
Contents

Contents	i
List of Figures	v
List of Tables	xi
Nomenclature	xv
1 Introduction	1
1.1 General context	1
1.2 Background	4
1.3 Objectives	6
1.4 Thesis outline	7
References	9
2 Literature review: New technologies and fuels for pollutant emissions reduction in compression ignition engines	11
2.1 Introduction	11
2.2 The combustion process in CI engines	12
2.2.1 Formation of air-fuel mixture	12
2.2.2 Air motion	12
2.2.3 Fuel atomization and evaporation	13
2.2.4 Combustion process	13
2.2.5 Soot formation	18
2.3 Strategies for combustion system design	18
2.3.1 Strategies based on the physical characteristics or geometric parameters	19

2.3.2	Strategies based on the injection system	22
2.3.3	Strategies based on air management system	23
2.4	Alternative fuels for CI engines	24
2.5	Alternative combustion systems	26
2.6	Summary and conclusions	32
	References	32
3	Literature review: optimization methods	47
3.1	Introduction	47
3.2	Optimization algorithms	48
3.2.1	Particle Swarm Optimization	49
3.2.2	Mutation applied to PSO	49
3.2.3	Centripetal accelerated particle swarm optimization . .	51
3.2.4	LSHADE and jSO	51
3.2.5	Novelty search	52
3.2.6	Genetic algorithm	52
3.2.7	Neural network	54
3.3	Summary and conclusions	56
	References	57
4	Methodology: Computational tools and numerical model implementation	61
4.1	Introduction	61
4.2	Engine characteristics description	62
4.3	Computational approach	64
4.3.1	CFD software and models	64
4.4	Model validation	69
4.4.1	Mesh independence study	69
4.4.2	Turbulence modelling evaluation	74
4.4.3	Mesh layering study	77
4.4.4	Heat transfer evaluation	79
4.4.5	Numerical results: validation and discussion	82
4.5	Optimization algorithm	86
4.5.1	Novelty swarm optimization algorithm	86
4.5.2	NS Benchmark results	88
4.6	Optimization methodology	94
4.7	Computational tools	96
4.7.1	Injector model - Virtual injection model	96
4.7.2	Bowl geometry model	96
4.7.3	Pumping work model	98

4.7.4	Post-processing	98
4.8	Summary and conclusions	99
3.A	Annex:	100
	References	107
5	Optimization of the combustion system of CI engines using conventional diesel	115
5.1	Introduction	115
5.2	Optimization parameters and objective function	117
5.3	Optimization results	120
5.4	Engine results	133
5.4.1	Engine Optimization Results	133
5.4.2	Parameter evolution	137
5.5	Summary and conclusions	140
	References	141
6	Optimization of the combustion system of CI engines fueled with OME	145
6.1	Introduction	145
6.2	Investigated fuel characteristics	147
6.3	Optimization parameters and objective function	151
6.4	Optimization results	155
6.5	Parametric study for sensitivity analysis	167
6.6	Summary and conclusions	172
	References	174
7	Optimizing of the combustion system of oxy-fuel combustion engines	179
7.1	Introduction	179
7.2	Oxy-fuel combustion model	180
7.3	Optimization definition	183
7.3.1	Optimization parameters and objective function	183
7.4	Results and discussion	186
7.4.1	Optimization process results	187
7.4.2	Engine results	194
7.5	Analysis of an extended operating range	199
7.6	Summary and conclusions	217
	References	218
8	Conclusions and future works	223
8.1	Introduction	223

8.2	Conclusions	223
8.3	Conventional diesel CI engines combustion system optimization	224
8.4	CI engine fueled with OME combustion system optimization .	225
8.5	Oxy-combustion engine combustion system optimization . . .	226
8.6	Future works	227
	Global Bibliography	229
