

ABSTRACT.....	10
RESUMEN	12
RESUM.....	14
PUBLICATIONS.....	16
ABBREVIATIONS AND ACRONYMS	18
LIST OF FIGURES AND TABLES.....	22
GENERAL INTRODUCTION	28
BRAIN DAMAGE.....	28
<i>Etiology and epidemiology</i>	28
<i>Physiopathological events upon brain damage: the relevance of enhancing the subacute phase</i>	30
<i>Current approaches in research and treatment for brain injury: novel insights to promote axonal regeneration and plasticity</i>	33
THE ROLE OF NEUREGULIN1/ERBB AXIS IN DEVELOPMENT. A NEUROPROTECTIVE FACTOR UPON BRAIN DAMAGE.....	37
<i>Presenting the main characters: Nrg1 and ErbB proteins</i>	37
<i>Nrg1 /ErbB4: a complex signaling pathway</i>	39
<i>The function of Nrg1 signaling in neuronal development</i>	40
<i>Nrg1: an emerging neuromodulator of CNS repair</i>	44
HYPOTHESIS AND OBJECTIVES	48
CHAPTER 1: NRG1 SIGNALING PROMOTES AXONAL OUTGROWTH IN A NOVEL <i>IN VITRO</i> MODEL OF AXONAL INJURY	50
GRAPHICAL ABSTRACT.....	50
INTRODUCTION	51
RESULTS.....	56
<i>Characterization of a novel in vitro model of axonal injury</i>	56
<i>Nrg1-ICD expression promotes axonal outgrowth upon injury in vitro</i>	58
<i>Nrg1 deletion limited axonal outgrowth upon injury in vitro</i>	60
DISCUSSION.....	62
CHAPTER 2: CHARACTERIZATION OF A NOVEL <i>IN VIVO</i> MODEL FOR MULTIPLEXED ANALYSIS OF CALLOSAL CONNECTIONS UPON CORTICAL DAMAGE	66
GRAPHICAL ABSTRACT.....	66
INTRODUCTION	68
RESULTS.....	72
<i>Tracing of cortico-cortical connections in young mice</i>	72
<i>Cortical controlled damage in young mice</i>	74
<i>Tracing cortico-cortical projections and inducing cortical controlled damage in aged mice</i>	75
<i>Functional characterization: CCD model produces motor impairment in aged mice</i>	76

<i>Bioinformatic pipeline of tissue processing and stereological analysis</i>	78
<i>Tissue damage and inflammatory response in aged mice</i>	80
<i>Perineuronal nets are affected in the perilesional area upon CCD</i>	82
DISCUSSION.....	84
CHAPTER 3: NRG1 SIGNALING IS NEUROPROTECTIVE UPON BRAIN DAMAGE	88
GRAPHICAL ABSTRACT.....	88
INTRODUCTION.....	89
RESULTS.....	92
<i>Nrg1-TM1 expression is increased upon phototrombosis in aged mice</i>	92
<i>Nrg1 deletion deteriorated motor recovery upon CCD</i>	94
<i>Nrg1 ablation produces a subtle increase in the neuroinflammatory response upon CCD</i>	96
<i>Nrg1-ICD expression reduced neuroinflammatory response upon CCD</i>	97
<i>Nrg1 deletion compromised PNNs integrity upon CCD in the contralesional cortex of aged mice</i>	99
<i>Nrg1-ICD expression did not overtly modulate PNNs integrity upon CCD</i>	102
DISCUSSION.....	105
CHAPTER 4: NRG1 SIGNALING MODULATES CORTICAL CONNECTIVITY UPON BRAIN DAMAGE	110
GRAPHICAL ABSTRACT.....	110
INTRODUCTION.....	111
RESULTS.....	114
<i>Contralateral cortical wiring was affected upon CCD</i>	114
<i>Nrg1 deletion altered contralateral cortical wiring upon CCD</i>	115
<i>Nrg1 deletion reduced axonal preservation within cortical layers upon CCD</i>	119
<i>Nrg1-ICD expression could modulate axonal sprouting in not injured samples</i>	121
<i>Nrg1-ICD expression increased axonal sprouting in lower layers upon CCD</i>	123
DISCUSSION.....	126
GENERAL DISCUSSION	132
FUTURE PERSPECTIVES	136
CONCLUSIONS	140
MATERIAL AND METHODS	142
Animals.....	142
Nrg1 construct and adenoassociated viral vectors.....	142
Primary neuronal cultures.....	143
Experimental <i>in vitro</i> model of axonal injury.....	145
Experimental <i>in vivo</i> model of CCD.....	145
Phototrombosis.....	146
Tamoxifen-inducible transgenic mice characterization.....	147

RNA extraction and qPCR.....	148
Motor behavior analysis.....	148
<i>Rotating pole test</i>	149
<i>Catwalk XT</i>	150
<i>Narrow and Wide-Spaced Ladder</i>	151
<i>Treadmill</i>	151
Immunofluorescence.....	152
Histology.....	152
Bioinformatic image processing.....	153
Image analysis.....	154
<i>Quantification of axonal outgrowth in vitro</i>	154
<i>Stereological measurements</i>	154
<i>Cortical profile and axonal preservation</i>	154
<i>PNNs integrity analysis</i>	156
Statistical analysis and figure design.....	157
ANEXES	160
Supplementary material S1: Composition of the different media used for cortical neuronal cultures.....	160
Supplementary material S2: Antibody information.....	160
Supplementary material S3: Python code for sorting the image stacks.....	161
Supplementary Material S4: Fiji code for stack alignment.....	166
