

# INDEX

<b>ABBREVIATIONS .....</b>	1
<b>ABSTRACT .....</b>	3
<b>INTRODUCTION.....</b>	9
1. General characteristics of viroids .....	10
1.1 Family <i>Pospiviroidae</i> .....	12
1.2 Family <i>Avsunviroidae</i> .....	14
2. <i>Hop stunt viroid</i> .....	16
3. <i>Eggplant latent viroid</i> .....	21
4. Host alterations induced by viroids .....	26
4.1 RNA silencing and viroids.....	26
4.2 Epigenetic alterations caused by viroids.....	30
5. The contribution of viroids to molecular biology.....	33
<b>OBJECTIVES AND JUSTIFICATION .....</b>	36
<b>CHAPTER 1 .....</b>	39
Abstract and keywords .....	40
Introduction .....	41
Results .....	43
Dimeric clone construction.....	43
The dimeric viroid-derived clones are highly infectious.....	45
Discussion.....	47
Material and methods .....	49
Supplementary material.....	52
<b>CHAPTER 2 .....</b>	55
Abstract and keywords .....	56
Introduction .....	57
Results .....	59
HSVd and ELVd contains putative ORFs able to encode peptides.....	59
Putative viroid-derived peptides show specific cellular compartmentalization .....	61
Inactivation of putative ORFs affects biological efficiency of ex-circRNAs.....	62
Circular forms of HSVd and ELVd interact with translational machinery <i>in vivo</i> and HSVd contains m6A modification.....	66
Discussion.....	68
Material and methods .....	72
Supplementary material.....	78

<b>CHAPTER 3 .....</b>	89
Abstract and keywords .....	90
Introduction .....	91
Results .....	94
Viroid infection.....	94
Modifications in the host siRNA/miRNA population .....	95
Biogenesis and functional role of HSVd-derived sRNAs .....	98
HSVd-infection modulates the expression and alternative splicing of host-transcripts .....	101
Epigenetic alterations associated to HSVd-infection.....	104
Interplay between methylation and transcriptional regulation in infected plants.....	106
Discussion.....	109
Material and methods .....	116
Supplementary material.....	121
<b>GENERAL DISCUSSION .....</b>	131
<b>CONCLUSIONS .....</b>	140
<b>REFERENCES.....</b>	143
