

APPENDIX I.

Project relation with Sustainable Development Goals (SDG)

Relationship degree of this FDP project with the Sustainable Development Goals (SDG):

- **SDG 3. Good health and well-being:** the aim of this FDP is to improve the health and well-being of patients genetically diagnosed with Lynch syndrome.
- **SDG 4. Quality education:** as scientific work, this FDP hopes to contribute to education and science, with the opportunity to be shared among researchers.
- **SDG 10. Reduced inequalities:** this FDG is not focused in only one country, on the contrary, it aims to help to every researcher around all the globe which work is related to this project's information.

APPENDIX II. Full list of viral species identified

The colors used in the appendix are connected to the colors used in the text's figures. They are related to the type of virus according to a summarized Baltimore classification, being the virus marked in blue dsDNA viruses, grey for any kind of retrovirus, green dsRNA, yellow ssDNA, orange ssRNA and purple are the virus that could not be taxonomically assigned to any viral agent.
