Contents	xxi
List of Figures	xxiii
List of Tables	xxxii
List of Acronyms	xxxiii
Chapter 1 Introduction and Thesis objectives	1
1.1 A (not so small) overview of semiconductor industry story .....	1
1.1.1 <i>The birth of electronic integration</i> .....	1
1.1.2 <i>Photonics to the rescue: a paradigm shift</i> .....	5
1.2 Programmable Integrated Photonics.....	7
1.2.1 <i>From specificity to large-scale production</i> .....	7
1.2.2 <i>Reconfigurable waveguide meshes and programmable unit cells</i> ....	9
1.2.3 <i>Towards programmable photonic processors: technology stack and applications</i> .....	11
1.3 Objective and Thesis Structure.....	13
1.3.1 <i>Original contributions of this Thesis</i> .....	14
Chapter 2 Self-configuration of photonic circuits in programmable photonic processors	17
2.1 Introduction .....	17
2.2 Particle swarm optimization.....	19
2.3 Circuit programming .....	20
2.3.1 <i>Self-configuration of ‘all-cross’ waveguide meshes</i> .....	20
2.3.2 <i>Self-configuration of a 1x8 optical beamsplitter</i> .....	23
2.3.3 <i>Self-configuration of optical filters</i> .....	26

Chapter 3	Applications of graph-based algorithms in programmable photonic processors	39
3.1	Introduction .....	39
3.2	Pathfinder algorithm.....	40
3.2.1	<i>Graph construction</i> .....	40
3.2.2	<i>Algorithm description</i> .....	42
3.3	Applications .....	44
3.3.1	<i>Self-calibration of photonic waveguide meshes</i> .....	44
3.3.2	<i>Self-characterization of photonic waveguide meshes</i> .....	51
3.3.3	<i>Simulation of photonic circuits</i> .....	60
Chapter 4	Experimental Applications	73
4.1	Hardware and experimental set-ups .....	73
4.1.1	<i>Design A</i> .....	73
4.1.2	<i>Design B</i> .....	74
4.2	Experimental applications .....	76
4.2.1	<i>Self-configuration of photonic structures</i> .....	76
4.2.2	<i>Self-calibration of photonic waveguide meshes</i> .....	86
4.2.3	<i>Self-characterization of photonic processors</i> .....	86
4.2.4	<i>Optical switch</i> .....	88
Chapter 5	Summary, Conclusion and Future Work	95
5.1	Summary and Conclusions.....	95
5.2	Future work .....	96
5.2.1	<i>Reconfiguration speed</i> .....	96
5.2.2	<i>Improved convergence</i> .....	98
5.2.3	<i>Power consumption</i> .....	98
Appendix A	Pseudocodes of graph-based algorithms	101
	Author's Publication List	111
	Bibliography	113
