

Summary.....	10
Resumen	13
Resum	16
Abbreviations.....	20
General introduction.....	24
1. Viruses concept.....	26
2. Alfalfa Mosaic Virus	27
2.1. Origin, geographical distribution and economic impact	27
2.2. Viral transmission and symptomatology.....	28
2.3. Genome organization and life cycle.....	29
2.3.1. Replication, translation and encapsidation.....	32
2.3.2. Cell-to-cell and systemic movement.....	33
2.4. Interaction of AMV CP with host proteins	34
3. RNA granules	35
3.1. Cytoplasmic RNA granules and viral infections	39
4. RNA modifications: <i>N</i>⁶-methyladenosine (<i>m</i>⁶<i>A</i>).....	41
4.1. The main components of the <i>m</i>⁶<i>A</i> modification system: Writers, Erasers, and Readers	43
4.1.1. Writers.....	44
4.1.2. Erasers	45
4.1.2. Readers.....	46
4.2. Roles of <i>m</i>⁶<i>A</i>	48
4.2.1. Effects of <i>m</i> ⁶ <i>A</i> on RNA.....	48
4.2.1.1. mRNA Stability	49
4.2.1.2. 3'UTR Processing.....	49
4.2.2. <i>m</i> ⁶ <i>A</i> on plant growth, development and response to stress.....	50
5. Role of <i>m</i>⁶<i>A</i> in mammal infecting viruses.....	51
6. <i>m</i>⁶<i>A</i> in plant viral infections	55
Motivation and objectives.....	59
Chapter I.....	64
Mapping of Functional Subdomains in the <i>at</i>ALKBH9B <i>m</i>⁶<i>A</i>-Demethylase Required for Its Binding to the Viral RNA and to the Coat Protein of Alfalfa Mosaic Virus	66
Chapter II	99
Impact of the potential <i>m</i>⁶<i>A</i> modification sites at the 3'UTR of alfalfa mosaic virus RNA3 in the viral infection.....	101
Chapter III.....	122

Evaluation of the effect of <i>Arabidopsis</i> m ⁶ A RNA-MTases on Alfalfa Mosaic Virus replication	124
<i>General discussion</i>	148
<i>Conclusions</i>	160
<i>References</i>	165
