1	Introduction	1
1.1	State of the Art	4
1.1.1	Existing completeness results for narrowing	4
1.1.2	Existing termination results for narrowing	6
1.2	Plan of the thesis	8
2	Foundations	11
3	Syntactic Termination	17
3.1	Basic Narrowing	19
3.1.1	A novel result on termination of basic narrowing	20
3.2	Beyond canonical systems	24
3.2.1	Rigid normal forms and rnf-based TRSs	27
3.3	Beyond right-linear systems	28
3.3.1	Stable and Root-stable Rigid normal forms	28
3.3.2	Reachability-complete TRSs	30
3.4	Beyond left-linear systems	31
3.5	Discussion	39
4	Automatic Termination	41
4.1	The Dependency Pair Method	43
4.2	Termination of Narrowing with Dependency Pairs	46
4.2.1	The <i>echoing</i> problem	47
4.2.2	Narrowing Dependency Pairs	50
4.2.3	Classes of TRSs where narrowing enjoys the TRAT property	57
4.2.4	Proving the Absence of Infinite Narrowing Chains	59
4.3	The Narrowing Dependency Pair framework	62
4.3.1	The Dependency Graph processor	63
4.3.2	The Reduction Pair processor	64
4.3.3	Usable Rules	66
4.3.4	The Argument Filtering processor	70
4.4	Discussion	72
5	Automatic Termination from an Initial Goal	75
5.1	Goal-directed Dependency Pairs	79
5.1.1	Dependency Graphs	82
5.1.2	Usable Rules	84

5.2	Relative Termination	89
5.2.1	Beyond hierarchical combinations	91
5.3	Termination of Narrowing via Relative Termination	93
5.3.1	Beyond left-linear systems	96
5.3.2	Checking the termination criterion	102
5.3.3	Admissible Derivations	107
5.4	Termination of Logic Programs	109
5.5	Results and Discussion	111
6	The NARRADAR termination tool	119
6.1	Input	120
6.2	Output	121
6.3	Implementation details	124
7	Modularity of Basic Narrowing Termination	127
7.1	Basic narrowing and innermost rewriting	128
7.2	Commutation of basic narrowing derivations	130
7.3	Modularity of Basic Narrowing Termination	133
7.3.1	\mathcal{C}_ε -termination	136
7.3.2	Disjoint and Constructor-sharing Unions	137
7.3.3	Composable unions	138
7.4	Modularity in Hierarchical Combinations	138
7.4.1	Crosswise Independent Unions	144
7.4.2	Nice Extensions	145
7.4.3	Proof of modularity in proper extensions	149
7.5	Discussion	151
8	Modularity of Decidability of Equational Unification	153
8.1	Existing results	153
8.2	Modularity of decidability of E-unification via basic narrowing	155
8.3	Discussion	159
9	Conclusion	161
	Bibliography	165
	Index	175
