*Index*

Index .....	14
Chapter 1 .....	20
Introduction .....	20
1.1 Biomass as an Alternative Source of Carbon.....	22
1.1.1 Second-generation biomass.....	23
1.1.2 Fuels and chemicals from biomass: The biorefinery .....	25
1.1.3 Heterogeneous catalysis in biomass valorization.....	27
1.2 Novel biodiesel production and the glycerol surplus .....	29
1.2.1 Glycerol valorisation.....	30
1.3 Glycerol dehydration to acetol: a way to enhance reactivity .....	33
1.3.1 Continuous catalytic processes for glycerol dehydration to acetol .....	34
1.3.2 Mechanistic insights into glycerol dehydration to acetol.....	37
1.4 New alternatives for glycerol valorisation: towards organonitrogen chemicals ...	47
1.4.1 Bio-based organonitrogen chemicals .....	50
1.5 N-heterocycles .....	54
1.5.1 Piperazines: applications and synthesis .....	60
1.5.2 Pyrazines: applications and synthesis .....	62
1.6 References .....	66
Chapter 2 .....	89
Objectives.....	89
2.1 Main Objective.....	91
2.2 Specific Objectives .....	92
Chapter 3 .....	94
Experimental Procedure .....	94
3.1 Commercial chemicals .....	96
3.2 Catalyst synthesis.....	100
3.2.1 Hydrotalcite-derived mixed oxides .....	100
3.2.2 High surface area mixed metal oxides <i>via</i> co-precipitation .....	100
3.2.3 Supported metal and metal oxide catalysts <i>via</i> incipient wetness impregnation .....	101

## Index

3.2.4 CuO supported on SiO <sub>2</sub> <i>via</i> precipitation-deposition method.....	102
3.2.5 CuO supported on SiO <sub>2</sub> <i>via</i> grafting with APTES.....	102
3.2.6 CuO supported on ZrO <sub>2</sub> or Al <sub>2</sub> O <sub>3</sub> <i>via</i> reverse micelle formation.....	102
3.2.7 Synthesis of ZrO <sub>2</sub> (mixture of tetragonal and monoclinic phases) .....	103
3.3 Catalyst characterization .....	103
3.3.1 Inductively Coupled Plasma Atomic Emission Spectroscopy (ICP-AES) ..	103
3.3.2 X-Ray Diffraction (XRD) .....	105
3.3.3 Electron microscopy .....	106
3.3.3.1 Scanning electron microscopy (SEM) .....	107
3.3.3.2 Transmission electron microscopy (TEM).....	108
3.3.3.3 Energy-Dispersive X-ray spectroscopy (XEDS).....	109
3.3.4 N <sub>2</sub> -physisorption .....	110
3.3.5 Pulse chemisorption and ammonia temperature programmed desorption (NH <sub>3</sub> -TPD).....	111
3.3.6 Pulse chemisorption and CO <sub>2</sub> temperature programmed desorption (CO <sub>2</sub> - TPD).....	112
3.3.7 Fourier-transform infrared (FTIR) spectroscopy .....	113
3.3.7.1 Fourier-transform infrared (FTIR) spectroscopy of adsorbed pyridine .....	113
3.3.7.2 Fourier-transform infrared (FTIR) spectroscopy of adsorbed CO ..	114
3.3.7.3 Fourier-transform infrared (FTIR) spectroscopy of adsorbed CHCl <sub>3</sub> .....	115
3.3.7.4 Fourier-transform infrared (FTIR) spectroscopy of adsorbed NO ..	116
3.3.7.5 In-situ Fourier-transform infrared (FTIR) spectroscopy using hydroxyacetone (gas phase), 1,2-PDO as probe molecule (gas phase), and glycerol (impregnated).....	116
3.3.8 Temperature-programmed reduction (TPR) .....	117
3.3.9 X-ray photoelectron spectroscopy (XPS).....	118
3.3.10 Chemisorption.....	122
3.3.10.1 CO chemisorption .....	122
3.3.10.2 N <sub>2</sub> O chemisorption.....	123

*Index*

3.3.11 Thermogravimetric analysis (ATG).....	125
3.3.12 Elemental analysis (EA).....	125
3.3.13 Nuclear magnetic resonance analyses (NMR) .....	126
3.3.14 Isotopic exchange experiments H/D .....	127
3.4 Catalytic tests .....	127
3.4.1 Continuous glycerol dehydration to acetol .....	127
3.4.2 Reductive cycloamination of acetol with ethylenediamine to 2- methylpiperazine.....	128
3.4.2.1 Coupling with the dehydration product.....	130
3.4.3 Cycloamination of acetol with ethylenediamine and dehydrogenation to 2- methylpyrazine.....	130
3.4.3.1 One pot two-step process from glycerol .....	132
3.5 Reaction mixture analyses.....	134
3.5.1 Continuous glycerol dehydration to acetol .....	134
3.5.2 Reductive cycloamination of acetol with ethylenediamine to 2- methylpiperazine.....	138
3.5.2.1 Coupling with the glycerol dehydration product.....	140
3.5.3 Cycloamination of acetol with ethylenediamine and dehydrogenation to 2- methylpyrazine.....	140
3.5.3.1 One pot two-step process from glycerol (multi bed reactor) .....	142
3.6 References.....	144
Chapter 4 .....	147
Hydrotalcite-derived Cu-based mixed oxides as catalysts for the selective glycerol dehydration to acetol .....	147
4.1 Introduction.....	149
4.2 Compositional, structural, and textural characterization.....	150
4.3 Catalytic results and discussion .....	160
4.3.1 Optimizations and catalytic results in continuous-flow fixed-bed reactor...	160
4.3.2 Ascertaining the effect of M <sup>II</sup> /M <sup>III</sup> molar ratio in Cu-based catalysts .....	165
4.3.3 The role of Cu in Cu-Mg-Al mixed oxides .....	170
4.3.3.1 Comparison between Cu-, Ni-, and Co-based catalysts .....	170
4.3.3.2 Effect of the oxidation state of Cu in Cu-Mg-Al mixed oxides .....	173

