1	Introduction	1
1.1	General approach	1
1.2	Background	4
1.3	Motivation	7
1.4	Objectives	9
1.4.1	Analysis, revision and classification of the existing regulatory frameworks to obtain the best practices in the usage of demand flexibility as a resource for system operation	10
1.4.2	Quantify the flexibility potential of residential consumers and the socioeconomic and geographical gaps associated with these potentials	11
1.4.3	Analyse and quantify how increasing levels of solar self-consumption can affect the price and market power in wholesale electricity markets	12
1.4.4	Improvement of the design and operation of interruptible demand response programs	13
1.5	Methodology	13
1.6	Structure	15
2	Formulating consumer centered energy policies	21
