INTRODUCTION	214
2.	MATERIALS AND METHODS	216
2.1.	Materials	216
2.2.	Processing of multilayer films.....	216
2.3.	Characterisation of the multilayer films	218
2.4.	Packaging of beef in multilayer film bags.	220
3.	RESULTS AND DISCUSSION	221
3.1.	Microstructure and crystallinity of the films	221
3.2.	Thermal behaviour of mono and multilayers	224
3.3.	Tensile properties	226
3.4.	Equilibrium moisture and barrier properties.....	228
3.5.	Optical parameters	229
3.6.	Analyses of multilayer films as to their preservation capacity of beef fillets.....	231
4.	CONCLUSION	236
	References	237
IV.	GENERAL DISCUSSION	243
V.	CONCLUSIONS	259