## Index

4.3.3.3 Additional tests and measurements .....	177
4.3.3.4 “in-situ” FTIR measurements .....	180
4.3.4 Reaction mechanism proposal .....	185
4.3.5 Effect of the amount of Cu in Cu-Mg-AlO <sub>x</sub> catalysts .....	188
4.3.6. Significance of choosing MeOH as solvent .....	192
4.3.7. Catalyst re-usability .....	194
4.3.8 Effect of doping elements in Cu-Mg-Al mixed oxides .....	198
4.3.8.1 First catalytic screening .....	198
4.3.8.2 Acid-base properties after doping .....	199
4.3.8.3 Redox properties after doping .....	202
4.3.8.4 Endurance to retrotopotactic transformation after doping .....	205
4.4 Conclusions .....	208
4.5 References .....	209
Chapter 5 .....	214
Copper oxide supported on metal oxides as catalysts for the selective glycerol dehydration to acetol .....	214
5.1 Introduction .....	216
5.2 Preparation and characterization of CuO supported on silica materials .....	218
5.3 Preparation and characterization of CuO supported on alumina materials .....	226
5.4 Preparation and characterization of CuO supported on zirconia materials .....	233
5.5 Results and discussion for CuO supported on silica materials .....	239
5.5.1 Catalytic activity for CuO supported on silica materials .....	239
5.5.2 Structure-activity relationships for CuO supported on SiO <sub>2</sub> materials .....	241
5.5.3 Catalytic activity for CuO supported on alumina materials .....	243
5.5.4 Structure-activity relationships for CuO supported on Al <sub>2</sub> O <sub>3</sub> materials .....	245
5.5.5 Catalytic activity for CuO supported on zirconia materials .....	246
5.5.6 Structure-activity relationships for CuO supported on ZrO <sub>2</sub> materials .....	248
5.6 Long term use, further selection, and reusability .....	250
5.7 Insights into the catalyst behaviour: an <i>in-situ</i> XPS-FTIR study .....	255
5.8 Additional improvement on the CuO/ <i>m</i> -ZrO <sub>2</sub> system .....	259

*Index*

5.9 Conclusions.....	266
5.10 References.....	267
Chapter 6.....	269
Towards a semicontinuous catalytic process for 2-methylpiperazine synthesis <i>via</i> acetol.....	269
6.1 Introduction.....	271
6.2 Preparation and characterization of Pd-supported materials.....	273
6.3 Preliminary catalytic tests.....	282
6.4 Catalytic activity of Pd supported on simple metal oxides.....	286
6.5 Catalytic activity of Pd supported on mixed metal oxides.....	287
6.6 Further comparison, understanding and catalyst selection.....	289
6.7 Reusability of <i>Pd/TiO<sub>2</sub>-Al<sub>2</sub>O<sub>3</sub></i> catalyst, its use in water presence and extension to other reactants.....	296
6.8 Consecutive two-step process to produce 2-methylpiperazine from glycerol.....	299
6.9 Conclusions.....	303
6.10 References.....	304
Chapter 7.....	308
Towards a continuous catalytic process to 2-methylpyrazine <i>via</i> acetol.....	308
7.1 Introduction.....	310
7.2 First catalytic screening with supported CuO materials.....	311
7.3 Catalyst selection.....	322
7.3.1 Catalytic tests for CuO/ZrO <sub>2</sub> system.....	322
7.3.2 Catalytic tests for CuO/Al <sub>2</sub> O <sub>3</sub> system.....	324
7.3.3 Longer term study for CuO/Al <sub>2</sub> O <sub>3</sub> - <i>npw</i> .....	326
7.3.4 Overall structure-activity relationships.....	328
7.4 Additional improvement on the CuO/Al <sub>2</sub> O <sub>3</sub> - <i>npw</i> catalyst.....	330
7.4.1 Preparation and characterization of RV-CuO/Al <sub>2</sub> O <sub>3</sub> - <i>npw</i> .....	330
7.4.2 Catalytic tests.....	332
7.5 Two-step one-pot process from glycerol to 2-methylpyrazine.....	334
7.5.1. Catalyst selection based on solvent compatibility.....	335
7.5.2. Catalytic test in the multibed reactor.....	338

*Index*

7.6 Conclusions.....	340
7.7 References.....	342
Chapter 8.....	345
General Conclusions .....	345
Chapter 9.....	351
List of Figures, Schemes and Tables.....	351
Chapter 10.....	368
