Contents

1 Introduction **1**
- 1.1 Motivation . . . 2
- 1.2 Objectives of the thesis . . . 3
- 1.3 Organization of the thesis . . . 3

2 Web Prefetching **5**
- 2.1 Introduction . . . 5
- 2.2 Generic Web Prefetching Architecture . . . 6
  - 2.2.1 Generic Web Architecture . . . 6
  - 2.2.2 Prediction Engine . . . 6
  - 2.2.3 Prefetching Engine . . . 7
- 2.3 Web Prediction Algorithms . . . 8
  - 2.3.1 Prediction from the accesses pattern . . . 8
    - 2.3.1.1 Markov models . . . 9
    - 2.3.1.2 Web mining algorithms . . . 14
    - 2.3.1.3 Other algorithms . . . 15
  - 2.3.2 Prediction from web content . . . 16
- 2.4 Web Prefetching in Commercial Products . . . 17
- 2.5 Conclusions . . . 17

3 Performance Evaluation **19**
- 3.1 Introduction . . . 19
- 3.2 Experimental Framework . . . 20
  - 3.2.1 Introduction . . . 20
  - 3.2.2 Surrogate . . . 21
  - 3.2.3 Client . . . 23
  - 3.2.4 Proxy Server . . . 26
  - 3.2.5 Implementation Example . . . 27
- 3.3 Performance Key Metrics . . . 30
  - 3.3.1 Introduction . . . 30
  - 3.3.2 Indexes Taxonomy . . . 31
    - 3.3.2.1 Prediction Related Indexes . . . 32

3.3.2.2 Resource usage . . . 35
3.3.2.3 Latency related indexes . . . 37
3.3.2.4 Summary . . . 38
3.3.3 Relation between indexes . . . 39
3.3.3.1 Empirical tests . . . 39
3.3.3.2 Analytical Relations . . . 49
3.3.4 Key Metrics Summary . . . 50
3.4 Comparison Methodology . . . 51
3.4.1 Performance indexes . . . 52
3.4.2 Methodology . . . 52
3.5 Workload . . . 53
3.5.1 Old and Current Workload Differences . . . 53
3.5.2 Evolution of Prediction Performance . . . 56
3.5.2.1 Background . . . 56
3.5.2.2 Experimental Environment . . . 57
3.5.2.3 Experimental results . . . 58
3.5.3 Influence of the User's Available Bandwidth on the Perceived Latency . . . 65
3.5.4 Workload summary . . . 65
3.6 Conclusions . . . 66

4 Theoretical Limits on Performance 67
4.1 Introduction . . . 67
4.2 Metrics . . . 68
4.3 Workload . . . 69
4.4 Predicting at the server . . . 69
4.5 Predicting at the client . . . 71
4.6 Predicting at the proxy . . . 71
4.7 Collaborative prediction . . . 72
4.7.1 Collaborative prediction between clients and servers . . . 73
4.7.2 Collaborative prediction between proxy and servers . . . 74
4.7.3 Collaborative prediction between clients and proxy . . . 74
4.8 Conclusions . . . 74

5 Evaluation of Current Prefetching Algorithms 77
5.1 Introduction . . . 77
5.2 Background . . . 78
5.3 Experimental Environment . . . 78
5.4 Selecting Algorithm Parameters . . . 79
5.5 Algorithms Comparison . . . 80
5.6 Algorithms Analysis . . . 88
5.7 Conclusions . . . 88

6 The Influence of the Environment Conditions in the Design of Prefetching Algorithms **91**
6.1 Introduction . . . 91
6.2 Background . . . 92
6.3 Performance Indexes and Related Factors . . . 93
6.4 Statistical Methodology . . . 93
6.4.1 Analysis of Variance (ANOVA) . . . 93
6.4.2 Design of Experiments . . . 94
6.5 Experimental Environment . . . 94
6.6 Experimental Results . . . 95
6.6.1 Experiments Design . . . 95
6.6.2 Correlation Analysis . . . 96
6.7 Conclusions . . . 100

7 DDG: A Prefetching Algorithm for Current Web **103**
7.1 Introduction . . . 103
7.2 Experimental Environment . . . 104
7.3 Uselessness Analysis of Existing Algorithms . . . 105
7.4 Double Dependency Graph Algorithm (DDG) . . . 108
7.4.1 Description . . . 108
7.4.2 Selecting Parameters Values . . . 109
7.5 Algorithms Comparison . . . 112
7.6 Conclusions . . . 116

8 Conclusions and Future Work **119**
8.1 Conclusions . . . 119
8.2 Summary of contributions . . . 120
8.3 Future Work . . . 121
8.3.1 Future Directions in Our Work . . . 121
8.3.2 Future Directions in Web Prefetching . . . 121
